

QuRating: Selecting High-Quality Data for Training Language Models

Alexander Wettig¹ Aatmik Gupta¹ Saumya Malik¹ Danqi Chen¹

Abstract

Selecting high-quality pre-training data is important for creating capable language models, but existing methods rely on simple heuristics. We introduce QuRating, a method for selecting pre-training data that can capture human intuitions about data quality. In this paper, we investigate four qualities—*writing style*, *required expertise*, *facts & trivia*, and *educational value*—and find that LLMs are able to discern these qualities, especially when making pairwise judgments of texts. We train a QuRater model to learn scalar ratings from pairwise judgments, and use it to annotate a 260B training corpus with quality ratings for each of the four criteria. In our experiments, we select 30B tokens according to the different quality ratings and train 1.3B-parameter language models on the selected data. We find that it is important to balance quality and diversity. When we sample using quality ratings as logits over documents, our models obtain lower perplexity and stronger in-context learning performance than baselines. Our best model is based on educational value and performs similarly to a model trained with uniform sampling for 50% more steps. Beyond data selection, we use the quality ratings to construct a training curriculum which improves performance without changing the training dataset. We extensively analyze the quality ratings and discuss their characteristics, biases, and wider implications.²

1. Introduction

There is increasing evidence that choosing the right training data is essential for producing state-of-the-art large language models (LLMs) (Brown et al., 2020; Chowdhery et al., 2023; Rae et al., 2021). Researchers have found that model performance can be improved by deduplicating training data (Lee

Figure 1. In QuRating, we obtain comparative judgements from an LLM to train a QuRater model, which assigns scalar quality ratings to the documents in a language model training corpus.

et al., 2022; Abbas et al., 2023), finding the right balance of domains (Touvron et al., 2023a; Xie et al., 2023a), or selecting data that resembles a high-quality corpus (Brown et al., 2020; Chowdhery et al., 2023; Xie et al., 2023b). However, the ideal properties of training data remain hard to characterize; an improved understanding could enable open research to train stronger models under resource constraints.

In this work, we aim to capture the abstract qualities of texts which humans intuitively perceive. As part of our approach, which we call QuRating (**quality rating**),³ (1) we compare pairs of texts along a quality criterion, (2) we train a model that translates the resulting judgments into scalar quality ratings, (3) we use these ratings to select pre-training data, and (4) we identify which abstract qualities are valuable by training language models on the selected subsets and evaluating their performance.

Throughout the paper, we focus on four particular qualities of a text as our criteria for data selection: the text’s *writing style*, the amount of *facts & trivia* it contains, its *educational value*, and the *required expertise* needed to understand it. These qualities are necessarily subjective. However, we verify that GPT-3.5-turbo can discern their presence in clear-cut cases. In particular, we find that LLMs produce more stable and accurate judgments when prompted to compare

²To encourage further research, we release our prompts, models, and data at <https://github.com/princeton-nlp/QuRating>.

³QuRating/QuRater can be pronounced like curating/curator.

documents in a pairwise setting.

We use the Bradley-Terry model (Bradley & Terry, 1952) to translate the LLM-derived pairwise judgments into quantitative ratings for each piece of text. We treat the ratings as logits over documents, from which we sample without replacement for subset selection. We add a temperature τ to trade off quality and diversity by interpolating between top- k selection ($\tau \rightarrow 0$) and uniform random sampling ($\tau \rightarrow \infty$). We show that in this formulation, quality ratings are connected to rewards in RLHF (Ouyang et al., 2022).

For our experiments, we query GPT-3.5-turbo to judge 250K text pairs for each of the four quality criteria and fine-tune a Sheared-Llama-1.3B model (Xia et al., 2024) to learn the implied quality ratings. We then use this fine-tuned *QuRater* model to predict quality ratings across 260B tokens from the SlimPajama corpus (Soboleva et al., 2023) to produce the *QuRatedPajama* dataset. Finally, we train new 1.3B-parameter language models from scratch by selecting subsets of 30B out of 260B tokens. We compare our method to uniform sampling, perplexity filtering (Wenzek et al., 2020; Marion et al., 2023), and importance resampling (Xie et al., 2023b) with respect to high-quality domains. Our evaluation focuses on in-context learning on 10 diverse tasks as a measure of model capability (Gao et al., 2021).

We find that selecting only the highest-rated documents produces models which excel at particular tasks but underperform on others. Sampling with a temperature $\tau = 2.0$ produces more consistent results across tasks and improves validation perplexity. When we use our best selection criterion, *educational value*, we improve in-context learning (ICL) performance on every tasks by an average of 1.8% compared to uniform selection, similar to a baseline trained for 50% more steps. Selecting based on *writing style* leads to the best perplexity but surprisingly does not lead to substantial improvements in downstream task performance.

We also leverage the quality ratings to build a training curriculum. Our experiments show that models trained on data ordered based on *required expertise* outperform models which are trained on the same data in a random order.

We perform an extensive analysis of the quality ratings. For each domain, we study the distribution of ratings and report insights from inspecting high and low-ranking documents. Finally, we discuss the social impact of data selection and document the effect of QuRating on web pages from the AboutMe dataset (Lucy et al., 2024).

Our work demonstrates how certain human notions of data quality are effective signals for scalable data selection. We release our code, the GPT-3.5-turbo outputs, the fine-tuned QuRater model and the annotated QuRatedPajama dataset to encourage data exploration and efficient LLM training.

2. Background

We review some best practices in data engineering for language models and discuss them in relation to our approach.

Rule-based heuristics. Data selection pipelines commonly include hand-crafted heuristics that filter out low-quality data (Rae et al., 2021; Laurençon et al., 2022; TogetherAI, 2023; Penedo et al., 2023; Soldaini et al., 2023). These typically involve thresholds on mean word length, stop word fraction, and word repetitions, e.g., the so-called C4 filters (Raffel et al., 2020) and the Gopher rules (Rae et al., 2021). While binary rules are useful for excluding noisy internet artifacts, we need more precise quality measures to identify the most desirable examples in a dataset.

Model-based heuristics. In *heuristic classification* (Brown et al., 2020), a bigram discriminator model selects data that resembles a high-quality target domain, such as Wikipedia articles. This paradigm has been widely adopted (Du et al., 2022; Gao et al., 2020; Chowdhery et al., 2023; Touvron et al., 2023a). In Data Selection with Importance Resampling (DSIR), Xie et al. (2023b) sample from generative models instead of discriminators, and show that this improves performance. We argue that an entire domain such as Wikipedia is an imprecise proxy for data quality. Another popular method is perplexity filtering (Wenzek et al., 2020; Muennighoff et al., 2023; Marion et al., 2023), i.e., choosing data that has high likelihood under a language model. However, we note that this includes data with simple and repetitive content, which is easy to predict for a model.

LLM quality signals. Most similar to our work, Gunasekar et al. (2023) filter data by querying GPT-4 to identify documents with “educational value for a student whose goal is to learn basic coding concepts”. In contrast to our work, they augment filtered web data with synthetic data generated by LLMs. We study four quality criteria and use pairwise comparisons, which produce more stable rankings with GPT-3.5-turbo. Our work is also connected to Korbak et al. (2023), who incorporate human preferences into language model training but with a focus on toxicity and privacy. We select data with the goal of teaching language models strong skills with fewer samples.

Deduplication. Deduplicating training data has become standard practice (Lee et al., 2022; Anil et al., 2023; Touvron et al., 2023a), as it improves language models by removing repeated training data and boosting sample diversity. Deduplication is usually done in a fuzzy or semantic manner (Jiang et al., 2023; Abbas et al., 2023; Tirumala et al., 2023). While it reduces the number of documents in a corpus, it is not well-suited to sample a subset of a specific size. Rather, it should be run before selecting data based on quality.

Figure 2. We consider a pair of texts and report the judgments we elicit from GPT-3.5 as to which text it prefers, using different prompts that correspond to different qualitative criteria. We also report the quality ratings which we ultimately use for data selection. These ratings are given by our QuRater model, which is trained to assign ratings that best correspond to pairwise judgments.

Distillation. In knowledge distillation, a student model is trained to absorb the knowledge of a teacher model (Hinton et al., 2015). This approach has been adapted to language models (Kim & Rush, 2016; Sanh et al., 2019; Agarwal et al., 2024), where the student model receives rich feedback from the teacher at every token position. Selecting data with QuRating can be seen as a much sparser form of distillation, providing as guidance only a single quality signal per sequence. After the training data has been selected, models acquire knowledge not from a teacher but from the raw documents in the training corpus.

3. Quantifying Qualitative Aspects of Text

We develop a method which can directly capture human intuition about data quality and leverage it for scalable data selection. We obtain fine-grained quality signals without having to craft heuristic rules or select proxy domains.

3.1. Overview of the Method

We associate a *quality criterion* with a question that asks which of two pieces of text (t_A , t_B) exhibits a certain quality to a higher degree. We record the confidence $p_{B \succ A} \in [0, 1]$ with which a judge chooses B over A . In this paper, we sample pairs of texts from a vast collection of documents and use GPT-3.5-turbo to judge them based on the criterion. Thus, we can rapidly create large datasets of judgments $\mathcal{J} = \{(t_i, t_j, p_{i \succ j})\}$.

We use the Bradley-Terry model (Bradley & Terry, 1952) to translate binary judgments into scalar quality ratings,

$$p_{B \succ A} = \sigma(s_B - s_A),$$

where σ is the sigmoid function, and the ratings are estimated using maximum-likelihood estimation. We parametrize the ratings with a so-called *QuRater* model

$s_\theta(t_i)$, which is trained with the binary cross-entropy loss,

$$\mathcal{L}_\theta = \mathbb{E}_{(t_A, t_B, p_{B \succ A}) \in \mathcal{J}} \left[-p_{B \succ A} \log \sigma(s_\theta(t_B) - s_\theta(t_A)) - (1 - p_{B \succ A}) \log \sigma(s_\theta(t_A) - s_\theta(t_B)) \right].$$

This parallels the training of reward models in Reinforcement Learning from Human Feedback (RLHF) (Ouyang et al., 2022) without conditioning the models on user input.

3.2. Choice of Criteria and Prompts

Which abstract qualities of text are most deserving of study? We argue that the most interesting criteria (1) are applicable to a wide variety of text, (2) require a deeper understanding of a text’s content, which cannot easily be derived from surface features, (3) result in fine-grained rankings with few ties, (4) are complementary to each other. After exploring different candidates and iterating on their prompts, we choose the following four questions as our criteria:

- *Which text has a more polished and beautiful writing style?* We use “style” to emphasize the writing over the subject matter. In our exploration, “beautiful” and “polished” favor literary and academic writing, respectively.
- *Which text contains more facts and trivia? Prefer specific facts and obscure trivia over more common knowledge.* Inspired by LLMs’ potential applications as knowledge bases (Petroni et al., 2019), we aim to identify texts that have a high density of long-tail factual knowledge. We find that adding “trivia” helps the LLM choose facts about niche topics and fictional worlds.
- *Which text has more educational value? E.g., it includes clear explanations, step-by-step reasoning, or questions and answers.* Following Gunasekar et al. (2023), we

prompt for educational value and specify some properties that are considered particularly valuable for inducing reasoning capabilities in LLMs, e.g., “step-by-step reasoning” resembles Chain-of-Thought prompting (Wei et al., 2022; Kojima et al., 2022).

- Which text **requires greater expertise and prerequisite knowledge to understand it?** It is interesting to study how the difficulty level of the training corpus impacts the capabilities of the model.

We show how these prompts act on two contrasting texts in Figure 2. The full prompts can be found in Appendix A.

Prompt validation. As quality judgments are ultimately subjective, we evaluate the prompts on clear-cut cases. For each criterion, we curate two sets of 40 documents from the web with clear differences in quality. We describe the specific constitution of this dataset in Table 3 in the appendix. We choose GPT-3.5-turbo⁴ as the LLM judge and evaluate the agreement with our preferences on 1600 document pairs. Using our prompts, GPT-3.5-turbo agrees with our preferences over 97% of the time on all the criteria except *facts & trivia*, on which we achieve 92% agreement.

3.3. Why Use Pairwise Comparisons?

Previous work explores using LLMs to judge individual texts (Gunasekar et al., 2023). We observe that LLMs are better at comparing texts than they are at judging individual texts; specifically, they produce more reliable judgments in pairwise settings, and can better discriminate between texts with fine variations in quality.

In a case study, we rank 10 documents (see Table 4 in Appendix A) based on the authors’ collective perception of their *writing style*. We use this ranking to study the LLM’s ability to measure subtle gradations in quality. We ask GPT-3.5-turbo to (1) rate the documents’ *writing style* on a 1 to 10 scale or (2) make pairwise judgments for all pairs of documents. We evaluate the Kendall tau rank coefficient with our human judgments on all 45 pairs and find that with GPT-3.5-turbo achieves 0.79 ± 0.01 in the pairwise setting, compared to 0.61 ± 0.06 for individual judgments, where we compute standard deviations over 3 runs.

Pairwise judgments are usually easy to verify for human annotators, whereas it is difficult to assess the correctness of the precise grade assigned to a document. Research in psychology and education suggests that pairwise judgments improve self-consistency and inter-annotator agreement (Thurstone, 1927; Pollitt, 2012); and have been found to be useful in the specific setting of evaluating essays (Pollitt & Crisp, 2004; Lesterhuis et al., 2022). In machine

learning, pairwise comparisons have been used in assessing LM outputs (Ouyang et al., 2022; Dubois et al., 2023; Zeng et al., 2024) and in information retrieval (Gienapp et al., 2022; Sun et al., 2023; Qin et al., 2023).

3.4. Training the QuRater Model

Having settled on criteria and prompts, we produce a large-scale dataset of judgments by querying GPT-3.5-turbo on 250K text pairs for each criterion. For each text pair, we prompt the LLM in both (t_A, t_B) and (t_B, t_A) order, and generate multiple continuations, which we average to compute the overall confidence $p_{B>A}$. This counteracts the positional bias observed in pairwise comparisons with LLMs (Wang et al., 2023; Zeng et al., 2024).

The dataset is derived from 500K unique documents in SlimPajama (Soboleva et al., 2023), a web-scale pre-training corpus based on RedPajama (TogetherAI, 2023). For each pair of documents, we extract snippets of at most 512 Llama tokens (Touvron et al., 2023a). Specifically, 200K pairs are sampled randomly across all domains, and an additional 10K pairs are sampled within each of the five specialist domains Wikipedia, Book, StackExchange, Github, ArXiv. In Appendix B, Table 5 shows that we obtain many confident LLM judgments across domains, and Figure 5 shows that the judgments are not strongly correlated between criteria.

We fine-tune a 1.3B parameter Sheared-Llama model (Xia et al., 2024) on the dataset of pairwise LLM judgments. We add four linear heads to predict quality ratings across the four criteria. In Appendix B, we discuss the training setup in detail and show that the QuRater model has over 93% accuracy on held-out judgments.

4. Selecting Data By Quality Rating

Our goal is to select a subset of documents from a large-scale corpus. We introduce the following framework for sampling according to quality ratings. Let each document d_i in a corpus \mathcal{D} be annotated with a quality rating s_i , assigned by the QuRater model. We sample documents without replacement according to the softmax probabilities,

$$p(d_i) \propto \exp\left(\frac{s_i}{\tau}\right),$$

normalized over the corpus \mathcal{D} . The temperature term τ controls the sample diversity. As $\tau \rightarrow 0$, this strategy becomes top- k selection, the most straightforward approach of incorporating quality signals. At $\tau \rightarrow \infty$, it is equivalent to the uniform sampling baseline. This sampling scheme implicitly changes the language modeling objective to reward-weighted regression (Korbak et al., 2023; Peters & Schaal, 2007). We sample without replacement following (Xie et al., 2023b), as it increases sample diversity and also allows for efficient sampling via the Gumbel top- k trick (Kim et al.,

⁴Throughout the paper, we use GPT-3.5-turbo-0613.

2016; Kool et al., 2019; Vieira, 2014).

Quality ratings as rewards. In Appendix C, we show the quality ratings are connected to rewards in Reinforcement Learning from Human Feedback (RLHF) (Ouyang et al., 2022; Rafailov et al., 2023) when using this sampling strategy. For large enough sample sizes, our method approximates pre-training a language model on a random subset of the dataset, and then using RLHF to steer the language model towards generating documents with higher quality ratings. The temperature τ becomes the weight of the KL-divergence term in the RLHF objective, constraining the RLHF model to be similar to the pre-trained model. Unlike the typical rewards used in RLHF, the quality ratings are not conditioned on user input and should serve a different purpose: to guide the model towards data from which it can learn generalizable skills (Arora & Goyal, 2023; Yu et al., 2024) and useful world knowledge (Li et al., 2023).

Curriculum learning with quality ratings. Sampling without replacement naturally leads to a training curriculum. In regular language model training, the examples are randomly shuffled after data selection. However, if we train on examples in reverse order in which they were sampled, examples with low quality ratings are more likely to appear at the start of training and highly-rated examples towards the end of training. This is particularly interesting when there is sufficient budget to train on the entire corpus \mathcal{D} .

5. Experiments

We verify the QuRating approach in practice by training language models from scratch.

5.1. Setup

QuRatedPajama. We annotate a 260B token corpus with quality ratings across our four criteria—using the QuRater model from Section 3.4—to produce QuRatedPajama. The corpus is a subset of documents from SlimPajama (Soboleva et al., 2023), an extensively deduplicated version of RedPajama (TogetherAI, 2023), and consists of sequences of 1024 tokens using the Llama tokenizer (Touvron et al., 2023a). Since the QuRater model was only fine-tuned on short sequences, we compute the document-level quality rating by averaging over contiguous segments of up to 512 tokens weighted by their segment length. While the annotation process is expensive (equivalent to 520 NVIDIA H100 hours), it can be massively parallelized, and the resulting quality ratings can serve many purposes, e.g., data selection, curriculum training or data discovery.⁵

⁵We publicly release QuRatedPajama and make it available at huggingface.co/datasets/princeton-nlp/QuRatedPajama-260B.

Training. Using different data selection methods, we select a subset of 30B tokens from QuRatedPajama and train a randomly initialized language model on this training set for one epoch in a randomly shuffled order. The models have 1.3B parameters and use a transformer architecture (Vaswani et al., 2017) with RoPE embeddings (Su et al., 2024). Further details can be found in Appendix D. We train on slightly more data than the compute-optimal amount (Hoffmann et al., 2022). However, a larger number of training tokens should give a clearer signal regarding data quality.

Evaluation. We aim to provide a holistic evaluation of the language models trained on 30B tokens:

- We measure the perplexity over 50M tokens from SlimPajama’s held-out validation split.
- We evaluate the in-context learning (ICL) performance using lm-evaluation-harness (Gao et al., 2021). We study 10 tasks, comprising 5 reading comprehension tasks (ARC-easy/challenge (Clark et al., 2018), SciQA (Welbl et al., 2017), LogiQA (Liu et al., 2020), BoolQ (Clark et al., 2019)), 3 commonsense reasoning tasks (HellaSwag (Zellers et al., 2019), PIQA (Bisk et al., 2020), WinoGrande (Sakaguchi et al., 2021)) and 2 knowledge-intensive tasks (NQ (Kwiatkowski et al., 2019), MMLU (Hendrycks et al., 2021)). We choose the number of few-shot examples for each task to ensure that all examples fit within the context window of 1024 tokens. We report the detailed settings in Appendix D.
- We evaluate the instruction-following capabilities of our models, borrowing the setting used by (Xia et al., 2024). We perform supervised fine-tuning on 10,000 instruction-response pairs from the ShareGPT dataset. We evaluate on another 1,000 instructions and use the AlpacaFarm codebase (Dubois et al., 2023) to judge the responses from two models with GPT-4-0314.

5.2. Data Selection Methods

In each experiment, we select a 30B-token training dataset from QuRatedPajama with one of the following methods, while retaining the same domain proportions as the overall dataset. We leave it to future work to combine QuRating with methods that optimize the domain mixture.

- *Uniform:* We select randomly with a uniform probability across documents, equivalent to $\tau \rightarrow \infty$. For comparison’s sake, we train an additional model on 45B tokens, requiring 50% more compute.
- *Sample with QuRating:* For each of the four criteria, we sample according to the quality ratings as described in Section 4. We normalize the variance of the quality ratings to be 1 and then sample with temperatures $\tau \in \{0.0 \text{ (i.e., top-}k\text{ selection)}, 1.0, 2.0\}$.

Table 1. QuRating improves perplexity and average few-shot in-context learning (ICL) results when sampling with temperature $\tau = 2.0$. We report validation perplexity and in-context learning task performance for 10 tasks. We highlight the best result in each column and improvement over uniform sampling with the same token budget. In Appendix D, we report perplexity numbers for all models in Table 8 and detailed results for each ICL task in Table 9.

Selection Method		Perplexity	Reading Comprehension (5 tasks)	Commonsense Reasoning (3 tasks)	World Knowledge (2 tasks)	Average (10 tasks)
Uniform		8.96	50.9	55.0	14.9	44.9
DSIR	<i>with Wiki</i>	10.67 $\uparrow^{1.71}$	50.1 $\downarrow^{0.8}$	49.8 $\downarrow^{5.2}$	14.7 $\downarrow^{0.2}$	42.9 $\downarrow^{2.0}$

Writing	<i>top-k</i>	10.53 $\uparrow^{1.57}$	49.3 $\downarrow^{1.6}$	53.3 $\downarrow^{1.7}$	13.5 $\downarrow^{1.4}$	43.4 $\downarrow^{1.5}$
Style	$\tau = 2.0$	8.90 $\downarrow^{0.06}$	51.0 $\uparrow^{0.1}$	55.8 $\uparrow^{0.8}$	14.1 $\downarrow^{0.8}$	45.0 $\uparrow^{0.1}$
Facts & Trivia	<i>top-k</i>	10.56 $\uparrow^{1.60}$	54.3 $\uparrow^{3.4}$	51.7 $\downarrow^{3.3}$	15.5 $\uparrow^{0.6}$	45.8 $\uparrow^{0.9}$
	$\tau = 2.0$	8.91 $\downarrow^{0.05}$	52.7 $\uparrow^{1.8}$	55.6 $\uparrow^{0.6}$	15.6 $\uparrow^{0.7}$	46.2 $\uparrow^{1.3}$
Educational Value	<i>top-k</i>	10.59 $\uparrow^{1.63}$	54.7 $\uparrow^{3.8}$	54.9 $\downarrow^{0.1}$	14.4 $\downarrow^{0.5}$	46.7 $\uparrow^{1.8}$
	$\tau = 2.0$	8.91 $\downarrow^{0.05}$	53.3 $\uparrow^{2.4}$	56.3 $\uparrow^{1.3}$	15.7 $\uparrow^{0.8}$	46.7 $\uparrow^{1.8}$
Required Expertise	<i>top-k</i>	11.54 $\uparrow^{2.58}$	52.8 $\uparrow^{1.9}$	48.7 $\downarrow^{6.3}$	14.3 $\downarrow^{0.6}$	43.9 $\downarrow^{1.0}$
	$\tau = 2.0$	8.93 $\downarrow^{0.03}$	52.7 $\uparrow^{1.8}$	55.5 $\uparrow^{0.5}$	15.0 $\uparrow^{0.1}$	46.0 $\uparrow^{1.1}$
Criteria mix	$\tau = 2.0$	8.90 $\downarrow^{0.06}$	52.1 $\uparrow^{1.2}$	55.5 $\uparrow^{0.5}$	15.2 $\uparrow^{0.3}$	45.7 $\uparrow^{0.8}$
<i>Uniform +50% data</i>		8.46 $\downarrow^{0.50}$	52.9 $\uparrow^{2.0}$	57.0 $\uparrow^{2.0}$	15.9 $\uparrow^{1.0}$	46.8 $\uparrow^{1.9}$

- *Inverse sampling*: As a control study, we repeat the above procedure with transformed quality ratings $s_i \rightarrow -s_i$ to select the lowest-rated documents.
- *Criteria mix*: We explore the setting of merging the QuRating-sampled data for $\tau = 2.0$ for the four criteria, and subsampling it randomly to 30B tokens, while taking care to exclude duplicate documents.
- *DSIR*: We apply data selection with importance resampling (DSIR) (Xie et al., 2023b) and select examples that resemble either English Wikipedia or the Book domain (TogetherAI, 2023)—commonly used as proxies for quality (Brown et al., 2020; Touvron et al., 2023a; Xie et al., 2023b). We follow (Xie et al., 2023b) and train hashed bigram models on QuRatedPajama and the target data.
- *Perplexity Filtering*: We implement perplexity filtering (Wenzek et al., 2020; Marion et al., 2023) and select the documents with the lowest/highest perplexity scores, as computed by a pre-trained ShearedLlama-2.7B model (Xia et al., 2024)—2× the size of our QuRater model.

5.3. Results

We report perplexities and ICL results in of the models in Table 1 and the instruction following evaluation in Figure 3. In Appendix D, we provide comprehensive results for all models, namely, perplexity evaluation across domains in Table 8 and ICL results for individual tasks in Table 9.

Baselines underperform uniform selection. Surprisingly, DSIR (Xie et al., 2023b) and perplexity filtering perform worse than random uniform sampling in our experiments. The perplexity evaluation in Table 1 suggests that these method introduce substantial bias to the training data, and we observe that this does not translate to better ICL results.

Sampling is better than top- k selection. Selecting only the top- k documents for training a language model results in substantially worse perplexity, suggesting that the best-rated documents do not have good coverage of the overall text distribution. Our sampling strategy is effective at alleviating this, and increasing sample diversity further with a temperature of $\tau = 2.0$ improves perplexity over uniform sampling, despite the shift between the train and test distribution. In terms of in-context learning performance, top- k selection achieves strong performance gains on individual tasks, but there is always a task where it performs worse than uniform selection. In contrast, sampling results in more balanced results across tasks, leading to better or equal average performance compared to top- k selection.

Perplexity does not inform ICL performance. When varying the method for selecting training data, we cannot rely on perplexity as a proxy for model capabilities. For example, the *writing style* criterion yields the lowest perplexity, but surprisingly, only minor improvements in ICL performance. In Figure 6 in the appendix, we visualize the relationship across all tasks and models and observe no clear trends.

Educational value is the strongest criterion. Amongst our criteria, the models trained on texts with *educational value* exhibit the strongest gains on ICL, and with $\tau = 2.0$ improve upon uniform sampling in all of the 10 tasks. This model performs comparably to a uniform sampling baseline trained with +50% more data and compute, highlighting the impact of selecting high-quality data. It is also the only model that gives a clear win rate of 57.3% against the uniform model after instruction tuning in Figure 3.

Other criteria. We find that *Facts & trivia* and *required expertise* improve ICL performance on average, and provide promising gains in reading comprehension and world knowledge tasks, but perform worse at commonsense reasoning. In our control experiments, in which we sample from the lowest quality ratings, no criterion meaningfully improves overall ICL performance. However, selecting documents low in *facts & trivia* or *required expertise* benefits all 3 commonsense tasks, see Table 9 in the appendix.

Criteria mix. Mixing the selected subsets across criteria results in low perplexity and better average ICL performance than baselines, it does not outperform selection using only *educational value* or *facts & trivia*. This may be since 25% of the data is selected based on *writing style*, our worst performing criterion. We are optimistic that future work may find more effective ways of combining criteria.

5.4. Curriculum Learning

Setting. We train two additional models on the 30B token dataset created with uniform selection. However, we change the order in which samples are seen during training based on *required expertise*. Specifically, we use our sampling method (Section 4) with temperature $\tau = 2.0$, and train on data in the same order in which it was sampled (high \rightarrow low expertise), or in the reverse order (low \rightarrow high expertise). This explores whether quality ratings are useful in forming a curriculum without changing the set of training examples.

Results. The evaluation results for perplexity and ICL are included in the appendix in Tables 8 and 9 respectively. We find that, even when training on the same set of examples, quality ratings are still useful for improving performance, compared to training with a randomly permuted sample order. Both the curriculum of low-to-high expertise and its reverse improve average ICL performance by 0.6% and 0.5% respectively, with strong performance in different tasks. However, only the curriculum of increasing expertise improves perplexity on held-out data.

Figure 3. Instruction following win rates of models trained with QuRating ($\tau = 2.0$) vs. uniform data selection after instruction fine-tuning on 10K ShareGPT examples.

6. Analysis of Quality Ratings

Understanding the nature of quality ratings on such a vast amount and variety of data is challenging. We begin by studying the distribution of ratings across domains, as well as across unsupervised clusters when domains are too coarse. We then inspect raw documents across these distributions and discuss our observations. Lastly, we document the social, topical, and geographical biases of our approach by applying it to the AboutMe dataset (Lucy et al., 2024).

6.1. Distribution of Quality Ratings

We sample 1M sequences from QuRatedPajama and visualize the normalized quality ratings across the different RedPajama domains (TogetherAI, 2023). CommonCrawl and C4 constitute the majority of training data, but lack interpretable metadata. We therefore leverage techniques in unsupervised domain discovery. We follow Gururangan et al. (2023) and implement k -Means clustering with $k = 25$. We name the clusters by the most salient TF-IDF terms at the cluster centroids.

In Figure 4, we plot the distribution of quality ratings across Wikipedia, Book, StackExchange, Github and ArXiv domains. The results align with expectations: The Book domain has high ratings for *writing style*; a subset of Wikipedia is particularly rich in *facts & trivia*; ArXiv requires particularly high *expertise*. However, each domain contains a wide range of ratings, suggesting that it would be sub-optimal to select data by simply picking domains, e.g., all domains contribute towards the overall top 5% of documents in terms of *educational value*.

We visualize the quality ratings for Wikipedia documents across different languages in Figure 4, and notice that the quality ratings exhibit a bias towards English. Since we explicitly instruct GPT-3.5 to ignore language in its judgements in Section 3.2, this highlights the need for more sophisticated approaches to de-bias model judgements.

We visualize the distributions for the cluster in CommonCrawl and C4 in Figure 8 in the appendix. They are similarly encouraging, e.g., the clusters associated with *cells*,

Figure 4. Distribution of quality ratings, normalized for each criterion to have zero mean and unit standard deviation across the corpus.

protein, gene and energy, climate, species are rated highly on *required expertise, educational value, and facts & trivia*. Meanwhile, the *book, author* cluster tends to obtain high ratings in *writing style*. However, almost all clusters encompass a wide range of quality ratings.

Comparison to perplexity filtering. We compare sequence-level log-likelihood scores from Llama-2-7b (Touvron et al., 2023b) with the quality ratings across 1M training sequences and visualize the relationship in Figure 7 in the appendix. We observe that documents with low quality ratings have a wide range of likelihoods, and the Spearman correlation coefficient varies between 0.50 for *writing style* to -0.02 for *required expertise*. Therefore, QuRating is meaningfully different from selecting texts based on perplexity scores from a strong LLM (Marion et al., 2023).

6.2. Data Inspection

We study raw documents from each of the domains and clusters discussed in Section 6.1. We select training examples at the 5th, 30th, 70th and 95th percentile for each criterion, and feature random extracts in Appendix F without any cherry-picking. While this is a minute sliver of the training data, the documents still exhibit clear qualitative differences and we invite the reader to inspect them in the appendix.

Behavior on code. Table 14 shows text extracts at different quality percentiles for each of the four criteria on documents from Github. Although not designed for code, the quality ratings correlate with reasonable traits. We notice *writing style* and *facts & trivia* prefer code with comments and documentation; *required expertise* ranks a CSS stylesheet lowest and embedded system code highest. The document with the 95th percentile *educational value* rating is a markdown explaining Ruby string manipulation in Spanish. We also highlight that in the StackExchange domain (Table 13), the lower-ranked documents include convoluted stack traces, logs, XML, HTML, and CSS documents, while higher-ranked documents contain a mix of code and natural language.

Educational shortcut. We notice a potential shortcoming in the model’s understanding of the *educational value* criterion. Some highly-rated documents are *about* education-related topics (schools, universities, etc.) but not inherently educational; see Tables 28, 32 and 40. This may be remedied with a better prompt or a stronger judge like GPT-4.

6.3. Documenting Social Bias

We apply our data selection pipeline to the AboutMe dataset, (Lucy et al., 2024) which associates 10M webpages with geographic, topical, and social role metadata. Following a setting by the authors, we sample a 10% subset using QuRating with temperature $\tau = 2$. We calculate retention rates by measuring what fraction of the total pages associated with a topic cluster, social role, or geographical region are retained in the 10% selected subset, where a rate higher or lower than 10% means that the attribute is *amplified* or *suppressed*, respectively. We report the most amplified and suppressed topics, roles, and regions in Table 2.

Compared to prior data selection methods studied by Lucy et al. (2024), we find that the retention rates for QuRating are slightly more balanced. However, sampling is important: In Table 10 in the appendix, we show that the retention rates are far exacerbated in all categories when using top- k selection. Our results share some common trends with prior methods, e.g., topics related to shopping websites—*online, store* and *fashion, women, (brand)*—are among the most suppressed across all quality criteria; Lucy et al. (2024) make a similar observation.

We observe that the most amplified attributes reflect the quality criteria: Topics selected with high expertise (research, law, technology, medical, software) are indeed widely considered to require specialized knowledge. Roles associated with research are amplified when we sample based on *required expertise, facts & trivia, and educational value*; roles associated with art and writing are amplified if we use the *writing style* ratings. We observe that documents associated with conventionally female roles (*mommy, manicurist,*

Table 2. We select 10% of the webpages in the AboutMe dataset by sampling with different quality criteria and temperature $\tau = 2.0$. We report the categories that are most/least retained (amplified/suppressed) in the selected data and report their retention rates in %.

Abbreviations: tech. = technology | lang. pathologist = language pathologist | instruct. designer = instructional designer | Latin Am. & Carr. = Latin America & Caribbean | Sub-Sah. = Sub-Saharan

beauty therapist, quilter) are suppressed across the *facts & trivia* and *required expertise* methods. The roles of *youtuber* and *hacker* are suppressed when selecting for *writing style*, suggesting a bias against “internet” language, while documents linked with performing roles (*band, act, dj, drummer*) are suppressed when selecting for *educational value*. The geographical trends are less pronounced, but we observe that selection based on *writing style* exhibits a mild preference towards websites from Europe.

We agree with Lucy et al. (2024) and Dodge et al. (2021) that it is important to study the effect of data filtering on social and geographical representation. The impact on the resulting language models is not well documented yet, but may be understood in terms of representational and allocative harms (Barocas et al., 2017; Suresh & Guttag, 2021), and potential manifestations include stereotyping (Caliskan et al., 2017; Manzini et al., 2019; Tan & Celis, 2019; Abid et al., 2021), erasure (Dev et al., 2021), or simply a lack of performance in relevant tasks not considered in traditional benchmarks. We note that web-scraped datasets are already immensely skewed in terms of their social and geographical factors, e.g., by ease of internet access (Bender et al., 2021), and creating a taxonomy of social factors is difficult (Blodgett et al., 2020). Given the broad coverage of web-scale data and the wide range of LLM applications, the question of what would constitute a fair pre-training distribution remains important and up for debate.

7. Conclusion

Training corpora for state-of-the-art language models are becoming increasingly large, such that there are concerns that models may run out of data (Muennighoff et al., 2023). However, under resource constraints, selecting data with

QuRating is a promising avenue for improving language models. To facilitate further research, we release the pairwise judgements, the resulting QuRater model, the language model checkpoints and the annotated QuRatedPajama.

Limitations. We note several limitations of our work. QuRating relies on the ability of LLMs to discern text qualities, making it sensitive to biases and limitations of LLMs, and these are still not well understood. The difference between pairwise judgments and scoring individual texts will also vary across LLMs and prompts. Large-scale collection of human quality judgments is needed to better evaluate the robustness of automatic annotations. This will also elucidate the extent of subjective judgment in different qualities. Our paper finds certain social and linguistic biases in the quality ratings, and future work is necessary to study and reduce these biases during data selection, and to investigate the effect on the resulting language models. Finally, our experiments are at a relative small scale (1.3B parameters) and it is not certain whether results will transfer to larger models. We also note that that the best of our four quality criteria may not be optimal. However, QuRating remains a useful framework for exploring other notions of data quality.

Impact Statement

Language models are increasingly applied in real-world scenarios, and their behavior is inextricably linked to their training data. Data selection may help produce models at lower computational costs, reducing the environmental footprint of model training (Strubell et al., 2019; Lacoste et al., 2019; Patterson et al., 2021), and allowing organizations with relatively fewer resources to train stronger models. Our experiments are still expensive to reproduce, as each training run takes an equivalent of 200 NVIDIA H100 GPU

hours. By studying a set of intuitive qualities as the basis for data selection, our work also sheds light on the relationship between pre-training data and model capabilities.

A number of harmful behaviors of language models trained on large-scale web data are well documented, including exhibiting social biases (Nadeem et al., 2021; Abid et al., 2021) and producing toxic generations (Gehman et al., 2020). We study which social, linguistic, and geographical biases are inherent in our data selection method in Section 6.3 to promote transparency. Future research is necessary to study the effect of such biases. We recommend that in practice, QuRating should be combined with manual curation of certain languages and topics, and the resulting models should be carefully evaluated for biases before wider deployment. We also emphasize that the quality ratings do not measure the social or literary value of a text and should not be used for textual or demographic studies.

Acknowledgements

We thank Luca Soldaini for their generous insights about evaluating data decisions. We are grateful to Greg Durrett and members of the TAUR lab at UT Austin for noticing inconsistencies in the data presented in the first pre-print. We thank Mengzhou Xia and Tianyu Gao for their advice on experimental details. We also thank Carlos E. Jimenez, Tanya Goyal, Paul Röttger, Alexis Chevalier, Sanjeev Arora, Zirui Wang and Jiatong Yu for helpful discussions and feedback. We thank Shreyan Puri for contributing validation data. Finally, we thank the anonymous reviewers for their constructive feedback. This research is supported by Microsoft Azure credits through the “Accelerate Foundation Models Academic Research” Initiative. This research is also funded by the National Science Foundation (IIS-2211779).

A. Full Prompts

Our full prompt templates are shown below, where the criteria on the right are substituted for `{criterion}` on the left. We settled on these prompts via a heuristic and iterative process, in which we varied the prompt wording and observed trends on a few examples from SlimPajama (Soboleva et al., 2023). Throughout this project, we used GPT-3.5-turbo, as we decided that it was too expensive to collect large-scale annotations with GPT-4. We believe that future work should take a more principled approach and first curate a high-quality dataset for prompt refinement.

We observe better performance with a short and generic system response, namely `You are a helpful assistant.` than describing a personality with expert skills in all subjects. The effect of different personalities on the subjective judgements in our data selection method is an interesting avenue for future work.

To validate our prompts, we handpick 40 documents from the web that correspond to what we believe should be either highly and poorly rated documents for each criterion. Note that we do not use these data points for prompt refinement. We report the data sources of this dataset in Table 3 below. Our prompts achieve 97.6% agreement for *writing style*, 91.9% agreement on *facts & trivia*, 98.2% agreement for *educational value* and 98.5% agreement for *required expertise*.

We add additional instructions that the judgement should not be influenced by the languages present in the texts, the length of the texts—although for the final dataset we compare texts with the same number of tokens—and the order in which the texts are presented. However, these instructions do not suffice to overcome these biases. For example, we observe that GPT-3.5-turbo still exhibits positional bias.

Prompt Template	Writing Style
Compare two text excerpts and choose the text which <code>{criterion}</code>	has a more polished and beautiful writing style.
Facts & Trivia	Educational Value
Aspects that should NOT influence your judgement: 1. Which language the text is written in 2. The length of the text 3. The order in which the texts are presented	contains more facts and trivia. Prefer specific facts and obscure trivia over more common knowledge.
Required Expertise	
Note that the texts are cut off, so you have to infer their contexts. The texts might have similar quality, but you should still make a relative judgement and choose the label of the preferred text. [Option A] ... <code>{text_a}</code> ... [Option B] ... <code>{text_b}</code> ... Now you have to choose between either A or B. Respond only with a single word.	has more educational value, e.g., it includes clear explanations, step-by-step reasoning, or questions and answers.

Table 3. For each of our criteria, we curate 40 documents that exhibit particularly strong or weak qualities. We use this data for prompt tuning and validating model performance. This table gives a description of the sources of documents in this validation set. Examples with citations come from existing NLP datasets.

Criterion	Sources
Writing Style	<i>High</i> 11 featured Wikipedia articles, 10 fiction books, 8 academic papers, 6 famous speeches, 3 Supreme Court decisions, 2 Shakespeare texts
	<i>Low</i> 10 Yelp reviews (Zhang et al., 2015), 10 spam messages (Almeida & Hidalgo, 2012), 10 tables/lists, 5 Amazon product reviews, and 3 Enron spam e-mails (Metsis et al., 2006)
Facts & Trivia	<i>High</i> 21 niche Wikipedia articles, 12 fun fact lists, 7 IMDb trivia sections
	<i>Low</i> 15 Wikipedia summaries of Pixar movies, 15 books (Gao et al., 2020), 5 poems, 5 textbook explanations
Educational Value	<i>High</i> 13 Khan Academy explanations (across subjects), 8 science textbooks, 6 history textbooks, 5 high-level Wikipedia articles
	<i>Low</i> 10 Reality TV transcripts, 10 fantasy/sci-fi books, 10 niche Wikipedia articles, 7 gossip news posts, 3 obscure WikiHow articles
Required Expertise	<i>High</i> 15 Wikipedia articles, 12 technical academic papers, 9 advanced textbook excerpts, 4 patents/laws
	<i>Low</i> 10 WikiHow articles, 10 Children's books, 5 nursery rhymes, 5 miscellaneous how-to articles

Table 4. We handpick a list of 10 documents from various sources and present a ranking which, in the authors' view, reflect steady decreases in writing style, allowing us to test the nuance of LLM judgments.

Rank	Text	Description
1	Amory Blaine inherited from his mother every trait, except the stray inexpressible few, that made him worth while. His father, an ineffectual, inarticulate man with a taste for Byron and a habit of drowsing over the Encyclopedia Britannica, grew wealthy at thirty through the death of two elder brothers, successful Chicago brokers, and in the first flush of feeling that the world was his, went to Bar Harbor and met Beatrice O'Hara. In consequence, Stephen Blaine handed down to posterity his height of ...	F. Scott Fitzgerald's <i>This Side of Paradise</i>
2	Technologies for making and manipulating DNA have enabled advances in biology ever since the discovery of the DNA double helix. But introducing site-specific modifications in the genomes of cells and organisms remained elusive. Early approaches relied on the principle of site-specific recognition of DNA sequences by oligonucleotides, small molecules, or self-splicing introns. More recently, the site-directed zinc finger nucleases (ZFNs) and TAL effector nucleases (TALENs) using the principle of site-specific ...	CRISPR-Cas9 paper abstract (Doudna & Charpentier, 2014)
3	The winter of 1906-07 was the coldest in Alberta's history and was exacerbated by a shortage of coal. One cause of this shortage was the strained relationship between coal miners and mine operators in the province. At the beginning of April 1907, the Canada West Coal and Coke Company locked out the miners from its mine near Taber. The same company was also facing a work stoppage at its mine in the Crow's Nest Pass, where miners were refusing to sign a new contract. The problem spread until by April ...	featured Wikipedia article
4	On December 3, Venezuela held a controversial referendum over a claim to the oil-rich Essequibo region controlled by Guyana. That same day, the Vice President of Venezuela, Delcy Rodriguez, shared a video on X, formerly Twitter, showing a group of Indigenous people lowering a Guyanese flag and hoisting a Venezuelan flag in its stead over the territory, which is also known as Guayanese Essequiba. 'Glory to the brave people!' she wrote, which is the first line of the country's national anthem. The post came ...	Bellingcat news article (Ramalho, 2023)
5	The Godfather is one of the most praised movies in cinema history. It gives everything that critics and audiences alike ask for in movies. In my opinion it gets all the attention it gets for being one of, or the best movies ever. One of the best things The Godfather does is its incredible casting and its iconic performances from each and every one of its characters. The actors are so convincing that it won the movie several academy awards. It also jumpstarted several actors, acting careers, and gave an ...	IMDb movie review
6	The food is good, but not a great value. Up front, I will just say, do not waste your time getting traditional sushi here because tbh it's not really that much better. For example, we ordered some maki and nigiri and while it was good, it wasn't that much better than our fave sushi places. Instead, come here for their signature dishes and you'll probably be happier. We really enjoyed some of their signature dishes. We dined as a party of 4 and we had: Spicy edamame: tasty and spicy! Yellowtail ...	yelp restaurant review
7	My Father worked for a Forbes 500 company since the 70s. Moved up the ranks as a software engineer and management, has patents for the company that saved it millions of dollars. He's almost to pension age and suddenly HR starts making his life miserable. He noticed this trend was happening to some of his coworkers when they were getting close to age 60 as well. HR Lady calls him into the office and says that he was not punching in and out at the correct time. My Father, an engineer, is very very ...	reddit post
8	THE ADVENTURE OF LINA AND HER ADVENTUROUS DOG SHERU Lina was a normal girl like any girl. She lived in the hills. She went to the top of the hills and she looked behind a special bush under the rearest of pine trees. She saw many pines behind it, but when she moved the pines she found a large piece of paper in which something was written. Lina, Lina said her mother. GET UP!! You're late for school!! Oh mom!! B. QuRater Model

B.1. Judgment Dataset

We use GPT-3.5-turbo to generate 20 predictions of either “A” or “B” for a criterion and a pair of documents in either order. When we conducted this work, we did not have access to the logits of the model, and therefore reconstruct the model confidence through multiple generations. We prompt the LLM for each criterion separately, as we observed in our exploration that performance deteriorated when querying for all criteria together.

We also observe that GPT-3.5-turbo struggles to be decisive when queried with a pair of long documents, i.e., it reverts to choosing the document purely based on positional bias. We tackle this problem by only ranking pairs of short text snippets. Specifically, we randomly extract segments of n tokens (with respect to the Llama tokenizer (Touvron et al., 2023a)) for each pair, where n is chosen randomly according to $n \sim \text{Uniform}[256, 512]$ in half of cases and $n = 512$ otherwise.

Table 5 shows the statistics after querying with 250K pairs. Note that we only obtain judgements on the English subset of Wikipedia, instead of all the languages present in the Wikipedia split of RedPajama (TogetherAI, 2023). For a small subset of queries, we do not obtain predictions, as they are blocked by OpenAI and Azure content filters. The cost for creating this dataset was \$2820.

Figure 5 shows that while GPT-3.5-turbo predictions are all positively correlated, the Pearson correlation coefficients are less than 0.6, and therefore will differ on many documents. The correlations are typically in the range of 0.45-0.55, except between *required expertise* and *writing style*, which have a correlation of 0.29.

Figure 5. Pearson correlation coefficients between our criteria for predictions made by GPT-3.5-turbo.

Table 5. Statistics of the qualitative choices generated by GPT-3.5-turbo. While we query with 250K pairs, we do not obtain labels for a small subset due to OpenAI and Azure content filters. The confidence margin for a prediction between (t_A, t_B) is defined as $|p_A - p_B| = |2p_{B>A} - 1|$.

Table 6. We compare held-out accuracy of training a multi-task QuRater model vs. training separate QuRater models. The multi-task QuRater model is trained with separate prediction heads per criterion. We also show an ablation where we train the QuRater model from scratch instead of initializing with Sheared-Llama-1.3B (Xia et al., 2024). During the evaluation, we only predict on text pairs with confident judgement labels, i.e. a confidence (conf.) margin (defined as $|p_A - p_B| = |2p_{B>A} - 1|$) greater than 50% or 80%.

B.2. QuRater Training

We fine-tune QuRater models using Sheared-Llama-1.3B (Xia et al., 2024), a pruned version of Llama-2-7B (Touvron et al., 2023b). We add four linear regression heads to the transformer outputs at the last token of the sequence, which predict the quality ratings across the four criteria. This multi-task setup allows for fast inference of all criteria in one forward pass. We only train and evaluate on judgements that have a confidence margin of at least 50%, where the confidence margin is defined as $|p_A - p_B| = |2p_{B \succ A} - 1|$ for a prediction between (t_A, t_B) , since non-confident predictions contain little signal on data quality, and can be caused by GPT-3.5-turbo’s positional bias. Table 5 shows the effect of this filtering on dataset statistics. We use a random 10% of the dataset as a held-out validation split for early stopping and hyperparameter selection. For early stopping, we choose based on held-out accuracy averaged across all criteria.

We search over the following hyperparameter grid: learning rate $\in \{2 \times 10^{-5}, 5 \times 10^{-5}\}$, number of epochs $\in \{2, 4\}$, batch size of 512. Model selection is based on which model achieves the best validation examples on the criterion with lowest performance overall. The selected model was trained with a learning rate of 5×10^{-5} and is trained for 2 epochs.

In Table 6, we report accuracy on the validation set, as well on specially procured test sets of 1,428 pairs of texts from specific domains. We confirm that performance increases when evaluating only on confident GPT-3.5-turbo’s judgements, where *educational value* is the hardest category to predict. Finally, we compare to separately fine-tuned models and model trained from a random initialization. Multi-task fine-tuning usually gives comparable or better performance, and a pre-trained initialization helps substantially in this task.

C. Connection of Exponential Sampling to RLHF

In RLHF (Ouyang et al., 2022), a language model $p(y|x)$ is fine-tuned to produce outputs y given inputs x that maximize a reward $r(x, y)$ subject to a relaxed KL constraint with respect to a reference language model $p_{\text{ref}}(y|x)$,

$$p^*(y|x) = \arg \max_p \mathbb{E}_{y \sim p(\cdot|x)} \left[r(y) - \tau \log \frac{p(y|x)}{p_{\text{ref}}(y|x)} \right]$$

Typically, the rewards encourage the model to act in a helpful and harmless manner (Bai et al., 2022).

It can be shown that this admits the closed-form solution (Korbak et al., 2022b; Rafailov et al., 2023; Go et al., 2023; Korbak et al., 2022a)

$$p^*(y|x) = \frac{1}{Z(x)} p_{\text{ref}}(y|x) \exp \left(\frac{r(x, y)}{\tau} \right).$$

Consider the following setting: (1) we use the QuRater model $s(y)$ as reward model not conditioned on any user input, (2) the reference model is a language model $p_{\mathcal{D}}(y)$ pre-trained on a corpus \mathcal{D} . In that case, we write the optimal policy as:

$$p^*(y) = \frac{1}{Z} p_{\mathcal{D}}(y) \exp \left(\frac{s(y)}{\tau} \right).$$

We compare this optimal model with the model obtained from maximum log-likelihood optimization (i.e. language model training), where a document y is resampled with a probability $\propto \exp \left(\frac{s(y)}{\tau} \right)$. Let $\hat{p}_{\mathcal{D}}(y)$ be the underlying data distribution of the training corpus \mathcal{D} , resulting in the weighted cross-entropy objective,

$$\arg \max_p \sum_y \exp(s(y)/\tau) p_{\mathcal{D}}(y) \log p(y),$$

which in practice is approximated via MonteCarlo sampling and importance resampling with the exponential quality ratings. The optimal model to this objective is $\hat{p}_{\mathcal{D}}(y) \exp \left(\frac{s(y)}{\tau} \right)$. Assuming \mathcal{D} is large and $p_{\mathcal{D}}(y)$ approximates $\hat{p}_{\mathcal{D}}(y)$ sufficiently well, the maximum likelihood solution to the resampled distribution will approximate the optimal policy $p^*(y)$.

In summary, our sampling strategy is equivalent to (1) training a language model on the entire dataset, and then (2) using RLHF to guide the language model towards generating documents with higher quality ratings.

D. Experimental Details

Each data selection method retains the original domain proportions between the RedPajama subsets. Table 7 shows the domain statistics of the 260B QuRatedPajama, from which we select 30B tokens using different data selection methods. *QuRatedPajama* is a curated subset of *SlimPajama*, which is itself a subset of *RedPajama*. Both *SlimPajama* and *RedPajama* are released on HuggingFace under the Apache 2.0 License.

We use a global batch size of 2048 sequences and a learning rate of 5×10^{-4} with a cosine learning rate decay to 5×10^{-5} and a linear warmup for the first 5% of training steps. Each model is trained on 8x NVIDIA H100, which costs 200 GPU hours for 30B tokens. We use a weight decay of 0.1 and train with Adam (Kingma & Ba, 2015) with hyperparameters $\beta = (0.9, 0.95)$. We train a 1.3B parameter transformer model with RoPE embedding (Su et al., 2024) and SwiGLU activations (Shazeer, 2020).

In-context learning settings. We choose a different number of few-shot examples per task to ensure that all demonstrations fit within the context window of 1024 tokens. We use the following number of demonstrations (given in parentheses): ARC-easy (15), ARC-challenge (15), SciQA (2), LogiQA (2), BoolQ (0), HellaSwag (6), PIQA (6), WinoGrande (15), NQ (10), MMLU (10). We report accuracy for all tasks, except for NQ, where we report EM. When available, we use the normalized accuracy metric provided by lm-evaluation-harness.

Detailed results. We feature the full perplexity results in Table 8, including the perplexity for each of the RedPajama subsets. Table 9 contains the ICL performance for all models. The performance of the curriculum models is featured at the top of the tables. In Figure 6, we plot the relationship between perplexity and ICL task performance across models.

Figure 6. We plot the relationship between the perplexity results and in-context learning performance of models in Tables 8 and 9. While prior work has found perplexity to be a good predictor of downstream task performance when varying model parameters and number of training tokens (Xia et al., 2023; Du et al., 2024), we observe that this is not true when varying the training distribution.

Table 8. Held-out per-token perplexity per RedPajama domain between language models trained on 30B tokens from different data selection methods. We highlight the best result in each column (before rounding). *bottom-k* and *inv.* denote inverse sampling, in which we sample documents with the lowest quality ratings. Abbreviations: HellaSw. = HellaSwag, W.G. = WinoGrande, exp. = expertise.

E. Further Analysis of Quality Ratings

We provide further details of the quality ratings on a random subset of 1M sequences from the 260B QuRatedPajama dataset. Table 7 shows the domain constitution of this dataset.

Quality ratings across clusters. Figure 8 shows the distribution of ratings of the C4 and CommonCrawl subset of RedPajama. Since this subset contains diverse data, we visualize by performing unsupervised clustering of TF-IDF features. Our method follows Gururangan et al. (2023), including using whole-word tokenization with a special placeholder for numbers. However, we do not enforce an balanced cluster assignments during the k -Means clustering and use $k = 25$. The resulting proportions of examples per cluster are also shown in Figure 8.

Correlation with log-likelihood. In Figure 7, we show correlations between the quality ratings and log-likelihood scores assigned by Llama-2-7B (Touvron et al., 2023b). We observe no clear correlations, with the exception of *writing style*, which has a Spearman correlation coefficient of 0.50.

AboutMe analysis. In an additional experiment, we repeat the analysis from Section 6.3 with top- k selection ($\tau = 0$) in Table 10. While trends across categories are similar to selecting with $\tau = 2.0$ in Figure 2, the retention rates are far more extreme across clusters and social roles. This highlights that $\tau = 2.0$ improves sample diversity in practice, which empirically also results in improved downstream performance. In contrast, top- k selection has a far stronger tendency to select certain topics and qualities.

Figure 7. Correlations of quality ratings and negative log-likelihood scores by Llama-2-7B(Touvron et al., 2023b) over 1M training sequences. The negative log-likelihoods are averaged over the number of tokens, and are the logarithm of the perplexity score of a single sequence. We observe that perplexity scores are not good approximations for any quality criteria.

Figure 8. Distribution of normalized quality ratings over clusters of 760K CommonCrawl and C4 training sequences.

Table 10. We select the top 10% of the webpages in the AboutMe dataset according to different quality criteria (top- k selection). We report the categories that are most/least retained (amplified/suppressed) in the selected data, and report their retention rates in %.

F. Inspecting Raw Documents and Ratings

Finally, we present snippets from raw documents for the Wikipedia, Books, Stack Exchange, Github and ArXiv subsets of SlimPajama in Tables 11-15; and documents from the clusters for C4 and CommonCrawl in Tables 16-40. The documents are taken at the 5th, 30th, 70th and 95th percentiles of quality ratings shown in Figures 4 and 8, respectively. We believe it is important to give an unfiltered view of the training data, and therefore do not filter these documents.

A small number of documents contain potentially sensitive content.

Table 11. Raw training examples selected to have quality ratings at the 5th, 30th, 70th and 95th percentile within Wikipedia. For each criterion, the ratings are normalized to have zero mean and unit variance across the corpus and reflect the distributions in Figure 4.

5th percentile	30th percentile	70th percentile	95th percentile

... y + (x + y/4)O ₂ → xCO ₂ + (y/2)H ₂ O « Per exemple la combustió del propà és: « C ₃ H ₈ + 5O ₂ → 4H ₂ O + 3CO ₂ » Tipus de combustió: « D'acord amb com es produueixen les reaccions de combustió, aquelles poden ser de diferents tipus. » Combustió completa: té lloc quan les substàncies combustibles reaccionen fins al màxim grau possible d'oxidació. En aquest cas hi haurà presència de substàncies combustibles en els productes de la reacció. » Combustió incompleta: es produeix quan no s'arriba al grau màxim d'oxidació i hi ha presència de substàncies combustibles en els gasos de la reacció. » Combustió estequiomètrica o teòrica: és la combustió que es dóna a terme amb la quantitat mínima d'aire perquè no existeixin substàncies combustibles en els gasos de reacció. En aquest tipus de combustió no hi ha presència d'oxigen en els fums, a causa del fet que aquest s'ha emprat integralment en la reacció. » Combustió amb excés d'aire: és la reacció que es produeix amb una quantitat d'aire superior al mínim necessari. Quan s'utilitza un excés d'aire	... o piersze planowali zmniejszyć prawdopodobieństwo wojny oraz udział w niej swego regionu poprzez rozluźnienie więzów z Wielką Brytanią, tak by w czasie ewentualnego konfliktu zachować neutralność. Po drugie poprzez unie trzech dominów, stworzyć na tyle silny organizm polityczny, by móc się przeciwstawić aneksjom ciągającym amerykańskim. W daze dniu do unii odgrywała rolę także czynnik gospodarczy, a głównie projekt budowy Kolei Interkontynentalnej. Trzy dominia planowały zwolnianie konferencji w celu przedyskutowania ewentualnej unii. W latach 64 w okresie przygotowań do konferencji unijnej, d o nowej Szkoły przybyła delegacja Kanady, której liderem był Thomas D'Arcy McGee. Delegaci Kanady pozostały w Thailafoksie przez szereg dni wypełnionych piknikami, bankietami, krajoznawczymi wycieczkami i nieformalnymi rozmowami politycznymi. W czasie tego spotkania Kanadyjczyk przedstawił koncepcję szerokiej unii wszystkich dominów brytyjskich Ameryki Północnej. Propozycja spotkała się z ciepłym przyjęciem. Nawet Joseph Howe, później gorąco Otok leží ob Istrski obali zahodno od Fažane, od katere ga ločuje 2 km širok Fažanski kanal. O dale je oddaljen okoli 6 km. « Tako kot večinu ostalih Brionskih otokov jih bil tudi Veliki Brij i naseljen že v prazgodovini. Od leta 177 pr. n. št. je bil otok v posesti Rimjanov. V 1. stol. je na otoku nastalo več rimskih naselij: na mestu kjer stoji danasne naselja Brijun, v zalivu Dobrička in na griču Kolci. Po propadu rimskega imperija se na otoku menjajo različni lastniki. Od Benečanov je v 1893 otok kupil Meranski industrialec Kupelwieser in zgradi ekskluzivno letovišče s hoteli, kopališči, hipodromom, igrišča za golf in tenis, uređijo s parki in lovilišča za divje živali. Zgradili so dokler 80 km sprejalnih poti. Iz Fažane pa so pod m orjem napeljali vodovod. Pri načrtovanju ureditve je sodeloval tudi mikrobiolog Robert Koch. » V zalivu Verige na vzhodni obali so se ohranili ostanki razkošne rimske vila rustike, ki je bila zgrajena v 1. stol. Ostanki predstavljajo arhitektonski kompleks, ki se v dolžini enega kilometra razpotjet	... , on the east side of the Rock. » They fired their first shots in anger on 7 July 1940 and from then on they were often in action against Vichy French and Italian planes, engaging German planes later in the war. They shot down their first enemy aircraft on the night of 20 August 1940. The entry in the unit's War Diary reads as follows: « Early in 1944, the force was reconstituted under the Defence Force Ordinance 1943. The majority of volunteers were placed on the reserve list, with other sections disbanded. » Post war « On 30 August 1958, the permanent cadre and the reserve of the Gibraltar Defence Force was formed into the Gibraltar Regiment. The regiment then had a dual role, being organised as an infantry battalion with four rifle companies and an artillery troop manning the coastal guns. This organisation was to remain in force until 1971. With the departure of the last gun unit in 1958, the regiment was issued with four 25 pounder (88 mm) guns and took over the responsibilities of firing Royal Gun Salutes. » On 2

... свою плоть, мог обращаться столбом чёрного дыма и принимать облик других людей. (Он принимал облик Изабеллы, Кристиана Шепарда, Йеми, Плука Медузы, Джона Локка и Алекс) « Человек в черном пришел на берег у статуи, где в это время завтракал Джейкоб. Он увидел корабль на горизонте и скзал, что знает, что их привёл Джейкоб. Он сказал, что Джейкоб всё еще пытается доказать ему, что он не прав. Он приводит людей на остров, и всегда это кончается одним. Потом он спрашивает, знает ли Джейкоб, как сильно он хочет убить его. Получив утвердительный ответ, он говорит, что когданибудь он найдёт лазейку. После этого он уходит. (Инцидент). Когда а «Чёрная скала» потерпела крушение на острове, и капитан начал убивать	... bbey Show in the 1970s until the 1990s. Kelly played the part of a cultie, "Gobnait O'Lúnsá", the sketches typically started with the sound of him putting coins in an old freckle coin box, and when the phone rang and was answered, his words were, "Hello! Guess who? Is that you Nuala?" Kelly acted the part of an English BBC reporter interviewing rural inhabitants about local customs, such as watching bacon being sliced, or "ha-hoing" (shouting a rebel yell) competitions. The village was called Ballykilferret and described by the BBC man as being "the Republic of Eer-ah" (a mispronunciation of Eire). » « Music career » In 1982, Kelly released a single, "Christmas Countdown", a comedy monologue based on the Christmas song "The Twelve Days of Christmas" and credited to the pseudonym Gobnait O'Lúnsa. It reached number eight in the Irish Singles Chart in 1982, and peaked at number 26 in the UK Singles Chart and number 15 in Australia in 1984. » He performed the single live on Top of the Pops on 5 January of that year. The s	... hijo Absalón y fue posteriormente el instrumento para traer al rey Salomón al trono. Después de que se construyese el Primer Templo de Salomón en Jerusalén, Sadoc fue el primer Sumo sacerdote de Israel en servir allí. « El profeta Ezequiel ensalza a los hijos de Sadoc como acérrimos adversarios del paganismos durante la era del culto pagano, e indica su defensa de privilegios y deberes únicos en el futuro templo. » « Biblia » La Biblia de clara que Sadoc era descendiente patrilineal de El eazar, el hijo de Aarón el sumo sacerdote. El lina de Sadoc es presentado en la genealogía de Esdras (su descendiente) como de la novena generación de descendencia patrilineal directa de Fineas, el hijo de Eleazar. » « Por orden cronológico, Sadoc es mencionado por primera vez como apoyo de David en Hebrón. Durante la rebelión de Absalón, Sadoc es mencionado, cuando él y los levitas desearon acompañar al David en su huída para traer el Arca de la Alianza, pero el rey les ordenó quedarse en Jerusalén, donde le podrían hacer mejor servicio, de	... blast, and cold-blast. Both hot-blast and cold-blast designs are called tubular lanterns and are safer than dead-flame lamps, as tipping over a tubular lantern cuts off the oxygen flow to the burner and will extinguish the flame within seconds. » « The earliest portable kerosene "glass globe" lanterns, of the 1850s and 1860s, were of the dead-flame type, meaning that it had an open wick, but the airflow to the flame was strictly controlled in an upward motion by a combination of vents at the bottom of the burner and an open topped chimney. This had the effect of removing side-to-side draft and thus significantly reducing or even eliminating the flickering that can occur with an exposed flame. » « Later lanterns, such as the hot-blast and cold-blast lanterns, took this airflow control even further by partially or fully enclosing thewick in a "deflector" or "burner cone" and then channeling the air to be supplied for combustion at the wick while at the same time pre-heating the air for combustion. » « The hot-blast design, also kn

<p>... te nessuno utilizzerà o da cui nessuno trarrà profitto non sarebbe un atto umano; gli verrebbe a mancare l'«essenza», la dimensione spirituale , l'anima, la preghiera di accompagnamento (non ne cessariamente un mantra); ma potrebbe esprimere il desiderio di contribuire al benessere dei nostri vicini e alla felicità dei nostri simili, o un ideale che mira a migliorare la qualità della vita umana attorno a noi. Quando lo spirito di preghiera non permea l'azione, l'atto degenera a livello subitistico. ↗ Le pagine seguenti servono da introduzione alla vita di orazione, che per millenni ha nutrita una parte considerevole dell'umanità nella sua ricerca della felicità e del senso ultimato della vita. ↗ Due sono le pratiche che si potrebbero suggerire. Una è il silenzio e la calma totale, il vuoto e il nulla, l'eliminazione attiva di tutti gli ostacoli per lasciare che lo Spirito operi liberamente: è il cammino della libertà assoluta che implica persino la libertà dall'essere. Nessuna parola è ammessa in quanto altererebbe l'esperienza e</p>	<p>... stubbornly, and Talon forced the words out. "Have you never been proud of me? Did I never make a difference?" ↗ The older man's jaw tightened until it was a white line against his weathered complexion. Drovic could not afford either pride or the approval Talon sought. The goal, Drovic told himself harshly. In the end, it was the goal, not the men, that counted. But before Talon's icy gaze, Drovic suddenly felt old, as if the goal itself had worn thin. ↗ Talon gritted his teeth at the older man's silence. No pride in the weakling, he told himself. What had he expected? It struck him that surely there had been at least one healer willing to help a wounded man-healers had their own vows to save lives. So why had they been forced to heal him? Was it the side effects of the medicine? Was it more than a painkiller, more than a healing drug? Did Drovic hope it kept him subservient? Because the longer he had drunk that vile mix, the more he became impatient, enraged. It was only in the past few days, without the herbs, as the gray fog g</p>	<p>... Lou Gehrig, N.Y. .... « Push Ziggler! 7 » Find all posts by FordIa urusSH094 « That Don Guy » I wouldn't be surprised if the Money In The Bank winner ends up being either Cena or a surprise return by Batista (remember when everybody thought Daniel Bryan was leaving WW E?), who then decides, "I don't want the belt this way; I'll wait for Daniel Bryan to return, and the n cash in the briefcase." « What they should have done: have him hand over one of his two belts, the n, when he's better, they'll hang both belts over the ring and have a ladder match for the "unified" title (after which they can finally retire one of them - having both of them around is meaningless unless there's another split coming up). 8 » Find a ll posts by That Don Guy » I am hoping the days of a non-heel Cena winning the championship in any wa y at all are OVER. « Batista/Bryan could be good, as the "broken promises" relate to Batista not get ting the title at Wrestlemania. But if we are supp osedly moving to Brock/Bryan at Summerslam, we rea lly don't need Cena at all in the title picture. B	... e pens offered as a selection. I'm not looking for exact names so duplicating what I wrote as the name isn't required and having a typo won't disqualify you. Picking a Visioneer would disqualify you since there's no universe where that's a typo or a good choice. » 2. One entry per person. » 3. This is open internationally as long as USPS will ship there. Prizes will be declared as a gift but I am required to indicate a value. While this value wil l be relatively small you will be responsible for any customs fees or taxes. » 4. I can't (won't) replace any prizes that may be lost or delayed in tr ansit. I use the lowest cost method with no insurance and no tracking outside the US. After ma ny years of problem free shipping my recent histor y has some international deliveries taking over 30 days while touring the customs house in multiple countries only to be sent back. This applies to U.S winners too, but it's mainly been an issue internation ally. » 5. Please leave your email address in the appropriate comment field. It will not be made	... sturised. » Got any cuts on your hands? This 1 ovely soap is full of aloe so it'll speed up the r ecovery process and help avoid any nasty infection s from developing. » Most importantly, I like that this is a big bottle that lasts about 2-3 months b ased on a normal family (although what is normal r ight?). It means it's one thing of my list at the supermarket. Or two if you count the hand cream I don't need to buy. Or three because I also don't n eed to buy baby bath. I'm all about the thrifty b ying! » We all want to protect our baby's delicate skin from harsh chemicals; it's just what we do as mums right? We want nothing but the best. These ar e the five products that I've swapped into our bab y's routine which have been absolutely amazing . » Alo Vera Soap - Super gentle for all types of sensitive skin but especially good for babies. I j ust put a pump in the bath for lots of bubbly fun. It's got a nice, natural scent and gives baby bum that fresh baby smell. » Alo Vera Gelly - This on e has been absolutely amazing for teething! When b	... st as it is awkward to ask wealthy people why they need so much money, why they use their wealth poorly, and why they don't just get rid of it w hen they recognize that it is the cause of their u nappiness. - Anton Chekhov » Maybe that's what we look for in the people we love, the spark of unhappy ness we think we know how to extinguish. - Tom P errotta » I suddenly wondered whether Mother might not actually be happy now, whether the sensation o f happiness might not be something like faintly gl ittering gold sunken at the bottom of the river of sorrow. The feeling of that strange pale light wh en once on as exceeded all the bounds of unhappines s - if that can be called a sensation of happiness , the Emperor, my mother, and even I myself may be said to be happy now. - Osamu Dazai » For years of our lives the days pass waywardly, featureless, wi thout meaning, without particular happiness or unh appiness. Then, like turning over a tapestry when you have only known the back of it, there is spre ad of the pattern. - Jane Gardam » Today, I go east.

... o be able to grieve that, right? No, you can, that's okay. That's okay. It doesn't bother me, ri ght. I know how amazing my partner is for my girls and vice versa. But I also understand that as a pa rent, you have these visions of what your child's life is going to look like as an adult. And when i t doesn't turn out that way, and it almost never d oes, it is okay to grieve that vision. And I think the response I got was, it was incredible to me be cause it was so many people sent that post to thei r parents and said, "It's okay for you to grieve. A nd then those parents came back to me and were like, thank you because I needed that. Right. And the t was just that. I think that was a huge part of w hy we started that because the support group is th at we need those places. We need those places wher e we can feel that whole spectrum of emotion. » We absolutely do. In fact, I told, and one of the few things that I have let slip since the kids have co me out is, I think it was last weekend said, "You know, I'm sad. I'm never going to get a son- in- la	... et up. » It is apropos that I am especially grateful today, but I aim to cultivate an attitude o f gratitude daily. So for all of you reading this who have helped make this fall a little more bearable, thank you. » I know. This post is LONG overdu e. But I'm posting it anyway, because we have an aw ful lot to be thankful for, and because I think I 'll be glad we have a Thanksgiving 2015 post somed ay. » We spent Thanksgiving in Islip with Grammie's side of the family, a long-standing tradition for Will (and at this point, for me!), but a first f or Henry, Jack, and Sophie. This meant lots of fam ily, lots of food (though let's be honest, these k idos just ate mac 'n cheese like it was any other Thursday), and lots of fresh air and wide open spaces. With the weather as warm as it was, we took full advantage of the immediate access to the outdoors. How different from our city lives! » If you l ook closely, you'll see two kiddos running around on this glorious afternoon. The third one is in the bushes around the corner. I think they were play	... uch faster focusing and consistently sharp acr oss the entire aperture range which makes me think the smart money is on the SIGMA 50. I think the SI GMA 50 will hold its value much better and be a lens that works nicely with newer sensors in the fut ure, whereas I consider the 50mm f/1.4G to be a reasonable bargain alternative. 0800 series users sh ould probably for the SIGMA 50 as the superior resolution will no doubt be more noticeable. » It's impossible to do exact compares for the following due to different sensor sizes and focal lengths, bu t just for fun I included these comparisons I did for my own personal curiosity. I figured you might enjoy seeing these too, but strictly speaking these are apples to oranges comparisons. » As a lens, I think the Fujifilm 56mm f/1.2R is probably sharper but I think the sensor is superior on the 1D X. As a result, I don't think this lens compares as favorably as it would if I could do an apples to apples comparison of both lenses on the same camera body. It's clear the Fujifilm lens is just about as s	... ever seen. Cameron's camera captures the subtle structure of the thing with a naturalist's precision. Her up-close framing strips away context an d sense of scale; her high-speed film records more detail and clarity than the naked eye can see. The result is a defiantly alien beauty. This flower is a "floral" in name only. » That's just a sample of the powerful art you'll see here -- images beautif ul, tactile, weird, highly personal, fiercely obj ective, and occasionally disturbing. To make it even more disturbing, these images aren't first-generation photographs, drawings, paintings or assemblages. They're prints, although you'd never know it at a casual glance. What's going on? » On a technical level, it's easy to explain. » Chris Schumake r scanned in the original art at insanely high resolution, then generated large-scale prints on everything from paper to canvas to aluminum. Some pieces are screen-printed; others are continuous tone, giclée output. The images are so good, you have to wonder: Is it fine art on the walls, or high-tech

... deal. There's too many others. » Steven Butala : That only works for women. » Jill DeWitt: Oh. Well, then ask a woman. » Steven Butala: Men are hard wired to be distracted. » Steven Butala: I'll go ou t on a limb here. Here's my girl. » Steven Butala: I love her, and we have history. Oh, wait. The e's a girl over there? » Jill DeWitt: Do you really want to use this example? » Steven Butala: Wait a second. Wait a second. Look. I'm not saying I've e ver partaken in anything like that. » Steven Butala: I'm just saying. » Jill DeWitt: You don't have a better example. How about a boat? » Steven Butala: Yeah. A boat. There it is. » Jill DeWitt: Here's my beautiful boat. » Steven Butala: Boats are good. » Steven Butala: There's a bigger boat. » Jill DeWitt : ... 10 years younger. It looks an awful lot like my boat. » Steven Butala: That's a bigger, better, but younger version of the boat that I already hav e. » Jill DeWitt: But it's 10 years younger. Actual ly, it's the same boat 10 years younger. » Steven Butala: So what that it's more expensive. » Jill D	... 's performance in the Daytona 500, the meaning might just fit. In the final six laps of the race, Gordon made several moves to prey on leader Tony Stewart, and rob Budweiser nation of another Dayton a victory. Running in second as the laps wound down, Gordon had two options. He could stay in line and push Stewart to a victory. Or he could take his chances and pull out of line, hoping that his team mate back in fifth place could move up and help him. Nobody would have faulted Gordon for taking the safe road. After all, in a day that saw some dramatic wrecks, a runner-up finish would have been a f inish to start the new season. But this is Jeff Gord on... this is the Daytona 500... this is crunch time. There are no safe roads. » Gordon pulled out of line with six laps to go and immediately lost the runner-up spot to Kurt Busch. As expected, John on jumped to the outside to push Gordon. Dale Earnhardt Jr. drafted off Stewart and pulled high to move into the race lead. The crowd roared its approval. But Gordon's chess game wasn't over just yet.	... always encouraged them to take it into their teacher when school started. This made them so proud to have their teacher read it and give them a "GRE AT JOB" pat on the back. » Never leave home without them. Make sure it is not a messy snack. As a mom you want them to eat healthy stuff like carrots and celery, but we know that might be tough so limit their dry snack intake. Don't forget the drinks too. Keep them well fed and hydrated is key here. Also feed them healthy lunches too. » Always stop to burn energy. I know if you have a husband that likes to drive straight through this can be a problem, but honestly either you have a miserable trip or you stop to let them burn energy. Nice, clean a nd busy rest stops are the best of course. Some have play areas or find a corner with no traffic and let them run a little bit, of course with supervision. Take chalk and draw hopscotch or draw a circle and have them stay within that circle with a ball. Take their scooter along if they're old enough to ride one. » BE ACTIVE AND PLAY WITH THEM. » Kid	... abits are formed through the instances where you make a successful decision, which in turn become a more "natural instinct". Even if you make the wrong decision, you will still have a valuable learning experience. A bad choice will just open up the door for a better one. » Your library and books store probably have an entire section devoted to self-help. The best of these types of books can truly give you new advice and ideas that work for improving your specific life situations and challenges. » Many personal development books are poorly written, so pick one that has good reviews. » Try to be prepared to record your ideas no matter where you are. Pack some paper with you when you go out. If an idea grabs you while you are on the subway, write it down, then do something about it when inspiration strikes. » You should know the values that bear importance to you prior to planning a self improvement program. Focus on those areas first to make the positive changes that are most important to your happiness. Instead, focus on all that is important

ilk jugs, putting one in twice a day. They have done well with this, but I am concerned about thei r electrolytes too, so I will add the recipe. » tha nks Lisa! I had fans on all night along with adding electrolytes to the water. Counting down the day to cooler weather! » Lisa, you are a life saver. T hanks a bunch for this recipe-going now to make. » Thanks so much. I was paying a dollar per packet of electrolyte solution to mix with 1 gallon of wa ter. This will save me a lot of money. Just made a batch for them. » I'm wondering if the av-a-cl ic powder that I received with my baby chicks is something similar... it says it's a mix of vitamins a nd electrolytes so maybe I could use that as well? » THANK YOU for this recipe!!! and... for anyone else trying to keep chickens cool... we installed a \$ 25 misting system that we got from Tractor Supply. .. it only uses 0.9 gallons of water per hour, drops the temp by 15 to 20 degrees (we tested it with a thermometer) and the chickens LOVE it!!! The CAT S even lay under it!! it has proven to be a great	unity to re install the CV to fit employer and that job. Another thing concerning the existing job and also the employer info, if any, need to get mentioned. » Your CV gives a synopsis of everything you have to give an organization and that which you have. Make certain that there was. Even the CV allows one to center on the skills you might have developed in a lot of elements of one's life. » Make certain you are represented by the CV! Make certain your CV communicates that. It's quite important to organize your CV before you begin creating it. You also needs to mention that your CV and covering correspondence are all attached. Your CV is easy readable and to scan through'. CVs are designed to get an crowd that was specific. Deciding the appropriate CV out to highlight your abilities and experiences is vital. » Additionally, there certainly are a lot of all CVs utilized in the great bri tain now and despite it is correct that you find it possible to have distinct formats of CV, in addition you will need to take into account the form o	posted a message opining that the community could do better job of running a conference. Guido argued that the Python Software Foundation (PSF) would underwrite the event, we found a university venue to try and keep costs down, and started to ask for volunteers and speakers. PyCon was born. » At the second event I announced I would only chair on a more conference, and the community would have to find a replacement chair if the conferences were to continue. I didn't want PyCon to become one person's plaything. Happily someone did come forward, and now there are PyCons all over the world. I haven't missed a single PyCon US so far. It's a fun conference. » Many people like to say they are "giving something back to the community," which is fine if you have to take first. Personally I think paying it forward is a more viable way to ensure that open source initiatives succeed. Running the PSF is a great way contribute to the open source community, though it doesn't necessarily serve my financial interests best. » The first Linux distribution	interpreting his statements. » We can abstract from our values to principles, and so on, but what makes the difference between an instrumental value and a terminal value is that a terminal value is one that exists for its own sake. Inclusive genetic fitness does match that definition, because natural selection is a thing that slowly replaces things with lower inclusive genetic fitness with things with higher inclusive genetic fitness. This is what biologists mean by "maximize," and it's different from what numerical optimization / math people mean by "maximize." » Is it true that you are doing the most you can to maximize your inclusive genetic fitness (IGF)? No, you're clearly suboptimal. But it is clearly true that your ancestors reproduced, and thus your genes are a product of the evolution ary project to gradually replace lower IGF with higher IGF, and in that sense you are doing more on average to increase your IGF than the counterfactual you that do not exist because their ancestors failed to reproduce. That seems to be what Phil Go

Table 17. Raw training examples selected to have quality ratings at the 5th, 30th, 70th and 95th percentile within **CommonCrawl+C4 Cluster No. 2 (7.3%) government, people, said, state, social, country, rights**. For each criterion, the ratings are normalized to have zero mean and unit variance across the corpus and reflect the distributions in Figure 8.

... which is worse, that the attempted genocide of Native Americans would be considered a mere "in trusion" or that criticizing said genocide would be considered "made-up criticism." Oh, and also sl avery is totally made up. None of the Founding Fathers ever had any slaves. You could look it up! But don't. » R.I.P. Etta James » The legendary Ms Etta James went on to the great concert hall in the sky a couple days ago. » I saw her back in 1986 at th e San Francisco Blues Festival, and she would have torn the roof off the place, had the show been indoors. Buddy Guy and Junior Wells joined her backup band along with Ms Katie Webster on piano. It was such an amazing set that Albert King could not fol low her. My friend and I started heading for our car during his set. Later we felt shitty about it when we were informed that he was dying of cancer, which might have affected his performance. » Anywa y, Etta James was one of the greatest singers of a ll time. I don't know that anyone ever matched the sheer power of her voice. She will be missed. » Le	... but disagreed. » "Because these cuts have just been proposed, we haven't yet evaluated which steps we will take to deal with possible staff cuts," he said. » In response to whether he thought the cuts would affect the department's ability to provi de service, Wilbur answered, "Yes, that's why we will have to plead our case when our turn comes." He added that if the cuts do occur, the department will have to consider taking an engine company out of service or reducing fire prevention to cope with the reduced staff. » "On the issues of layoffs themselves, I clearly recognize the controversy the engender and the impact it has on our workforce," Cohen said. "With labor costs constituting over 70 percent of our budget, and equipment and supplies cut to the point that it is starting to get difficult for departments to perform their basic functions, we have little choice but to now look for savings in personnel." » However, layoffs are not the only measures being proposed to save money. The mayor, with the approval of the department heads,	... xity increases without warning, and it engulfs the world in dimensions not even comprehensible. How to design globalisation taking care of complexity is what innovation should be focusing on - therein lies the play - the globalisation, complexity an d innovation as the three-pronged world dimensions need to be taken care of simultaneously. » When Western countries (read US) forced India and other Asian countries to open their markets in the late 1980s and early 1990s, the West believed that they would get large markets for their products as well as cheap labour. They forced economies to open through multiple thrusts and forces that the so-called poor protected economies had no means to push back. The poor relented. In the 1990s, the opening up of the Indian economy was criticised and generated a feeling of fear of new products coming into India thus ending the so-called monopoly of existin g players in protected economy. » We are moving towards an uncertain, unstable and chaotic state of the world affairs with everyone having mistrust of	... nformation online, we fill out forms and turn them in to government agencies online. Therefore, the question of whether ADA requirements concernin g accessibility for people with disabilities might be applied to websites has been brought to the fore. » Generally, people with disabilities must have access to goods and services that are open to the public. People with disabilities have run into some barriers in terms of access to and usability of certain websites. » This is a sip-and-puff device, sometimes called a puff mouse, which allows a person with a disability to control computer interface screens by blowing and inhaling into the device. » Joeboone, Wikipedia. Some rights reserved. » ADA Compliance, Websites and Some Court Cases » Early court cases in which this issue was addressed brot decisions that stated that the ADA did not apply to websites. However, some advocacy groups soon brought cases to court and the tide began to turn. » In 2006, the National Federation of the Blind sued Target for having an inaccessible website. The

... osal to build up to 48 apartments in the subdivision. Apartment residents could not exceed certai n income requirements in order to rent there. » Kris Henry, a Waverly Pointe resident, told council members the proposals need to be stopped right now. » "Call it what it is," Henry said. "It's going to be people with income of \$25,000 paying rents o f \$500. Crime will go up. Drugs will go up in this community." » In early September, council members agreed to issue a letter of support for the developer to obtain tax credits on the low-income apartment complex. Overland Property Group submitted an application to the Kansas Department of Housing in August for tax credits to build up to 48 units in three apartment buildings in Gardner's Waverly Pointe subdivision in August. » Council's resolution of support does not guarantee that revisions to Waverly Pointe's preliminary development, which includes a Home Owners Association requiring that subdivision owners occupy their property, would be app roved by the council or by the planning commission	... And we did say that up front and at the time. » Question: Yes. » Deputy Spokesman: It remains to be seen what evidence they can collect, but we'll keep in touch with them to try and get whatever information they have to make sure that they are able to look thoroughly at this. And of course, what that means is that they need to have access to all the information that they can get hold of in order to make a reasoned judgment about what actually happened in Tabit. Yes? » Question: I just wanted to ask yesterday about the announcement of the Board of Inquiry, described as an internal and independent UN Headquarters Board of Inquiry. By internal, how much of this report is going to be public? That's my question. I have a couple other questions on reports, but can you say what "internal" means? » Deputy Spokesman: As with all United Nations boards of inquiry, the Board's report will be an internal document of the organization and not for public release. However, the Secretary-General intends to make publicly available a summary of its findin	... le-class mediocrity, has been great indeed! Good Lord! Sacrosanct property has been attacked. Th e quivering bourgeois must have visions of looting and riot flashing before their eyes: all because the demonstrations of hate by those who own nothing against a recuperator such as Jacob have ceased. T he prejudices that underpinned the old authoritarian society have melted away. Which just goes to show that our propaganda is on the right track! The n he takes the jury to task: 'Sometimes, doctors' certificates are convenient.' He breaks down by profession... each profession accompanied by some epithet of his own devising... the 'panel list' from which Jacob's jurors have been chosen by lot. There is among them, he notes, 'not one worker, not on peasant, not a single proletarian'. How come? Because if justice was just and were Jacob's jury made up of twelve workers, he would necessarily have been acquitted! What, then, is the difference between the judges and the judged? It is that the thisives are not the ones that are believed to be so!	... the mid-1960s. In this model politics establishes broad plans for the administration, and the administration, deploying its own separate ratio nality of decision-making, gives a universalisable legal form to these plans. (King & Thornhill 2003, 87.) » officials. They should not be seen here as 'persons' but as 'carriers' of political communication. "They are the result of office-holding and/or political behaviour", or, "they are political data and decision premises in the offices they exercise" (Luhmann 1990, 61). » Second, I shall give an overview of the relation between the public and politics. It is well known that in democracy the needs and interests of the public have an influence on the themes or binding decisions of the political system. The public can influence the binding decisions through public opinion and mass media, which are the structural couplings between the public and politics. In democratic societies mass media play an important role in representing the public opinion. They also produce topics

Table 18. During his stay in China, Semallé wrote four years in Beijing, in which he writes about his journeys, his missions in the South of China or the numerous incursions in Tonkin. The works of art he brings back with him to France comprise important pieces, including this tuning bell. » This Imperial bell, called bianzhong is, in many ways, exceptional. The magnificent and highly detailed chiseling of the bell speaks for itself: this bianzhong is truly a superb example of Kangxi refinement. A twofaced dragon stands on top of the bell, its muscular body firmly standing on clawed legs, used to hang the bell from the wooden frame. The body of the bell is divided in three registers: the upper one holds a pattern of stylized clouds, so does the lower one, with added perfectly round medallions, where the bell is hit to produce the sound. In between, the dragon's body chases the pearl among swirls of clouds unfurled, revealing glistening scales chiseled to perfection. » Bianzhong bells are grouped as carillons.</p>

Adelicia's Odyssey through wartime Dixie is the stuff of legends. » However, beautiful Adelicia did not long remain a widow. She remarried, this time to a far wealthier man, Joseph Acosta, who owned large and profitable plantations on the lower Mississippi, all of which produced bountiful crops of cotton. » In due course, Adelicia bore Joseph a bountiful crop of several more children and he in turn built her the magnificent Italianate mansion of Belmont. Sitting on a long sloping hill, one approached Belmont in the old days as if one were ascending Mount Olympus to visit the gods. Downton Abbey would have been a pauper's hut compared to Belmont in its heyday. All went well, until the War. » Belmont Mansion's modest back yard, ca. 1863. » In February, 1862, Nashville fell to the invading Yankee hordes and the miles between the Rock City and the Acklen cotton plantations in Louisiana were long indeed; for most of the war the area between the two was a no man's land in which</p>	<p>... nth through the seventeenth centuries. » Religious scholars, both Jewish and Christian, and European architects, continuously sought to reconstruct an "authentic" image of the ancient city and Temple in order to better understand the biblical events of the past. Many subsequent works of architecture such as churches and synagogues, including the Sistine Chapel, were inspired by the desire to re-create Solomon's Temple. Early modern artists often depicted the Holy Land and the Temple of Jerusalem in the backgrounds of paintings and prints portraying biblical subjects. Moreover, Christians, Jews, and Muslims embarked upon pilgrimages to Jerusalem to renew their faith. In fulfillment of envisioned events of the End of Days, Christians, Jews, and Muslims focused upon Jerusalem as the site for these mystical events. European travelers were attracted by the exotic landscape and people of the region in the eighteenth and nineteenth centuries, and Jewish settlers of the early 20th century viewed Palestine as an ancient homeland of refuge</p>

... healthcare business. And then on the positive side too, the other piece I would throw out is as the economy moves to a digital-first, thinking about how we play in our semiconductor space, data centers, factory automation is another area of strength that has helped us and through COVID. « Got that. And then as a follow-up, when I looked at the guidance that you had given or the framework for the third quarter, and you came in pretty darn close to -- and actually above on revenues and above on margins. What might be the prospects for restoring guidance? I know you've given our framework for Q4. But just if you -- in the position we are pretty darn close at this stage, when might guidance be restored? And when might you restore buybacks? I mean, you commented on disciplined capital allocation, but you had really good cash flow. « You paid down debt, when might buybacks be restored? Thanks. « Yeah Dean, maybe I'll take the first part of that and just talk about how we think about guidance. And as we went through Q3 and got halfway throu	... ties independently as well as in different projects with the government. These organizations has also implemented social accountability standard (ISO-26000). Thus employee at managerial or supervisory level is considered as a unit of analysis for this study. This study used survey based methodology and a questionnaire was developed after a comprehensive review of literature. CSR items are taken as independent variables and financial performance as dependent variable. Data was collected using questionnaire and distributed to the respondent, however, a formal permission was taken through HR department of each organization before conducting the survey. A stratified random sampling technique was used to reduce the common bias in the data. « Questionnaire for this study consists of two sections; first section was about the general information about the respondent and the second section is to inquire respondent perceptions about the CSR items and its impact on the dependent variables. This study was based on employees experience and their exp	... arily until most currencies were sold and the entire market got into a slump. « However, after reaching its pinnacle in January 2018, the market crashed and has since been dwindling. In Televisor y's earlier blog, Blockchain, an emerging concept, a disruptive technology, we tried to explain the evolution of cryptocurrency and its technical know how. In this blog, Televisor attempted to understand the volatility in its prices. Over the last 24 hours, Ether, the currency for the Ethereum network, went from ₹1,09,964 to ₹1,11,465, with a market cap of ₹13.7T. « So far, professional investors say they would actually welcome new regulations - as long as they are not too stringent. But Gensler has called on Congress to give regulators the authority to write new rules. "In the absence of, you know, definitive regulation that applies to crypto assets, we work with them to craft policies, procedures, and processes," she says. « One of the oldest cryptocurrencies had forked from Bitcoin in 2017. By major market parameters, Bitcoin Cash has al	... ise division between the first and second tier economies is somewhat discretionary, but in genera l, the First Tier Markets are fully compliant with both the Accord on Trade and the Common Economic Protocol, and have a higher per-capita income than the Second Tier Markets. « The Emerging Markets are late industrial era or early information era sra yric economies, in which material goods retain high production costs, but where nonetheless the information and service economy is a significant fact or and early agamic features may be present. « Th e Emerged are those economies prior to the late industrial era, often non-agorist in operation, in which the primary activities are the production of material goods and resource extraction. (These overlap heavily with the Forgotten Worlds.) Since the main potential value is found in material production, raw resources, and inexpensive labor, all of which are obtainable in more developed economies through cornucopia technology and robotization a t less expense, they have little to offer the Core

However, the OIG called for the Global Fund to develop a longer term strategy to tackle the three diseases beyond 2016, including a more coordinated approach with other donors and health service providers in the country. The Global Fund Secretariat, working with country partners, has agreed to a number of corrective actions. « Kenya, with approximately 5% of the global HIV/AIDS disease burden as well as substantial shares of the malaria and tuberculosis (TB) epidemics, has made good progress in reducing	st-earning, they would have a market value - the present value of the capital inflows (interest received) - which can be capped at 50 years, et cetera, or issued as interest-paying in perpetuity. However, an argument may arise regarding the viability of the repayment of these inflows, which may be considered as debt. « However, classifying these inflows as debt wouldn't be accurate. This money collected from individuals and businesses would, in conjunction with the primary amount of the fund, be injected into the economy and the economic agents that receive payments from the SWF, or the equity that the SWF buys would be assets held by the SWF, a portion of which would be used to pay the businesses and individuals that provide the inflows to the SWF. Therefore, the inflows for the providers of inflows should be considered as equity held by the SWF, with the SWF acting as an intermediary. « The SWF would issue debt and acquire equity based on the inflows it receives, those that provide the inflows, if we bypass the middle entity the SWF

The computer controlled video display system includes a Z-buffer for storing Z values and a frame buffer for storing pixel values. The Z-buffer has a single, bi-directional data port which is coupled to a graphics update controller which is substantially similar to the prior art graphics update controller. The frame buffer may be a single port random access memory or a dual port random access memory. « The method of the invention for updating the Z-buffer with new Z values to replace the old Z values begins with the calculation of a new Z value and a new pixel value for each pixel location in a plural ... ual sources observed. « The observations were arranged in duty cycles. Each duty cycle covered a subset of two to four close-by sources (with integration times between 30 and 60 s in each source pointing), in a similar way as the duty cycles described in Paper III. The duty cycles were designed to maximize the antenna elevations, which optimize the quality of the differential phase delays. We show in Fig. 1 the time distribution of all the observations. The frequency-switching changes were applied in two types of duty cycles, which were alternated every four iterations. In the first type of cycle (optimized for the frequency-switching calibration, see Sect. 3.2), half of the switchings were applied while the antennas were slewing among sources. If AL and AH are observations of source A at 14.4 GHz and 43.1 GHz, respectively, the duty cycles were arranged as This approach saves some time due to switching. In the second type of duty cycle, observations of different sources at the highest frequencies were put close in time: This approach ... « To travel a certain distance you must first traverse half of it. « Makes perfect sense. Two is one plus one. And one is one-half plus one-half. But don't be fooled by this seemingly innocent reasoning: it's a trap! (Admiral Ackbar!) « To appreciate what's going on-and connect Zeno's paradox back to calculus-let's pretend Zeno is in line at Starbucks, two feet away from the cash register. He's almost done scanning the menu when the barista yells out "next!" And that's when poor Zeno panics. He must now walk two feet, but because of his mind set, he walks only half that distance with his first step. He then walks half of the remaining distance with his second step. (Can you imagine how annoying those in line behind him are getting?) The figure below keeps track of the total distance d Zeno has walked and the change in distance Δd after each of his steps. « Fig. 1: Zeno trying to walk a distance of 2 feet by traversing half the remaining distance with each step. (Reprinted, with permission, from Calculus Simplified.) « Here's a tabu

The property that $\langle M^2 \rangle = \langle J \rangle$, along with special properties of $\langle J \rangle$, allows you to conclude that higher powers of $\langle M \rangle$ are all just multiples of $\langle J \rangle$; in particular, examining $\langle M^3 \rangle = \langle M \rangle \langle M \rangle \langle M \rangle$ reveals that every node in the graph has the same number of neighbors $\langle k \rangle$. So $\langle M^3 \rangle = \langle k \rangle \langle J \rangle$. (And $\langle k^2 \rangle = n$) because $\langle k^2 \rangle$ is the number of two-step paths, which lead uniquely to each node in the graph.) Notice that because of this neighborhood property, $\langle M \rangle$ sends a column vector of all 1's to a column vector of all k 's, so $\langle M \rangle$ has an eigenvalue $\langle k \rangle$. Based on the powers of $\langle M \rangle$, $\langle M \rangle$ furthermore has $\langle (n-1) \rangle$ generalized eigenvectors with eigenvalue zero. There are always exactly $\langle n \rangle$ independent generalized eigenvalues, and we've just found all of them. Their sum is $\langle 0+0+ \dots +0+k \rangle = k$, which establishes the result. « The same procedure establishes a more general result: If there's a unique r -step path between every pair of nodes in a graph, then every node has $\langle k \rangle$

<p>... m like we were the ones who made the mistake, not the kitchen. A simple dinner that should have taken an hour turned into almost two hours while we all sat there with empty water glasses put in the far corner of a quiet restaurant. At one point a gentleman in a suit - presumably a manager? he did not really introduce himself - came over to hear what things were and when we explained, he said "oh okay we'll take care of that" - well we sat there for another 20 mins or so waiting for the check expecting our apps to be comped or something but received absolutely nothing. No offense but for \$140 bill without tip - there are A LOT of better places our money could have been spent - this place won't receive a dime of business again. + My family and I had a great time there. + I would recommend Redstone to my friends. + Waitress was nice. Food was horrible.. very disappointed. The manager did not even offer to accommodate us given the food issues. Will not visit this location again. + Redstone is always good, but they outdid themselves this tim</p>	<p>... turned our experience around dramatically. In the end, I had a good time. Pro-tip: Each table seats 6, and they pair up their tables with very little space in between, so even though our party was split into two separate tables, we felt like we're sitting at the same one. They did put our order on separate tabs, though: one per table. + The food: pretty delicious. Unlike other Korean BBQ places, the sides were already served, meaning we sat down to a full table. I was a little overwhelmed at first, a bit confused by what all the dishes were, but our placemats had instructions, and so by process of elimination, I was able to figure out which dishes held items meant to be consumed with the meat, and which were meant as sides that could be eaten separately. Another A+ for thoughtfulness. + It was also pretty different that the grill had a little moat where the warm sides - eggs and corn with cheese - could be cooked and kept warm. The cold sides included kimchi, pickled radish soup, pickled radish, tofu, and salad. The salad, acc</p>	<p>... team behind the garden labelled it "a sculptural art installation, not constrained by the rigours of season, climate or geography". The models were made by hundreds of volunteers including school children, war veterans and professional model makers. + I can't decide whether I think it's a clever piece of art designed to highlight gardening for all age groups or a stunt to gain publicity for May's new television show about children's favorite toys. The question that sticks in my mind, is how it could be judged as a garden if it contained no real plants? The Chelsea judges obviously knew they couldn't judge it as a normal garden and therefore it was awarded a plasticine medal instead. + While I'm sure there are many true gardeners whose distaste for the garden will linger long after the plasticine has melted. The people have spoken and voted for it in their thousands. It has gained the much coveted Peoples Choice Award for small gardens. + These little pretty little flowers appear quintessentially British. Although most speci</p>	<p>... n cores, address environmental concerns, and preserve history - all of which help to redefine the post-industrial city (Lourès, 2015). + One of the earliest precedents of a post-industrial landscape is Parc des Buttes-Chaumont in Paris. The project was initiated by Napoléon III, who wished to clean up the slums and bring "green lungs" to produce healthy air for the city and improve the aesthetics and image of Paris. Designer Jean-Charles Alphand transformed the site of an old refuse dump and quarry site within the new industrial area of the 19th arrondissement, into Parc des Buttes-Chaumont (Komara, 2013). The design of the park engaged new construction techniques and new materials, such as irrigation systems, hydraulic pumps, tree-planting machinery, new uses of concrete, and more. Alphand played along with the theme of the Exposition Universelle, which was Industry, in the idea that some things found in nature look artificial, but what's new looks organic (Komara, 2013). + After World War II, the industrial city shifted</p>

Free for zoo members, sunset at the Zoo offers a rare chance to enjoy the zoo in the beautiful twilight hours of summer. Paired with a variety of al fresco dining opportunities, live music and activities for kids, sunset evenings also give visitors the chance to get to know animals that are more active at dusk. Sunset at the Zoo events take place every other Wednesday, sta</p>	<p>... d with. + Upon arrival, I couldn't help but notice a few things that were unique about our experience here compared to other Asian ports. There was the usual long queue of people waiting for passport control and customs. But instead of standing in the morning sun, we enjoyed the shade of long, covered breezeways. We were processed quickly and courteously, such was the thoughtfulness of our Japanese hosts. Also, when we left port, a group of well-wishers stood on the dock and bade us goodbye. + My first destination was the Glover Garden and Glover Residence. Thomas Blake Glover was a Scottish merchant, and his house is an interesting mixture of Western and Japanese design and construction. Flowers, a koi pond, and statues of Puccini and Miyako Tamaki (a famous Japanese opera singer who performed in "Madama Butterfly") decorate the grounds. + We were lucky to see some flowering cherry Sakura as well. The residence and garden are located on a hill overlooking the harbor. It was not distant from the harbor, but we had to climb steps and</p>

I'm not joking about that either. » The U.S. Women didn't choke. » (I mean did you watch the game? Japan never died. They kept fighting back and took advantage of the opportunities that were given to them.</p>	<p>... gainst Florida on only one attempt. » Also, I would say that losing 70-19 is better than losing 56-6. My reasoning is as follows: Florida outscored South Carolina by more than a 9:1 ratio, but only outscored The Citadel by a little more than a 3:6-1 ratio. Advantage, Bulldogs. » The good side? The basketball game also went about as expected, and this was a good thing. The Citadel was never threatened by Cincinnati Christian and pulled away down the stretch for a convincing victory. CCU had no answer for Cameron Wells, who had a good game not only on the stat sheet, but in terms of letting the game come to him. Zach Urbanus had a strong first half and a solid overall game. The Bulldogs did a good job in this game of getting to the foul line and converting. Getting their fair share of free throw attempts has to be a priority for the Bulldogs, especially when shooting foul shots is one of The Citadel's strengths. » Speaking of that, Phillip Pandak got into the game late, and was almost immediately fouled. I was rooting for him to mak</p>	<p>... h praise, I guess, from a seasoned veteran such as The Bont, accumulator of 56 games now, and all of 20 years old. » The Bont had 19 disposals. Not many by his peerless standards, yet to my mind he was, if not the best, the most influential player on the ground. » There was a wonderful moment, right in front of where the Tragician Tribe sit. Fido ritto had the ball, close to the boundary, and tried to launch a booming kick out of the danger zone of our forward line. But The Bont was right there, and with an athletic leap and full deployment of those "go-go-gadget" arms, spoilt the kick and forced it out of bounds. » Spud looked crestfallen. And The Bont's reaction, visible only to us facing the two players, was a sight to behold. There was jubilation, and a full and utter appreciation of everything the moment meant. » And there was a touch of facial expression, the one that generations of mothers have threatened to wipe off their children's faces. » A smirk. » And among all the sublime and audacious things The Bont did that day,</p>	<p>... s arrival in the Welsh capital and then Maeterlinck's honour led to an unknown Cardiff City supplier deciding to call the team, resplendent in their blue strip, 'The Blue Birds'. Gradually, it emerged as the favoured nickname before being adopted officially by the club. » At the time Cardiff City appeared in their first FA Cup final in 1925 and took the FA Cup out of England for the first and only time in 1927 the club sported the coat of arms of the city on their emblem. These arms were granted on 26 August 1906. The shield of the arms bears a red dragon, the national symbol of Wales. The dragon symbol has been in practically continuous use since the Romans brought it to Britain. When Rome withdrew her troops the dragon remained as the symbol of authority and unity among the Romanized Britons and became their standard in the wars against the invading Angles and Saxons. It was from this emblem the war-leader would take the name Pendragon, and would particularly be associated with the semi-mythical King Arthur. To this day the red d</p>

<p>... ologise, grovel, whatever it takes." » Jason's stern gaze pierced her soul. "It must be sincere o r he won't accept it." He leaned back in the chair , crossing his arms, appearing extremely forbidding. She actually shivered. » "Don't worry, he will believe me. I promise." She assured him. » "I have also summoned Anna and Karen via email to be at my office at 9 o'clock sharp. I intend giving them both a severe verbal warning and a disciplinary on their record." » He noted Alicia's satisfied expression. » "However, I will be asking you to join us at 9:30 to apologise for what you did to them." » Her mouth dropped open and she gasped. "No, Jason, don't make me do that, please." She pleaded with her eyes as well as her words. » "That is only fair , Alicia. You don't want to fuel their accusations with favouritism, do you? And I expect you to reimburse Anna for her tyres. They need to know that you have been punished for your part in this fiasco ." » He was adamant and she knew better than to argue, especially now that there were consequences.</p>	<p>... nce McMahon wouldn't allow it until he got into an angle with Jerry Lawler, which led to him being at the announcers table. » "[Vince] didn't want me to talk," Taz revealed. "I didn't get on the mic and believe me, I had some pretty good promo work at ECW and I had my catchphrase 'beat me if you can, survive if I let you' and he didn't care. He kind of wanted to re-brand me. And they don't tell you that. You kind of have to figure that out on your own. So fast forward a little bit, maybe a year or so, year and a half, I got into an angle with JR [Jim Ross] and that was at the Garden where I got verbal with JR and cut a promo on JR. Then they had Jerry Lawler punch me and he knocks me on my ass. I get into a big pull apart with King and me and King gets into this angle for a couple weeks . Well, that angle is what put me at the announce desk because they had me take out Lawler before Smackdown, or something like that, and I sat next to Michael Cole. I was supposed to sit there for a segment and then Jerry Lawler was supposed to attack</p>	<p>... but still present, heart churning. You watch the organ thrrob from underneath the holes in the lung – it's just begging to escape. It would be so easy to reach in and take it, and you would if it could save your sister. She's nearly at the top of the donor waiting list. » Distracted, you look back at the black burnt rubber on the pavement leading up to impact. Your hands go through the motions of saving her; it's second nature at this point, but when everything happens at this speed it's easy to get left behind, so you refocus. Saving lives is your job. » The left side of the girl's face is only halfway there, almost as charred as her arm, which sports a new unnatural angle thanks to an sheathed bone. When she was thrown from her seat she must've turned slightly for her fatal surf along the cement. This isn't anyone's first call; you're all veterans who have seen every horror imagined before. Knowing when people will live or die comes with the territory. This girl will die. She will not live long enough to see the hospital. Your</p>	<p>... ay around the lavaflows. The sewage system's lack of life had her thoroughly confused. Even back home, where there was technology aplenty, the underground waterways were flooded, not just with waste e, but also with monsters. Their unsanitary conditions provided the perfect nesting grounds for parasites, slimes, gorgches, and other incarnations of filth. » By contrast, Borrok Peak's sewers were empty, devoid of both excrement and the life it attracted. Anything that was discarded was incinerated the moment it reached the pipe's bottom. The environment served as the perfect disposal system, so long as the people inhabiting it didn't mind the constant threat of a society-ending eruption. The pipes, the vessels used to transport the borroks' waste, could just as easily serve to carry magma up into the city. » Staring at the plumbing, the half-breed wandered around until she stumbled across a landmark. She realised, as she neared the lava chamber's center, that not all the tubes were open. The ones directly above the largest pit were shut off</p>

<p>... r, run along to fetch me some clothes." » That shut him up even if he remained facing her. "Xfine wfikagdolps!" He spoke to her in a guttural tongue that sent shivers dancing along her skin. » She ignored how his voice affected her and concentrated on the fact she didn't understand a damned thing he said. "I don't know what the hell you just said , so do you want to try again in English instead o f whatever alien language you're using." She tapped a bare foot as she glared at him imperiously—naked or not, she refused to show fear even if it inside , she quivered at the situation. » He snarled some foreign words before throwing something at her and stalking out of the room. Fabric hit her as she watched in stunned amazement how the previously unseen door just slid across the opening, leaving the wall seamless again. » Unsure of when the annoyed alien freak would return, she scrambled to get into the clothes, his tunic shirt that hung to her knees and pants that hugged her rounded ass but we</p>	<p>... more fishy goodness from that red bucket in front of me. » I fished out the second fish (see what I did there?) and focused on making a better throw of it this time. I'd noticed that the Keeper had cracked them higher up on the rocks so that Huds on would have to climb up to get them, and thus be exposed to more people than he was down by the edge of the pool. So I heaved the fish treat and managed to get it up a couple of levels, which was a couple of levels higher than the first throw - not too shabby! » Pleased with myself, I pulled out the third and final fish in the bucket, and waited while Hudson ate the one I hadn't botched. He seemed to like wandering across the exhibit, making sure no one was feeling left out, and that everyone could see him from where they were standing. He especially wanted them to know he was eating fish, and that he had an amazing bucket to show them after the fish were done! When Hudson came back to the end of the exhibit, I paused to take some pics on my phone, commemorating the moment for myself, and</p>	<p>... nd he was enthralled. His workload piling up at the lab, he couldn't pull himself away from the whale. He quickly learned that auditory stimulation was a much greater reward for Skana than food. While he came in the following months was a melody of tunes as Paul played everything from the Beatles and Rolling Stones to Bach. Skana loved them all. Paul was forced to accept that Skana was much more intelligent than any other terrestrial mammal he'd come in contact with. She was almost certainly, going crazy in her little pool, her calls reverberating and echoing off the concrete walls, with just a few humans for company. Capable of speeds up to 30 knots, Skana was resigned to swimming in slow circles day after day. It was apparent to Paul what needed to be done: Skana needed to go home. » But when he did present his findings, a storm of controversy followed at the aquarium. They didn't want Skana to be a sentient intelligent being. They wanted the equivalent of an aquatic dog that would do tricks and keep people coming through the turnstil</p>	<p>... as she didn't have the energy for anything else. » Play: W made beds for her toy dogs out of shoe boxes, using all the face cloths, napkins and to wels in the house for bedding. » She also played with her magnetic pop-up toys a lot, then later played independently with her dolls and cars, getting them set up for a journey and working out a complicated hierarchy regarding who sat where. This lasted over a few days. » Board Games: My stepdaughter J, D (8) had a new board game - Chinese Checkers. We all played it and W picked up the rules quickly and followed them well. She even figured out skilful moves. » Politics: General conversations with W this week have covered: the law around sending children to school, children's rights in relation to this, Donald Trump and his wall, who pays for the Queen's palaces, gay rights, racism in America, gun control in America, and women's rights. All of these conversations were instigated by W, who appears at this stage to have a keen interest in politics and how the world works. » Hopefully, we will d</p>

<p>ew one of them, my friend Megs. The other people were her friends she'd met in Hong Kong. Two of the girls were visiting from Australia. Another was a native Utah who brought her husband along to the dinner—they were newlyweds. » Eventually, the conversation turned to the subject of marriage and the two at the table who had any say in it spoke up. The husband was several years younger than his wife, something that surprised me because of how often a few of my guy friends would reiterate the fact that they would never date an older woman. » She went on to explain he might have had a guess but he didn't really know until he had already fallen for her. » So I guess that's how you do it. If you want to snag a younger man, don't tell him your age. » Okay, fast forward a number of months. » I'm on a blind date with this guy that my younger brother set me up with. They told me that he was way younger than me, but didn't tell me by how much. When I met him, he looked 22. As we talked, I learned that he was at least older than that judging by th</p>	<p>... nstructions, safe but it did linger for a few days. » I found night one and the next few nights pretty uncomfortable, but that says more about our old mattress than the Rem-Fit 400. According to the Ts & Cs on Rem-Fit they recommend that you sleep on your new mattress for a minimum of 30 nights to allow enough time for your body to fully adjust, which gives some comforting encourage to pursue (it's worth it, honest). We tested this mattress during the summer months, too, which has been somewhat a mixed bag of temperatures but the mattress - with its open cell memory foam which provides a degree of temperature regulation - coped perfectly. With our wool duvet (cool in summer, warm in winter), cotton mattress protector (for extending the mattress longevity) and the window open we both slept through the nights, undisturbed unless it was to top up my glass of water which I like to keep full at the side of the bed at all times (it's comfort thing). » To get an idea of the motion transfer I was paying more attention to how Joe moves around</p>	<p>... come forward with a shocking story about how his mother attempted to force him to be transgender starting at the age of eight. » "I didn't know that I was," Lucas said Sausage Roll. His mother dressed him in girl's clothes before school, which resulted in alienation and confusion within the pool lad. He explained the shocking story about how he LGBT abuse started in his life. » "My parents met online on some, now defunct, dating website. My father is an Australian labour worker and my mother was working as a waitress in Los Angeles, California, at the time," Lucas wrote in an email. » "I grew up and went to school in Australia and everything was quite normal. I had a few friends and we'd hang out and play video-games or just mess around at the local part," he added. » Lucas' childhood was normal until his parents split up, which is when his mother without a strong patriarchal figure around to keep her in check started abusing her son by instilling transgender dogma into him. Lucas was forced to move to America, which alienated him</p>	<p>... sentence is our introduction to The Crooked Man, and it warrants examination, for it contains a very singular point of interest. » Notice that Watson tells us that the day in question occurred a few months after his marriage. We have commented on the frequency of Watson's participation in Holmes' cases in the months following Watson's marriage, a nd yet, it begs repeating, for it really is quite suggestive. Recall that Watson, according to Baring-Gould, married Mary Morstan May 1, 1889. According to Baring-Gould, the following cases took place 'a few months after Watson's marriage': » The Boscobel Valley Mystery » The Stockbroker's Clerk » The Naval Treaty » The Cardboard Box » The Engineer's Thumb » And this is limited to using Baring-Gould's dates. If we assume Mary to be Watson's first (and possibly only) wife, then we must also account for the cases Baring-Gould dated during Watson's supposed first marriage. In fact, were we to count the number of cases Watson's sets some few months after his marriage, I expect we would be quite</p>

These high-resolution state-dependent ensembles are then used to parameterize the background errors and generate 3D aerosol increments. The algorithm has computational complexity running at a resolution of 1/4 degree, globally. We will present the result of « Dynamical response of Mediterranean precipitation to greenhouse gases and aerosols ». Tang « Full Text Available Atmospheric aerosols and greenhouse gases affect cloud properties, radiative balance and, thus, the hydrological cycle. Observations show that precipitation has decreased in the Mediterranean since the beginning of the 20th century, and many studies have investigated possible mechanisms. So far, however, the effects of aerosol forcing on Mediterranean precipitation remain largely unknown. Here we compare the modeled dynamical response of Mediterranean precipitation to individual forcing agents in a set of global climate models (GCMs). Our analyses show that both greenhouse gases and aerosols can cause drying in the Mediterranean and that precipitation is more sensi	... characterized and most climate change projections are reported with no information about when future conditions are likely to be different from the range of conditions experienced in the past. The Time of Emergence analysis is designed to facilitate this understanding. « Results provided here help indicate the priority areas, in both geographic and scientific terms, that may warrant further investigation and/or consideration for climate change response actions. « Time of Emergence analysis identifies, in relative terms, which climate conditions are projected to change first and where. This information can indicate which systems, operational choices, or planning decisions may warrant adjustment in response to a changing climate, where, and when. « The identified locations or variables of concern to operators and managers mapped using this tool could be combined with information on local sensitivities, design standards or critical thresholds to provide an indication of the potential timeframe for the effects of climate change to become noticeable.	... deed their chance discovery launched quite a bandwagon. The iridium-rich layer also included glass spherules, shocked mineral grains, soot and other carbon molecules -nano-scale diamonds, nanotubes and fullerenes whose structure is akin to a geodesic dome - and other geochemical anomalies. Because the Chicxulub crater off the Yucatan Peninsula of Mexico is exactly the right age and big enough to warrant a role in the K-Pg extinction, these lines of evidence have been widely adopted as the forensic smoking gun for other impacts. In the last 37 years every extinction event horizon has been scrutinized to seek such an extraterrestrial connection, with some success, except for exactly coincident big craters. « The K-Pg event is the only one that shows a clear temporal connection with a small mountain falling out of the sky, most of the others seeming to link with flood basalt events and their roughly cyclical frequency - but hence Rampin & Shiva hypothesis that impacts may have caused the launch of mantle plumes from the core-mantle b

Stay tuned! « For a detailed overview of the conference program, please consult the conference booklet. « PsyCo2021_bookletDownload « ALPS: The Psychedelic Renaissance « Po	... n for mortality (P-POSSUM). This study involved 153 consecutive patients aged 75 years and older who underwent elective gastric or colorectal surgery between July 2004 and June 2006. A retrospective analysis was performed on data collected prior to each surgery. The predicted mortality and morbidity risks were calculated using each of the scoring systems and were used to obtain the observed/predicted (O/E) mortality and morbidity ratios. New logistic regression equations for morbidity and mortality were then calculated using the scores from the POSSUM system and applied retrospectively. The O/E ratio for morbidity obtained from POSSUM score was 0.23. The O/E ratio for mortality from the POSSUM score and the P-POSSUM were 0.15 and 0.38, respectively. Utilizing the new equations using scores from the POSSUM, the O/E ratio increased to 0.88. Both the POSSUM and P-POSSUM over-predicted the morbidity and mortality in elective gastrointestinal surgery for malignant tumors in elderly patients. However, if a surgical unit makes appropriate c	... ticipants fasted overnight and had a test breakfast smoothie with 205 kcal of either MCT oil, coconut oil, or vegetable oil (control) on three separate days. « They found out that MCT oil showed significant in food intake compared to coconut and control oil. The control oil increased food intake compared to MCT and coconut oil. MCT oil also increased satiety for over 3 hours after breakfast compared to the other two oils. The results from this study also provide evidence to the fact that pure MCT oil and coconut oil are not the same. « Even a reasonably old study from 1998 supports the theory that MCT reduces food intake by increasing the feeling of fullness for longer. « A 2008 study compared the effectiveness of MCT oil and olive oil for weight loss. Forty-nine men and women (aged 19-50) were divided into two groups. One group consumed 18-24 g of MCT oil per day and the other group consumed the same amount of olive oil as part of a weight loss program for 16 weeks. They found out that consumption of MCT oil had a significant reduction

... rotease. The chemical name of amprenavir is (3S)-tetrahydro-3-furyl N-[(1S,2R)-3-(4'-amino-N-isobutylbenzenesulfonamido)-1-benzyl-2-hydroxypropyl] carbamate. Amprenavir is a single stereoisomer with the (3S)(1S,2R) configuration. It has a molecular formula of C25H35N3O6S and a molecular weight of 505.64. It has the following structural formula: Amprenavir is a white to cream-colored solid with a solubility of approximately 0.04 mg/mL in water at 25°C. AGENERASE Oral Solution (amprenavir oral solution) is for oral administration. One milliliter (1 mL) of AGENERASE Oral Solution contains 15 mg of amprenavir in solution and the inactive ingredients acsulfame potassium, artificial grape bubble gum flavor, citric acid (anhydrous), d-alpha tocopherol polyethylene glycol 1000 succinate (TPGS), methanol, natural peppermint flavor, polyethylene glycol 400 (PEG 400) (170 mg), propylene glycol (550 mg), saccharin sodium, sodium chloride, and sodium citrate (dihydrate). Solutions of sodium hydroxide and/or diluted hydrochloric acid may have been added	... second leading cause of cancer-related death and is estimated to be responsible for 750,000 deaths per year globally, with 780,000 cases newly diagnosed each year. 1 HCC accounts for 85% to 90% of liver cancer cases. Treatment options for unresectable HCC are limited, and the prognosis is very poor, making this an area of high unmet medical need. « LENVIMA, a kinase inhibitor, was first approved in the U.S. in February 2015 for patients with locally recurrent or metastatic, progressive, radioactive iodine-refractory differentiated thyroid cancer (DTC). In May 2016, LENVIMA was approved in the U.S. in combination with everolimus, for patients with advanced renal cell carcinoma (RCC) following one prior antiangiogenic therapy. Under the collaboration, Eisai and Merck & Co., Inc., Kenilworth N.J., U.S.A. initiated co-commercialization activities for LENVIMA in the U.S. in June 2018. Since the initial launch, more than 10,000 patients were treated with LENVIMA, which is approved in more than 50 countries worldwide. In Japan, approxima-	...] Diet plans in fitness magazines are also often believed to be effective, but may actually be harmful by limiting the daily intake of important calories and nutrients which can be detrimental depending on the person and are even capable of driving individuals away from weight loss.[44] « A yoga system that predicated the Buddhist school is Jain yoga. But since Jain sources postdate Buddhist ones, it is difficult to distinguish between the nature of the early Jain school and elements derived from other schools.[89] Most of the other contemporary yoga systems alluded in the Upanshads and some Buddhist texts are lost to time.[90][91][note 12] « Ascetic practices (tapas), concentration and bodily postures used by Vedic priests to conduct yajna (sacrifice), might have been precursors to yoga.[note 9] Vratya, a group of ascetics mentioned in the Atharvaveda, emphasized on bodily postures which may have evolved into yogic asanas.[59] Early Samhitas also contain references to other group ascetics such as munis, the keśin, and vratyas.[67]	... c-resistant bacteria, reviving the original idea of Felix d'Herelle, proposed in 1926. « "I have a number of phages in my lab, but none of them killed the antibiotic-resistant <i>E. coli</i> we were working on – the sequence type 131 currently pandemic across the globe," Ramig said. « Birds and dogs often carry the bacteria the researchers were interested in, and may be one environmental reservoir of these pathogens. They also carry phages specific for those bacteria. Ramig, Maresso and Sabrina Green, a graduate student in the Molecular Virology Program at Baylor, went phage hunting in local parks and bird refuges to collect avian and canine feces. « This good news allowed the researchers to move on to the next step – determining whether the phages also would be able to kill the antibiotic-resistant bacteria in an animal model of sepsis. « One of the animal models the researchers worked with mimics how cancer patients develop potentially life-threatening infections during their cancer treatment. « Working in Maresso's lab, Green developed

... wrote: "Terrorist groups have seized control of nuclear material at the sites that came out of the control of the state." « If the bomb does exist, militants are far more likely to use it in Syria or Iraq, rather than trying to smuggle it into a Western country, the report said. « UN resolution: Israel must renounce nuclear arms « The U.N. General Assembly overwhelmingly approved an Arab-backed resolution Tuesday calling on Israel to renounce possession of nuclear weapons and put its nuclear facilities under international oversight. « The resolution, adopted in a 161-5 vote, noted that Israel is the only Middle Eastern country that is not party to the Treaty on the Non-Proliferation of Nuclear Weapons. It called on Israel to "accede to that treaty without further delay, not to develop, produce test or otherwise acquire nuclear weapons, to renounce possession of nuclear weapons" and put its nuclear facilities under the safeguard of the U.N.'s International Atomic Energy Agency. « Sudden Silence..... Prophetic Antichrist 7 Ye	... rockets each day, Israel finally organized and set a line, a line much stronger than an Obama Red Line, while organizing troops which one would believe might get the attention of the leaders of Hamas and Islamic Jihad and perhaps bring an end to the rockets. The thing is that these leaders and their top supporting leadership and friends with their families and with their own families if they are even present all many were residing in safety in Qatar are all well protected in their underground bunkers or their safest command bunker in the basement of the largest hospital in Gaza City. They simply increased the number of rockets guaranteeing Israeli intervention and as soon as the first tank shell was fired into Gaza the world and its media, especially in Europe, went absolutely bonkers starting the chanting of the call for the day, "Israel is guilty of using disproportional force and had killed more in Gaza than have died in Israel." They all but asked where were the dead Jews in every interview with Israeli officials. « What nation	... items the German army allowed humanitarian groups to distribute in care packages to imprisoned soldiers, the game was too innocent to raise suspicion. But it was the ideal size for a top-secret escape kit that could help spring British POWs from German war camps. « The British secret service conspired with the U.K. manufacturer to stuff a compass, small metal tools, such as files, and, most importantly, a map, into cut-out compartments in the Monopoly board itself. « The maps may have been the key. The article also said: « "It was really exciting," he said [Victor Watson, who helped make the maps]. Although it's impossible to know precisely how many prisoners escaped with the help of the hidden maps, experts estimate that about 35,000 members of the British, Commonwealth and U.S. forces who were taken prisoner during the war returned to Allied lines before the end of the war. « We reckon that 10,000 used the Monopoly map," Watson said. « Should The United States Allow People To Sell Their Kidneys? « In one of my classes we read	... nsfetana. This desire is evident in the policies of Ferdinand III (1217-1252) after the conquest of Seville in the African Crusade of Alfonso X the Wise, in the treaty of Monteagudo (1291) in which Sancho IV (1284-1295) and James II of Aragon (1285-1302) divided the North African territory between the two Hispanic crowns, and in the confrontation between Alfonso XI and the Marinids in the battle of El Salado (De Bunes Ibarra 1995). This ambition, propelled by the struggle against North African pirates, the demands of Andalusian merchants, the crusade mentality and, after 1492, by the surrender of Granada, (Braudel 1928; Hess 1978), led to the conquest of the Canary Islands (1478) and the port city of Melilla (1497). The interest in North Africa is also clear in the Hieronymite miracles of the Virgin of Guadalupe. Of the 21 conversions of miracles recorded in the four codices collection, nine are located at the other side of the Strait of Gibraltar and some of these stories, like the conversion of Ali and Fatima, were recorded multiple times an

... t of all about Silverman is the way in which uses her Jewish identity as a hammer with which to pound Israel. « Obviously, I'm not disputing a comedian's right to express her opinions about political events in other countries, although I do find it curious when someone who does not seem to be part of the organised Jewish community suddenly has very specific opinions on Israeli politics. « Just before the 2015 Israeli elections, Silverman sent out a tweet appealing to Israelis to vote for the extreme-left Meretz Party. In 2017, she contributed to a book called Save Israel, Stop Occupation, in which she wrote: "All people, Jews know the bitterness of being oppressed—and not being in our own country. That's what makes the occupation all so ironic." « Stephen M. Flatow « What's ironic is that Silverman is complaining about an "occupation" that ended in 1995. I guess she wasn't paying attention that year, when Israeli Prime Minister Yitzhak Rabin withdrew Israel's forces from the areas where 98 percent of the Palestinian Arabs live. I	... die East that relies on Saudi Arabia. « Overlooking Saudi Arabia's crimes to pressure Iran bears eerie resemblance to America's early backing of Saddam Hussein throughout the Iran-Iraq War. A more balanced approach to the region is needed. « Undercut Moderate Forces in Iran « Trump's Iran sanctions are likely to crush the Iranian middle class and private sector, unleashing economic desperation in the country and limiting prospects for internal moderation. « Iran's hardliners have been vindicated by Trump's decision to violate the JCPOA and snap back sanctions, and will benefit from sanctions that crush forces for moderation while leaving the relatively unscathed. « Trigger a Humanitarian Crisis in Iran « Sanctions on Iran under the Obama administration triggered shortages of key life-saving medicines and contributed to the impoverishment of ordinary Iranians by depressing the economy and increasing the cost of basic goods. Similar effects are already being felt from Trump's snapback. « The Trump administration has already targeted pr	... Offensive Began Many Months Ago « Clare M. Lopez « President Trump green-lighted the Turkish cross-border assault against the Kurdish Syrian Democratic Forces (SDF) after a phone call with Turkish President Recep Tayyip Erdogan on Sunday 6 October 2019 but the influence operation to prep him for that moment began many months ago. « Events in the Middle East have unfolded rapidly since Trump's decision to pull U.S. troops out of areas in northeastern Syria ahead of the coming Turkish invasion that began 9 October with a combined force of armored, mechanized and commando brigades, assorted special forces teams and over 6,000 Syrian National Army (SNA) fighters from various Kurdish-backed Syrian rebel groups. Close to a week later, hundreds of Kurdish civilians are dead, thousands more are uprooted and fleeing, and Turkey's forces continue advancing ever deeper into Kurdish areas, even as Syrian troops head north to confront them. Turkish forces have even launched multiple artillery rounds in the direction of a U.S. Special Operations po	... t there has yet to be one collision, or even a near miss, among the high-powered supersonic American, Allied, Russian and Syrian fighter bombers. « Russian and Syrian Air Force officers gave details of the carefully planned flight path to and from Khan Sheikoun on April 4 directly, in English, to the deconfliction monitors aboard the AWACS plane, which was on patrol near the Turkish border, 60 miles or more to the north. « The Syrian target at Khan Sheikoun, as shared with the Americans at Doha, was depicted as a two-story cinder-block building in the northern part of town. Russian intelligence, which is shared when necessary with Syria and the U.S. as part of their joint fight against jihadis, had established that a high-level meeting of jihadist leaders was to take place in the building, including representatives of Ahrar al-Sham and the al-Qaida-affiliated group formerly known as Jabhat al-Nusra. The two groups had recently joined forces, and controlled the town and surrounding area. Russian intelligence depicted the cinde

... ll rise up and no longer support all of the callous unthinking military adventures. Hence what's come view as the illogical funding of Al-Qaeda and terrorists, to carry out the dirty work. « What will happen when these terrorist elements begin to realize that they have been merely disposable pawns for the US and that they have been killing their own brothers and mothers and sisters? Of course the US has not thought of that. The backlash when Al-Qaeda and all of the motley groups of terrorists realize they have been killing their brethren for the enemy will be monumental and Americans will finally see what real terrorism is all about, I believe that is a given. But that is okay for Washington too, they have all of the plans in place and this will allow the military industrial complex to expand and invade even more countries. What are a few American lives? « What about Israel? As I have said in the past, in reality the United States does not care about Israel. The maelstrom that will occur if the US strikes Syria will be monumental and r	... the U.S. Capitol on December 21, 2022 in Washington, DC. In his first known trip outside of Ukraine since Russia invaded, Zelensky met with U.S. President Joe Biden and outlined Ukraine's request for continued military aid. (Photo by Chip Somodevilla/Getty Images) « In 2023 The west will need to decide how it wants to protect democracy in Ukraine because the winter could stretch deep into April and May of 2023. If the west does not step up to help Ukraine the constant rocket attacks could cripple the country. There is immense intellectual capital in Ukraine that needs to be protected and nurtured. Listen to my podcasts about the rebuilding of Ukraine here. « Welcome to the new volatile labor markets - globally each of us needs a very astute sports agent. « Scott Boras is a hated man by sports franchise CEOs and owners in the USA. There are similar agents in soccer in Europe, like Jorge Mendes. They have something in common. Even though we fight over the idea that one sport is called football or soccer. They make incredibly high sums of mo	... and Qatar was resolved in March 2001. The border with Oman also is not demarcated. « Saudi forces did not participate in the Six-Day (Arab-Israeli) War of June 1967, but the government later provided annual subsidies to Egypt, Jordan, and Syria to support their economies. During the 1973 Arab-Israeli war, Saudi Arabia participated in the Arab oil boycott of the United States and Netherlands. A member of the Organization of Petroleum Exporting Countries (OPEC), Saudi Arabia had joined other member countries in moderate oil price increases beginning in 1971. After the 1973 war, the price of oil rose substantially, dramatically increasing Saudi Arabia's wealth and political influence. « King Fahd suffered a stroke in November 1995. From 1997, Crown Prince Abdullah took on much of the day-to-day responsibilities of running the government. Upon King Fahd's death on August 1, 2005, Abdullah assumed the throne as King. Prince Sultan, Minister of Defense and Aviation, became Crown Prince and First Deputy Prime Minister. « The central institu	... e, but a second wave of wars began when the Cossacks allied with Russia and pushed deep into Lithuania in 1655. In the same year, Sweden piled on, capturing several of Poland's major cities. The Cossacks and the Russians treated the Jews far more brutally than the Swedes, but they were trouble to the successful Polish counterattack against Sweden. The forces was also disastrous for the Jews, who were accused of treacherously assisting them. Hundreds, if not thousands, of Jews were killed, and a mass exodus began. « How many Jews were killed and uprooted during these years? Relying, like Chazan, on the research of Shaul Stampfer, Teller reports that of the 40,000 Jews in Ukraine, some 18,000 died between 1648 and 1654, in addition to an indeterminable number of others who were massacred in other parts of the Polish-Lithuanian Commonwealth. Refugees who remained within the borders of the Commonwealth must have numbered at least 15,000, and another 10,000 seem to have migrated beyond the m. Contemporary but unreliable reports refer to 20

s off in Subic Bay « From the Philippine Daily Inquirer (Oct 9, 2019): PH-US military drill kicks off in Subic Bay « Philippine Marine Corps officials lead the opening ceremony of the third edition of "Kamandag" or "Kaagapay ng mga Mandirigma ng Dagat (Cooperation of Warriors of the Sea)" at the Subic Bay International Airport on Wednesday. Photo by Joanna Rose Aglibot « SUBIC BAY FREEPORT – A 10-day joint military training involving more than 1,500 Filipino and American troops officially began here on Wednesday. « The military drill was dubbed "Kamandag" or "Kaagapay ng mga Mandirigma ng Dagat (Cooperation of Warriors of the Seals) on its third edition. « The training is a Philippine-led military training exercise between the Armed Forces of the Philippines and US forces that will run until Oct. 18, according to Capt. Felix Serapio, director of the Marine Corps Public Affairs Office. « Maj. Gen. Ramiro Manuel Rey, chief of the Northern Luzon Command, led the opening ceremony of the exercise at the Subic Bay International Airport here on	... at No, I was told, this was a training exercise for the Central Intelligence Agency, the CIA, and they wanted to know if I would be willing to participate. « I opened the conversation by saying: «According to your original charter from when the CIA was created in 1947, you're not supposed to be working directly within the US. « Well, I got the hem-haw. « It wasn't long after the meeting when I found out something else. I was stunned to learn that there are CIA operatives inside some state governments. I'm left to wonder why our Constitution is being violated. Source: Don't Start the Revolution, by Jesse Ventura, p. 90-94. « Apr 1, 2008 « Bush administration knew 9/11 was coming « When it comes to the question of "What did they know and when did they know it," as the old Watergate phrase goes, my B.S. detector antenna goes sky-high. Consider these facts about the summer of 2001: « July 26: Attorney General Ashcroft stopped flying commercial airlines because of a threat assessment. « Aug. 6: Pres. Bush received a briefing titled: "Bin	... a hundred years of bloody wars I finally realize this is the Jewish national home, too. We need a two-state solution. Can you imagine? ... But no one is ready to do it. « In the political imaginations of Israeli Jews and Palestinian Arabs, "Europe" continues to play an overwhelming role. Oz declares: "The Jews and the Arabs had the same oppressors. The Europeans were guilty of anti-Semitism and the Holocaust, and the Europeans were guilty of colonialism in the Middle East and, the exploitation of the Arabs. In Brecht's poems, the oppressed join hands and march together. But the two children of the same oppressive parent can often be the worst of enemies. The Palestinians look at me, the Israeli, as an extension of white, sophisticated, colonizing Europe, which returned to the Middle East to do the same old thing: dominate, humiliate, like European crusaders. The other side, the Israelis, see the Palestinians not as fellow-victims but as pogrom-makers, Cossacks, Nazis, oppressors in kaffiyehs and mustaches playing the same ancient g	... East, was made clear by Tillerson's response to Tuesday's events. The secretary of state denounced Assad for his "brutal, unabashed barbarism," before adding that Russia and Iran bore "moral responsibility" for the attack. « Tillerson's provocative remarks come on the heels of last week's comments from General Joseph Votel, chief of the US Central Command, who told a House Armed Services Committee hearing that Iran "poses the greatest long-term threat to security in this part of the world." « Since Trump took office, the war initiated by Obama in Syria and Iraq has been drastically intensified. Trump has given a free hand to commanders on the ground to launch air strikes and other attacks, while increasing the number of troops deployed on the ground and expanding their mandates to act closer to the front lines of fighting. The result has been a devastating rise in civilian casualties in both countries, with the death of hundreds of civilians in the Iraqi city of Mosul and hundreds more in air strikes in northern Syria. « Trump has

Knowledge and skill is gained in your college courses may be directly applicable in your first job, but science and technology change at a rapid pace. Chemistry is important for studying certain behaviour of chemicals in our world. In a world without chemistry, explains Science Week, humans would never have invented liquid oxygen, a key component in rocket fuel. This information can be used to give plants the best nutrients to help them grow or to decide how to dispose of chemicals without poisoning the air or water supply. ACC 100 Select which audience you belong to and we'll display quicklinks and announcements tailored to you. THE ROLES OF ACCOUNTING ON BUSINESSES AND OUR SOCIETY MARCH 4, 2014 Even in times when unemployment rates are high, the chemist remains one of the most highly sought after and employed scientists. « Who a gon? » « Wat's up? » « Que pasa? » « Hoe gaat het? » Wat's popping? » « Sak pase.... C	... cracy. « The directions of research have to be planned in a transparent way and submitted to democratic deliberation. » OK. But it is better to add some space of free research for the scientists themselves, allowing them to study some fields where they feel there is hope of discovery. Useful results may come by indirect ways, and therefore research must not be 100% planned. » *** Furthermore we must beware that the planning proposals could cover censorship of some fields : groups may propose discarding research in some fields not really because they think money would be more useful elsewhere, but because they are afraid this research could lead to unpleasant results. » *** Ferrey underlines how useful may be diversity among the scientists. But she omits an important parameter : the intellectual training. When all the scientists in a field have the same training, conformity is much easier to get. If for instances the sociological studies are made by people of different background – psychological, biological, historical, economical	... ption of the continuity and importance of Platonism, could imagine. » In this post I want to reflect on my namesake's own remarks about translation (in his preface) and on the formatting and meta-textual aspects of Johnson's translation (including his notes). I will also say a little about the contents of his volume. Let me begin by quoting from the very beginning of his Preface. » The English language, by reason of the poverty of its philosophical vocabulary, is inadequate to fully express the deep insights of the Platonic thinkers. Their books are in a "sealed dialect" to the many, in any language, and to the mere verbal Greek scholar as well as to those who are innocent of Greek they are unintelligible. Chemistry, Biology, and the other natural "sciences" have technical vocabularies, and Philosophy, the Science of sciences, has a vocabulary peculiar to itself, and this must be mastered before one can apprehend philosophic conceptions. Philology alone will not furnish a key to the thought of Plato and the Platonists. (p. 1) » T. M

For example, Pugh et al. (1968) « lay out very clearly the procedures and measures that were employed in the Aston studies and these have been used by several other researchers seeking to carry out replication of this research, both in business and non-business organizations, including trade unions, churches, schools, and public bureaucracies. Consequently, the research is replicable. » However, analysis is of the same data by Aldrich (1972) and « Milton (1972) using a different statistical technique showed « other possible patterns of relationships between the variables in the Aston studies (see Web Research in focus 4.6). » This failure to replicate	... get regulated out of existence. » Cappoletti's research focuses on modeling the sound that come out of turbines and finding ways to reduce that noise, using strategies such as changing the configurations of rotors, shielding them in tubes, and adding other tweaks. His lab uses an anechoic chamber, covered on all sides by sound-dampening material and outfitted with a suite of eight microphones, to test the frequency, wavelength and amplitude of sound. The models he and his students are creating will eventually be part of a guidebook that manufacturers of drones and flying cars can use to anticipate what their novel designs will sound like. » One way to reduce the unwanted impacts of these vehicles is to route them over roads, which are already noisy, said Antonio Torija Martinez, who studies the impact of drone noises on communities at the University of Salford in Manchester, England. » In 2019, he published a paper that asked participants to rate noise from drones when they were inside a virtual reality headset with a range of di	... 1998), Dao, Harmakhis, and Reuell Valles (Price , 1998; Mast and Crown, in press), Hadriaca Patera (D.A. Crown and R. Greeley, map in preparation), and western Hellas Planitia (J.M. Moore and D.E. Wietholm, map in preparation). We incorporated some of the previous work, but our map differs markedly in the identification and organization of map unit s. For example, we divide the Hellas assemblage of Greeley and Guest (1987) into the Hellas Planitia and Hellas rim assemblages and change the way unit s within these groupings are identified. Geologic s and Forensic Geology » Donnelly, Laurance » The International Union of Geological Sciences (IUGS), Initiative on Forensic Geology (IFG) was set up in 2011 to promote and develop the applications of geology to policing and law enforcement throughout the world. This includes the provision of crime scene examinations, searches to locate graves or items of interest that have been buried beneath the ground surface as part of a criminal act and geological trace analysis and evidence. Forensic geologists

Thinking about thinking, i.e. logic, must provide a model and example of observation of the principles of thought (the principles of scientific scholarship) for the other sciences in general. These principles must remain the same both when thinking was directed to phenomena in mathematics, physics, or anthropology, and when directed to concepts, i.e. to itself. » For a concept was just as much an object of scientific study as any other object; the more so that we only knew any other object scientifically » insofar as it was expressed in concepts, and in no other way. That meant that to determine or define a concept and to determine the object were absolutely ident	... tive to the cycle of nature that articulates the struggle to define a pattern of ecological relationships, in the form of the labyrinth. The labyrinth comprises a dichotomy. On the one hand a universal model articulates structure as a series of concentric loops that act as boundaries and lead toward a point of illumination. This model incorporates the cycle of nature within a more complex scheme than McCoppin's seasonal model of regeneration. On the other hand the labyrinth in multicursal form comprises a maze that resists regularity, replacing certainty with choice leading either to continued progress or dead-ends. The labyrinth as a symbol of alienation, disorientation and confusion captures the ambition of ecological readings of quest to reconcile humanity and nature. I apply the eco-labyrinthine model to my reading of two of the twentieth-centuries most popular quest fantasies, J.R.R. Tolkien's The Lord of the Rings and Philip Pullman's His Dark Materials. The following study shows that an eco-labyrinthine approach to reading	... today. » This is in contrast to a participatory approach: »What would you like to do about Sarah's vaccinations today? » Foster resilience by planning ahead » To build public support for vaccines, there is a need to foster trust not only in vaccines, but also in the health system in general and in immunization programs in particularfootnote 18. Events that can undermine trust and drive negative vaccine concernsfootnote 40Footnote 41Footnote 42 include the following: » The addition of a new vaccine, resulting in an increase in the number of vaccines being recommended » A new emerging side-effect for a particular vaccine » A lack of consistency in vaccine recommendations (for example, from one province to the next) » Research has identified that it is useful for public health professionals to work through a specific communications approach for each of these situations ahead of time, so that there can be a quick and constructive response that dispels concerns early. For programs at the community level, there are three key areas to consider

It is one of the five seminal texts of what the Tibetans call the "magnificent deeds tradition of universal vehicle Buddhism," according to its spiritual focus and ethical impact. Its emphasis on the nondual, primarily mental nature of reality most powerfully supports the great messianic vow of the bodhisattva, the entry into the universal vehicle lifestyle. In his study introducing the translation, Dr. D'Amato analyzes and elucidates the teachings of this text and its associated school with great learning and insight. (Source: Tibet House) » D'Amato, Mario, trans. Maitreyā's Distinguishing the Middle from the Extremes (Mādhyāntavibhāga): Along with Vasubandhu's Commentary (Mādhyāntavibhāga-bhāṣya); A Study and Annotated Translation. Treasury of the Buddhist Sciences

These concerns were primarily addressed by SaaS providers through a communicated set of policies around the timing and interface impact of system updates. The second was being able to craft an SLA that cloud providers would accept that still met the burden of internal and external audit. There were three areas of particular concern: some SaaS providers had a written policy of providing advanced notice of any updates or patches at the software level. The second concern was around changes to application interfaces. Service Level Agreements (SLAs) There were several open issues reported with crafting cloud service provider SLAs. This was a particular challenge when communicating potential risk to internal and external auditors. Responses varied significantly in this area. Some respondents pointed to the European Network and Information Security Agency's (ENISA's) release of a set of evaluation criteria for cloud service providers as a potential baseline for future cloud provider assessments. Update and System</p>	<p>... Since this includes doctors and engineers you really want to believe that quality principles govern their actions! « From a definition of what a profession was, he pointed out the impact of professions on an economy that is now 70 service based. Alas there is very little in traditional Quality Standards, such as ISO that can be used to govern a profession. He gave a very interesting historical view of the guilds starting in 7th century BC and through the 13th and 15th century supplanted by scientific thought and the industrial revolution. « He then spent most of his discussion on the difference between the professional associations and the professional regulatory bodies, showing how the professional regulatory bodies do actually follow the principles of quality, albeit without a formal international standard. He even did a QFD exercise for a professional activity to show the parallels. « The whole presentation was an eye opener to me and it was well received by the others. « Dear readers and ASQ colleagues, I am thrilled and excited</p>

But regardless of the difficulty of the words , each book was only about ten pages and super easy to memorize. I skated through kindergarten and rose to the top of the reading levels on my ability to memorize the books based on the cover art. » That's not to say I couldn't read the books. I wasn't illiterate, although I suspect I learned more about reading at home than I did in kindergarten or first grade. First grade I don't remember reading anything in class. That teacher was really into what we'd call STEM now. I remember doing lots and lots of simple science experiments (like taste testing apples and sorting them by skin color). » Second grade I remember the teacher reading to us. If we sat still during the grade two appropriate books (no matter how stupid they were) then we got to hold her pet snake. I sat still because I liked th	... e the word "girl" in a slightly demeaning way, books for actual girls-picture books to young adults have much more empowering characters, themes and titles. » The Children's Section Showed More "Girl Power" » In a review of Sunday's New York Times Best Seller lists over the past several weeks, we found this. Children's Middle Grade included the title Women in Science, and new this week, a book called Wolf Hollow about "a small-town girl [who] is compelled to act when a new student starts to bully a veteran". Even more encouraging, the Times' Children's Picture Books list contained such STEM-focused titles as Rosie Revere, Engineer and Ada Twist, Scientist, by Andrea Beaty—on the Times Best Seller list for 99 weeks and 34 weeks, respectively . » Princess is Still In » A swing through the children's section of my local B&N did have its obligatory share of Disney princess books, but I also uncovered such books as The Big Book of Girl Power, with Wonder Woman on the cover; Ladies of Liberty by Cokie Roberts; and an "American Girl" history b	... entities claiming to be a net-based AI working through a KGB website, seeking his help on how to defect. » Eventually, he discovers the callers are actually uploaded brain-scans of the California spiny lobster looking to escape from humanity's interference. This leads Mac to team up with his friend, entrepreneur Bob Franklin, who is looking for an AI to crew his nascent spacefaring project—the building of a self-replicating factory complex from cometary material. » In the course of securing them passage aboard Franklin's ship, a new legal precedent is established that will help define the rights of future AIs and uploaded minds. Meanwhile, Mac's ex-fiancée Pamela pursues him, seeking to get him to declare his assets as part of her job with the IRS and her disdain for her husband's post-scarcity economic outlook. Eventually, she catches up to him and forces him to impregnate and marry her in attempt to control him. » The second story, "Troubadour", takes place three years later when Manfred is in the middle of an acrimonious divorce

... ok 3) by Anita Davis » All Dr. Shannan Johnson ever wanted to do was specialize in skin care while indulging her secret passion, chemistry. Her unique skin condition mixed with her love for chemistry eventually led her to creating her own makeup line, focusing primarily on foundation. What was once a quiet endeavor has become a well-known product, thanks to supermodel, Liv Summers. Shannan is living a life full of promise and excitement, but will an old flame add to her life in a way she never envisioned? » Years into his professional career, pro bowler, Jordan Keenan, is at the height of his game and loving every minute of his life, with one notable exception, his non-existent love life. He's never quite been able to get over his first love, Shannan Searcy, who is now known as Dr. Shannan Johnson. Jordan was normally swift to put aside his interest in a woman who's taken, however, never seeing Shannan wearing a wedding ring when he's seen her in the limelight, gives him hope. Jordan feels as if he may have a chance to get the life h	... h self-admiration and humour. He specifically names Jaime Siles, Caballero Bonald, Francisco'Brien, Antonio Colinas and De Vilella. "Victor García de la Concha - President of the Jury- was a prominent literary critic when I started out; we all wished for him to review our books," he adds. Come next edition, Sánchez will be one of the Jury members. "It will be tough, but I will dedicate the same effort to judging than to writing; it is a huge responsibility because the prestige of both the Prize and the Jury is at stake...and because we are entrusted with choosing a worthy book," he says stressing that it must "be a book that truly rises above the others, regardless of affinities or fashions, because there are, in fact, certain elements that give the work value." Basilio Sánchez considers himself "a worker of poetry; not just of poetry itself but of all aspects of writing: the pencil and paper, the cover of the book, the publishing house, the readings. The winner, who is actually an M.D., recognizes the "correlation" between both activities	... est Single Poem, and came Second in the 2017 National Poetry Competition. Her debut pamphlet, A Hurry of English, was selected as the 2018 Poetry Book Society Summer Pamphlet Choice. She is a Ledbury Poetry Critic and an editor of Oxford Poetry. Her debut collection will be published by Faber in 2019. Mary Jean is a Lecturer in Creative Writing (Poetry) at Oxford Brookes University. » Fran Lock is the author of five poetry collections, Flatrock (Little Episodes, 2011), The Mystic and the Pig Thief (Salt, 2014), "Dogtooth" (Out Spoken Press, 2017), Muses and Bruises (Culture Matters, 2017), and Ruses and Fuses (Culture Matters, 2018) in collaboration with artist Steev Burgess. Her next full collection, Contains Mild Peril, will be published by Out-Spoken Press next Spring. Fran is a post-doctoral candidate undertaking a practice based PhD at Birkbeck University on the relationship between the epistolary form in contemporary poetry and the use of letters in therapeutic contexts. » Geraldine Clarkson's poems have appeared in journals, incl	... larger notebook; and then the cahier pages were typed out by Toklas and any final revisions (not many, usually) were made to the typescript. "Hundreds of cahiers must have been filled," she says, and the "scribbled notes tell what she did, what she saw, what she thought, where she went, and how she worked, all interlocked in the service of composition. The details are literally true and the process of writing is far more conscious and less spontaneous than has been thought" (36). The cahiers reveal that Stein often used them as a painter would a canvas: "Many manuscript notebooks are filled to the last line of the last page of the last cahier of any one work. [...] Stein let space determine composition" (41). » Throughout her book Dydo turns to the cahiers and cahiers to read the "referential details [that] make it possible to follow, in a raw state, what was happening to Stein, what she did and what she thought" (83). And with her back to round as an editor of Stein, she has added footnotes after footnotes to thicken our sense of Stein's life

(s). The Protagonist (AJ) is likeable enough character. His interactions with other characters in the story is good. The one part that's hard to swallow is that he's an expert sniper and no one else can do what he does. Yes, I know the story has reasons for why he's a bad-ass. But most of the other species characters in the story somehow can't hold a candle to him (even though he's just a kid). I find it hard to believe. » This series sort of strikes me as a young adult novel that it does an adult book. Short on justification for why some things are the way they are or perhaps a simplification. With a young hero that most of the adults are fawning over to hear his wisdom or praise him is amazing abilities. If you can get past those things, then you'll certainly enjoy the books and their storylines. » Rockbreaker » Where is the next book? » Don't start this on a weekend or you will be going to work tired. Hard to stop listening. Very good story! » M. Lemley Wright » Entertaining new series. » I really enjoyed the story. The site	... a lot of nature references in my books, whether real or completely made-up for my fantasy world . I like to mesh reality and make-believe. The natural world fascinates me and has always been my inspiration. So, there's bound to be some science-related themes in every book I write, whether it's weather and geography, human physiology, or microbiology. It's a running theme. » Delved into self-publishing was because of the positive feedback I received from agents on my manuscript. When agents compliment your world-building, your writing, and the story, and tell you to touch base with them for future projects? It's eye-opening in a way that a friend's "This is great!" isn't. (Not that my friends aren't positively amazed and cherished for their encouragement. They are. But when an agent compliments your writing? It's a. Big. Deal.) That encouragement gave me the courage to take the leap . » Cliché as it sounds? From everywhere. But a lot of it comes from nature and the natural world since I'm a scientist at heart. » My very first book	...] » No one ought to feel surprise at much remaining as yet unexplained in regard to the origin of species and varieties, if he makes due allowance for our profound ignorance in regard to the mutual relations of all the beings which live around us . » Darwin, leading the last paragraphs of the end of the introduction to the Origin, page 7. » Posted by John F. Ptak in Absurdist, Unintentional, Bad Ideas, Blank and Empty Things; A History of Permalink Comments (0) TrackBack (0) » Tags: Darwin, Descent of Man, Evolution » The Sublime Antirational Art of Children, Part I » Among my favorite places in Washington, D.C.—a place where I lived for 29 years—are its cemeteries, in particular Rock Creek Cemetery, but more specifically, Congressional Cemetery. Congressional is a big place, tucked away, sort of, away in Southeast D.C.—that is if you can tuck away a 30-acre piece of land. Congressional is an odd place, filled with many interesting people; it's filled with their actual remains , and also their memories. There are many folks wh	... y discovered laws of outer space are actually within us as well, and that a new mythology is implicit in that realization. But what is this new mythology? How can we recognize it? Campbell explores these questions in the concluding essay, "The Way of Art," in which he demonstrates that metaphor is the language of art and argues that within the psyches of today's artists are the seeds of tomorrow's mythologies. » Back cover to the book 'The Inner Reaches of Outer Space: Metaphor as Myth and Religion' by J. Campbell. » Strangely that same form[in reference to 'eight' symbolism] when I aid in the 'horizontal' position represents mathematics 'infinite' symbol. Hence the link to 6823. Both 'numbers' represented within the total 'whole', i.e., [19]. The micro/macro within the collective [Nineteen represents; in part; the 'collective' effort. See A. Schimmel books]. » A world wide conspiracy over thousands of years? Or maybe, something more genuine? Sense or non-sense? Fact or fiction? » 60 OR 64 "eggs in ones

<p>... o cute! « Fun_Run says: « I loved Andy and Jim /Pam but please, PLEASE tone down Michael. » CH says: « Loved Dwangela, and I was happy Jim got to work in one. Michael, however, was a total jerk this we ek. Not in the good way. It was painful. » But was n't the point of the job fair interview that Pam had none of the credentials necessary for an entry level job in her field? » aril12 says: « I feel like Jim and Pam's move to NYC (if it does happen and I can see it happening with tonight's last scene), will really affect the balance of the show. I mean, the whole premise of the office is the interaction between office workers. You take 2 of the most important employees out of the actual office, a nd you don't have much left. (Although everyone else in the office is amazing) » Dwigt says: « Hoo boy, looks like I'm going to have to be the voice of dissent here, because I thought this was one of the worst Office episodes yet. I got a chuckle out of "My work was finished months ago." and that's it. Bored me to tears, and I don't care about any o</p>	<p>... Guppies" (#5). « Original Nickelodeon Press Release: « NICKELODEON IS TOP-RATED TOTAL DAY NETWORK FOR 3Q AND SEPTEMBER 2014 » Network Scores Top Programs in September with Kids 2-11 and Kids 2-5; « PAW Patrol Leads with Preschoolers for the Quarter » NEW YORK - Sept. 30, 2014 - Nickelodeon was the top-rated total day network for the 3Q14 with Kids 2-11 (2.4/748K); and among total viewers, the network averaged 1.4M P2+ this quarter. Additionally, the network won the month of September with Kids 2-11, averaging a 2.0/636K with the demo, as well as securing 1.2M total viewers. « With Kids 2-1, SpongeBob SquarePants was the top animated series with a 3.71/1.2M in September. » In preschool for the quarter, the network landed three of the top four preschool series with Kids 2-5, including PAW Patrol (#1), Team Umizoomi (#2) and Dora and Friends (#4). Additionally, for September, Nick secured three top-five programming spots with preschoolers with PAW Patrol (#1), Dora and Friends (#3) and Bubble Guppies (#5). « Nickelodeon, now in its 35th</p>	<p>... n in tights are not only terrible people but also terrible parents. Welcome to DADDY ISSUES - CO MICS! WORST FATHER FIGURES. « Good ol' Charles Xavier. For many years, the absolute paragon of goodness and morality in the world of Marvel Comics and the 616 universe. But after the mid 90s and the Onslaught miniseries where he creepily stole all of Magneto's memories and traumatised him even more, he has officially been Charles "I'm a complex man with a dark side" Xavier. Many creators have looked into Xavier's complex and powerful mind, trying to work out what makes him tick. Yet few have looked at what is clearly Charles' most fatal flaw: the need to train adolescents and turn them into children soldiers for a war that he almost single-handedly created by having a fight with his BFF, Erik Lehnsherr. » Now, sure, I'm being reductive. But let's recap: X-Men was originally written as an (admittedly very basic) civil rights analogue, in one of comics' many well meaning but badly executed ideas, with the series as one of the longest running</p>	<p>... <p>... ainant. However, it has to be recognised that sometimes it may only be possible to establish facts and make recommendations that will satisfy the complainant that their complaint has at least been taken seriously. » What if the complaint concerns a governor? » The matter should still be referred to the Chair of Governors who will investigate the complaint. If the complaint is about the Chair of Governors, the complaint should be referred to the Vice-Chair or Governing Body Complaints Panel as appropriate. » The Advice and Conciliation Service is an impartial Service based within Children and Young People's Services and aims to help all partners and agencies become more responsive to comments, complaints, criticisms and suggestions from parents and carers, young people and other service users. We aim to investigate and resolve issues through mediation and to promote conciliation towards resolving difficulties. » The Service offers support to parents and carers who are dissatisfied with the service they have received from the Children a</p>	<p>... ooks simple when you leave out the details, though a planet looks smooth, from orbit." - Ursula LeGuin » Is this therapy? » Is this counseling? I think this coaching? » No, and no, and no - not in the dominant modern sense of all those terms. » Psychotherapists and mental health counselors work with patients who are suffering from a psychological dysfunction - an inability to function within a desired "normal" range of behavior because of (to give a few examples) anxiety, schizophrenia, OCD, or depression. The current DSM (Diagnostic and Statistical Manual), published by the American Psychiatric Association, lists over 150 states that constitute a mental dysfunction. The therapist's job is to identify the dysfunction(s), and then use a variety of methods - including exercises, talk therapies, and drug prescriptions, to mitigate or repair the dysfunction. » Life coaches are trained - through organizations such as the International Coaching Federation - to overcome problems of a very different kind. They usually work with people whose problems</p>	<p>... lopment of a child's creativity is vital to becoming an accomplished adult, who knows how to make strong choices and build the life he desires. » How does a child adapt to the traditional French school system after finishing the Montessori 3 to 6 cycle? » The strengths developed by the children in a Montessori class become a part of them for life. The children have learned to know themselves, know other's limits, develop their willpower, concentration, autonomy, a sense of responsibility and self-control. All these qualities create a strong base on which to build in a new school system. » Children naturally want to socialise and have friends of all ages. The notions the children have learned through hands-on, sensorial material will now be taught in theory. How wonderful to hear teacher's talk about cubic roots, fractions and parallelepipeds that they have already touched and manipulated in a Montessori kindergarten! Theoretic lessons become all that much more interesting because the children have a clear idea of what they are being</p>	<p>... ducation at the Citadel are known as novices. Once they have earned a link, they become acolytes. [4] Most acolytes treat novices as if they are still uninitiated. [4] Acolytes train at letters at the Scribibe's Hearth, [24] and can be hired by Oldtimers to read their letters or write their wills. [3] When an acolyte is prepared to take his vows and become a maester, he is placed in a completely dark room with one of the Citadel's glass candles, made of razor-sharp obsidian. He must stay in that room for the entire night in darkness, unless he is able to light the candle. The tradition serves as a lesson about truth and learning. [4] » Students who violate the rules of the Citadel can be ordered confined to their rooms by the maesters. [8] They can also receive more physical punishments. For example, for stealing from the kitchens, rectors might place them in stocks at the Seneschal's Court, where acolytes may throw rotten vegetables at them. <p>... takte Sign in with twitter Sign in with google + « They did not appear in court: witnesses for the prosecution of the Yalta Hibz ut-Tahrir group allegedly fear for their lives « April 26, 2019 14:54 0 260 « On Friday, April 26, the interrogation of witnesses for the prosecution in the Yalta group of the "Hibz ut-Tahrir" case once again broke down at the North Caucasian District Military Court in Rostov-on-Don. « During the meeting it became clear that "the prosecution witnesses did not appear in court. The reasons for the failure to appear before the court are unknown. Secret prosecution witnesses - Mekhmetov, Starovoy and Ibragimov, whose interrogation along with other witnesses was scheduled for today's meeting, also did not appear in court," the Crimean Solidarity activists report. « According to the prosecutor, all the "prosecution witnesses fear for their lives, since the defendant allegedly could be a threat to them." « For example, the witness Ibragimov is an employee of the Center for Countering Extremism. Previously, he als</p>	<p>... n issue an order regarding whether plaintiffs may proceed—that is, whether the sealed document establishes that plaintiffs were subject to electronic surveillance not authorized by FISA" (the Foreign Intelligence Surveillance Act—see 1978). (Kraft et al. 2009) « January 10, 2009: Newsweek Readers Call NSA Whistleblower a 'Hero' Who 'Protect[ed] the People' Against Bush and Cheney « Newsweek publishes a range of responses to its article about Justice Department whistleblower Thomas Tamm (see December 22, 2008), who alerted the New York Times to the Bush administration's illegal domestic wiretapping program "Stellar Wind" (see Spring 2004 and December 15, 2005). Most are extremely supportive of Tamm; Newsweek writes, "Nearly all labeled Tamm a hero." One reader wonders why "few in the Justice Department were as troubled as Tamm about the illegality of the secret domestic wiretapping program or had the courage of his convictions." Another notes, "Whistleblowers like him are heroes because they are protecting 'We the people.'" A Milwaukee</p>	<p>... filing (defined as using a process of differentiation, othering, and subordination to target a population in Japan; it does not have to rely on phenotypic "looks") is that for "national security reasons" the next step is to target and snop on all foreign residents in Japan. Because they might be terrorists. The National Police Agency et al. have already been justifying the targeting of NJ as terrorists, "holders of "foreign DNA", and carriers of contagious diseases). And Japan's Supreme Court has now effectively given the green light to that too. The noose further tightened around NJ residents in Japan. « JCMU: On July 23, 2016 the Japan Center for Michigan Universities (JCMU) in Hikone welcomed Junko Hayashi, Japan's first female Muslim attorney, to speak about Islam and the issues faced by Muslims in Japan. In a recent court battle, Mrs. Hayashi represented Japanese Muslims that were being persecuted by the Japanese government for reasons other than the fact that they were Muslims. T</p>	<p>... y in a lawsuit may make a motion to the court requesting that the adverse party in the proceeding undergoes a physical or mental medical examination. The court may grant this request where the evidence obtained from such an examination would be relevant to an issue in the trial. Due to the nature of sexual assault cases, such examinations would be relevant the vast majority of the time. « Within any civil lawsuit, once all the evidence has been presented to the court by both parties and the trial has concluded, the judge will determine which party they will enter a judgement in favour of. If a judgement is entered for the defendant this means the court was not convinced that the allegations made by the plaintiff likely occurred. In this case the defendant will not be required to pay damages to the plaintiff for the alleged injuries suffered. Should the court decide for the plaintiff, they will award either all or part of the damages requested by the plaintiff and order the defendant pay these damages. The court will also award</p>

... stly to FIGS. 31a to 31e, the various elevations on the LCP molding assembly 190 are shown. The assembly comprises a lid molding 264 and a channel molding 190. It mounts to the printhead cartridge casing 184 via screw holes 268 and 270. The lid molding also has side mounting holes 276. As discussed above, the screw holes 270 and 276 allow a certain amount of longitudinal play between the assembly 190 and the rest of the cartridge 100 to tolerate some relative movement from CTE mismatch. Ink from the pressure regulators is fed to the lid inlet 272 via the resilient connectors 254. At the base of each lid inlet 272 is a channel inlet 274 in fluid communication with respective channels 280 in the channel molding 264 (best shown in the section view of FIG. 32). Each channel 280 runs substantially the full length of the channel molding 266 in order to feed the printhead 600 with one of the five ink colors (CMYK & IR). At the bottom of each channel 280 is a series of ink apertures 284 that feeds ink through to the ink conduits 278 from 6:00 PM Temple Theatre Park City • Saturday, February 2nd 6:30 PM Redstone Cinema 1 Park City • Alright, so this one does have a little bit of hype surrounding it. I feel like I have been hearing about the Zac Efron/Ted Bundy movie for at least a year. While there hasn't been much chatter about the film overall, I do know that a lot of people are excited to see Efron take on this role because it's unlike anything he has ever done so far in his career. I feel like that if Extremely Wicked, Shockingly Evil and Vile ends up being really great that this film could really boost Zac Efron's career. Outside of his performance in The Greatest Showman back in 2017, I feel like Efron hasn't really done a lot to wow the audience. He seemed to be stuck taking on roles that were comedic versions of himself and after a while, it just stopped being entertaining. This dramatic and dark turn could be just what the doctor ordered. • Extremely Wicked, Shockingly Evil and Vile is part of the Premieres section and will premiere at the Eccles theatre on ll of it appropriate or even apt. Sanjay Suri's love making scenes with Tannishtha Chatterjee show him copulating violently, with his pyjama on. • Chauranga makes an engrossing watch, although one wishes there was more to its story. • The film has been shot well and manages to highlight crucial issues. Even though it is director Karan Ranjan Mishra's debut film, he has done an impressive job. While the film does make a great attempt, the story leaves a lot to be expected from and drags on in parts. Chauranga attempts to expose the inequity and injustice in society and will stir-up its audience. • Chauranga is certainly not your regular popcorn flick, with several scenes that will make the popcorn in your stomach toss and turn. But if you are an admirer of realistic cinema, this can be your movie of the weekend. • There's no denying that the film in unflinchingly, unafraid to show Dalit village life as the series of compromises it often is. Had the performances been stronger, the accents more convincing, and the ideas more novel, Chauran le Lies, a rebooted Twin Peaks, and the upcoming Star Wars film The Last Jedi – Dern has indeed forged one of the more unusual careers of her generation. It's hard to think of another actress who moves so fluidly between the indie circuit and the blockbuster, the voice of Zen-like sanity and the mascara-streaked hot mess, and, of course, the winking world and the Lynchian dreamscape. In that 31-year-old Times profile, it is quite clear that the author had not yet seen Dern's next film, because he refers to it as, simply, "Blue Velvet," a suspenseful film scheduled to be released in September. (Anyone who'd gotten a glimpse of Lumberton would have... a few more colorful words to say about the experience.) • Dern is now the lead actress that David Lynch has worked with most frequently; this month's Twin Peaks reboot is their fourth collaboration. Their mutual admiration and understanding run deep. "I love using my body as an actor and I love the physicality of characters but it's David who specifically has made me leap into a void of truth ...

One last shot to cover everything I want to discuss. • While I enjoy the hell out of Richard Brake, Arthur & Merlin failed to really impress me. How many times do we have to see productions try to rework the Arthur story? Especially after Boorman was the only one to get close to the roots of the character? It's not magical enough to be a fantasy and not enough brutal enough to be a war film. Ultimately, Arthur & Merlin is just a time waster. • Arthur & Merlin arrives December 2020 from MPI and Signature. • Where I Belong and My German Friends arrives in December 2020 from Corinith Films • 3Trompie and Upendo & Kinsella both arrive from Indiepix in December 2020 • Habermann is available from Corinith Films • Dream Factory and Robo arrive in December 2020 from MPI • A Girl Missing arrives in December 2020 from Film Movement • Buddy Games arrives from Paramount around December 2020 • 8Quiet Explosions Healing the Brain is now available from Cinema Libre • 9Nomad in the Footsteps of Bruce Chatwin th the Best • The Encore Series • Deis Flicks • Order Films • Dania Khandaker • dkhanda@bran deis.edu • Please review our rental policy. • Fax order forms to • The rental fee for each DVD from our 'Deis Flicks' collection is \$20. In addition, there will be \$1 per person (minimum of \$20) added on the rental to cover NCJF's Public Performance Fee. The proceeds from the screening fee will be paid to NCJF, who in turn shares fees with the film makers. • BNC > Learning > 'Deis Flicks' • In collaboration with the National Center for Jewish Film on the Brandeis campus, the Brandeis National Committee has assembled a lending library of DVDs. The 'Deis Flicks' collection includes both the work of modern independent filmmakers and archival materials. Together they represent a visual record of the Jewish people in all of their vibrancy and diversity. Please explore our exciting array of films below. • Movie Index: • Restored NCJF • Vodka Empire • UK, 2012, 75 minutes • Written and Directed by D an Edelstyn; A film by Dan Edelstyn and Hilary Pow choice so as to not distract from the focal message of the film. A monochromatic palette provide s little hope for the Czechoslovak resistance, and reminds cinemagoers of the gruesome outcome they will ultimately face. • Image courtesy of variety.c on • Despite the slow-burning storyline, Anthropoid's action scenes are fantastic. The final scene in the Orthodox Cathedral, which lasted six hours in reality, is perhaps the real pull for cinema-goers. The numerous deaths suffered by the Nazis only point to the inevitability of death hanging over the resistance fighters. The audience are left with conflicting emotions: sad with the knowledge of their certain failure, yet proud of their sacrifice and bravery. When Uncle Hájek says to Kubík 'You're the bravest man I've ever met', an utmost sense of irony is conveyed. • Anthropoid is not a film that aims to sanitise history. Though harrowing to watch, director Sean Ellis did not shy away from illustrating humanity, particularly of the Gestapo's interrogation methods. Despite claims from some vi ...

... im Threapleton (m. 2001) • Redroofs Theatre School • Grammy Award for Best Spoken Word Album for Children • Relationship short Statistics of Kate Winslet • What is Kate Winslet marital status? (married, single, in relation or divorce): • How many children does Kate Winslet have? (name): • Is Kate Winslet having any relationship affair?: • Yes 3 affair • Is Kate Winslet Lesbian?: • 3 Affairs • Marriage 3 Children • Kate Elizabeth Winslet is an actress, singer. She is known best for her acting in the movie Titanic. She has won a Grammy Award, an Academy Award, three Golden Globe Awards and an Emmy Award. For her services to acting, she was awarded the CBE by Queen Elizabeth II, on November 22, 2012. She received 1995 Film Actress of the Year award presented by Variety Club of Great Britain. • Kate Winslet Personal Life • Kate Winslet is a married woman. Firstly, she tied the knot to Jim Threapleton in 1998 in a private ceremony. The couple shares a child, Mia Honey Threapleton born on 12th October 2000. But the relationship did not la was gratified. • As I drove away, the theme for Suspiria played on my car's CD player, a perfect sound cue to end Movies At Dog Farm III. I spent most of the hour long drive home chewing on ways to set up that fundraiser we had discussed, and I began to think of all the other cinematic obscurities I still wanted to share. It occurred to me that my usual mode of movie consumption - home alone on the couch watching the movies unfold on a regular old television - is lacking. There's simply no substitute for enjoying a movie on the big screen in the company of an appreciative audience. • I don't really fancy myself a critic, and I tend only to write here about the movies I love. I spend a little too much time watching these flicks, and I relish the opportunity to share the best of them with friends both old and new. Nothing can convey the satisfaction of hearing a group of otherwise normal individuals enthusiastically sharing their best dramatic renditions of movie quotes like, "You will drink the black sperm of my vengeance!" Presenting acks and others within the score are much more likely to include integrated electronic sound design elements. This combination of percussion and electronics is often described as a techno sound. • Gone are the rough edges of the 1960s sleazy brass sound, which has evolved into a very clean "wah" sound which cuts through the action tracks in a very Bond way. • Tomorrow Never Dies is the 18th main Bond film and David Arnold's first, and therefore his first attempt to establish what was to become the modern Bond sound. The film has a good song written by Sheryl Crow and Mitchell Froom, and the score hits the ground running with all the elements listed above fully in place. Particularly noticeable is the new style of action track. Although David Arnold's action tracks can seem "generic" at times (like those of many contemporary composers), he succeeds in "Bondifying" them with brief flashes of jazzy Brass or hints of the Bond theme. So in this way Arnold keeps a balance between the sounds typical of today and the long tradition of Bond fil you don't want to talk about them. So by creating this claustrophobic wall feeling, I could make the obstacle strong and powerful. Rather than talking about the occupation, I wanted you to see and feel it. • Rail: Do you consider Omar a political film? • Abu-Assad: For sure it's a political movie. • Why? Because I'm a political voice and I have a political point of view. We are telling the story from the Palestinian side. It's condemning the occupation. But you don't need to make a movie in order to condemn the occupation. The movie is not about that. Every human being should condemn every occupation, not just the Palestinian occupation. The film is about love, trust, friendship. The place of political discussion is somewhere else—you can do it on a sofa with your friends. In a movie it's boring. • Rail: There has been a trend in recent films about the Arab-Israeli conflict to cover several characters on both sides of the conflict. Omar is the opposite of this. It's named after its protagonist, whom it follows very closely for the en ...

who plays a young doctor, and Danny Glover, who has a supporting role. However, direction was pretty solid and there are some good moments. Grade: C+ • The 10th Victim (1965) This was really an interesting watch. A film I had heard pretty much nothing about, but that ended up being pretty cool, despite many flaws. Set in a near future where random people are pitted one against the other in a game of hunter/victim (kind of like The Purge, but more contained), the film follows a "hunter" (Ursula Andress) and a "victim" (Marcello Mastroianni), as they play a game of cat-and-mouse. There are so many cool elements that we've seen in other films (a bit of Running Man, a bit of Hunger Games, even some John Wick). Mastroianni is cool-as-ice in his role, and Andress plays the deadly female role pretty well. The film kinda hits a patch in the middle as the inevitable romance between them unfolds, but I thought the last act was pretty solid. I would've finished it 5-10 minutes earlier, but it was good anyway. Grade: B+ • The Addams Family (2019) ...	Method Actor asked the S to remove her cap, so that he can stare at her, to DRINK HER IMAGE (my own words) and understand WHY his character would love her so much. This is pretty much what happened: • (S removes her cap) • Method Actor: Yes, I can see your face better now. I can understand why your character the hero loves your character the heroin e, you being so obviously HOT and all. • (Smiles awkwardly) • Method Actor: So, what kind of relationship do we have? • (S stares, unsure how to answer the question, I was sitting next to Method Actor, so I answered immediately) • Me: Just a brief and fleeting one. The heroine never loved the hero, he was just a fling, they went out for two dates, he's too pathetic, so she ignored him since then. But the hero's an emo private eye, so he never seemed to love her, and was unable to let her go. • Method Actor: (looks at me) And you are... who? The director? • Me: The producer. • Method Actor: Right. So, it's just a brief relationship. Did they have sex? • (S stares) • Method Actor: Oh, right. Wa ...	cause it was literally the first song that I had on my playlist when I was writing the script. I would just listen to it and I just felt like because the movie is self-aware and ironic, and it kind of understands what it is—really love that song because of its politics and importance. • Snyder may acknowledge the political context (more off-screen than on), but I still don't think the sequence works in that regard. Vanderheide is a mercenary of war and who has spent the whole film killing zombies. Now a nuclear bomb saved him from being trapped in a city overrun by zombies, while also making him a rich man. His eagerness to reach Mexico City and enjoy his newfound wealth does not suggest some enlightened epiphany by either the character or the film about the danger of militaristic annihilation. Rather it accompanies just another glib "twist" to a horror movie ending where at least one character thinks he's safe and then-surprise-he's not. You know, like Snyder's Dawn of the Dead and pretty much every zombie movie going back to Romero ...	f-governing entity. The nationalist Kuomintang (KMT), who fled to the island after their defeat by the communists in 1949, imposed martial law until 1987, ruling with an iron fist for nearly 40 years. Hou's film A City of Sadness (1989) was the first to tackle, albeit obliquely, Taiwan's own Tianamen, the 28 February 1947 massacre, in which the KMT violently suppressed anti-government protests, kick-starting a campaign of White Terror that killed up to 30,000 civilians that year alone. The massacre, commemorated every year on Peace Memorial Day, lends impetus to Taiwan's independence movement. • For Hu, it is the experiences of ordinary people swept up in history's grand narrative that give his stories their focus. The island's ongoing crisis of existence pervades his film in recurring motifs: railways, empty platforms, people waiting for someone to arrive – or something to happen. • On 16 January, Taiwan holds a presidential election in which voters look likely to elect the leader of the opposition Democratic Progressive Party, wh ...

Part I (1) covered general properties of ammonia the current	... 6. pp. 27823-27831. # @article{86c0c2d7c4c64263a74746e3fc184829, # title = "An induced proximity model for NF-κB activation in the Nod1/RICK and RIP signaling pathways", # abstract = "Nod1 is an Apaf-1-like molecule composed of a caspase-recruiting domain (CARD), nucleotide-binding domain, and leucine-rich repeats that associates with the CARD-containing kinase RICK and activates nuclear factor κB (NF-κB). We show that self-association of Nod1 mediates proximity of RICK and the interaction of RICK with the Y subunit of the IKK kinase (IKK Y). Similarly, the RICK-related kinase RIP associated via its intermediate region with IKKY. A mutant form of IKKY deficient in binding to IKKα and IKKβ inhibited NF-κB activation induced by RICK or RIP. Enhanced oligomerization of RICK or RIP as well as of IKKY, IKKα, or IKKβ was sufficient for induction of NF-κB activation. Thus, the proximity of RICK, RIP, and IKK complexes may play an important role for NF-κB activation during Nod1 oligomerization or trimerization of the tumor necrosis	... specific protein-binding interactions leading to low backgrounds in immunoprecipitation. Still, RIPA buffer is very compatible with a myriad of applications, including reporter assays, protein assays, immunoassays and protein purification. When protein quantitation is desired, RIPA buffer is the lysate buffer of choice due to its compatibility with the BCA Protein Assay, although it can denature kinases [5], and can disrupt protein-protein interactions in immunoprecipitation/pull down assays [6]. Urea buffer is another versatile and efficient cell and tissue lysing buffer whose typical composition include: TRIS base 40 mM, Urea 7 M, Thiourea 2 M, NP-40 or CHAPS 4%, DTT 10 mM. Urea is used at concentrations ranging from 5 to 9 M, often with thiourea at concentrations up to 2 M. The additive thiourea can dramatically enhance the solubility of a wide range of proteins - nuclear, membrane, cytosolic, and including even tubulin that is highly prone to aggregation, in urea buffer [1, 3, 4]. As in RIPA buffer, different detergents and buffer	... led micro-environments and information theory to quantitatively characterize communication motif # Project acronym DISENTANGLE # Project Untangle the Bacterial Chromosome: Condensin's Role in Sister Chromosome Separation and its Mechanisms # Researcher (PI) Stephan Gruber # Summary A prerequisite for chromosome segregation in all living organisms is the topological unlinking of sister DNA molecules, called DNA decatenation. Decatenation is performed by DNA topoisomerases that work by transiently breaking strand(s) in one DNA double helix and passing another double helix through the temporarily created gate. How DNA topoisomerases manage to recognize linkages between sister DNA molecules and how they promote decatenation of sister chromatids (but not catenation) is still largely unknown. The driving hypothesis of this project is that condensin promotes chromosome decatenation by guiding the unlinking activity of DNA topoisomerase S. Condensin is a member of the family of SMC (Structural Maintenance of Chromosomes) protein comple

... of the chambers 212, 222 to be communicated or separated. # Alternatively, as those skilled in the art can easily conceive, the silicon substrate 230 having the anchor recess 250 is used to obtain the drug delivery system 201 by another manufacturing process similar to one of the second embodiment (see FIGS. 10A-10E). # The drug delivery system 201 so formed can safely be placed within a body for a long period so as to release the medicament in small doses. # In the foregoing, the drug delivery system is used for treating the circulatory system disease (forming the bypassing blood vessel). Yet, it can be applied for other diseases. Some of other applications of the drug delivery system will be described herein. # 1) Regeneration of Cornea # When a cornea is damaged by an ophthalmologic disease such as a cataract or glaucoma and/or an accident, the cornea has to be regenerated for treatment. To efficiently regenerate the cornea, the regenerative cells and/or factors for regeneration of the cornea should constantly be supplied to the	... ble transfectants behaved as did MDCK cells expressing only the pIGR. To monitor transcytosis, polarized filter-grown monolayers were allowed to internalize 125I-labeled human dgA from the basal lateral side for 10 min at 37°C, washed, and then recultured in the absence of 125I-dgA for an additional 60 min. In agreement with previous results, ~50% of the internalized 125I-dgA appeared by transcytosis in the apical medium by this time point (not shown) (Breitfeld et al., 1990; Hunziker et al., 1991). # Next, FITC-Tfn and Texas red-dgA (TR-dgA) were bound to the basolateral surface on ice, and the two ligands then were internalized for 2.5 or 25 min. In cells expressing both receptors, at 2.5 min FITC-Tfn and TR-dgA colocalized in basolateral EEs (Fig. 8 A, top row, arrows). After 25 min, both ligands were colocalized in more perinuclear, apical REs (Fig. 8 A, bottom row, arrows). # Tfn and dgA transit through the same EE and RE populations. (A) FITC-Tfn and Texas red-dgA were bound to the basolateral surface of MDCK cells dual	... n. Decrease of Pdgfc expression in Sod1 (G93A) mice restored vascular barrier properties, reduced motor neuron loss and delayed symptom onset by up to 3 weeks. Similarly, lower expression levels of PDGF or PLAT in motor neurons of sporadic ALS patients were correlated with older age at disease onset. PDGF-CC inhibition and restoration of BSCB integrity did not prevent capillary regression at disease end stage. Lower vessel density was found in spinal cords of sporadic ALS patients and the degree of regression in Sod1 (G93A) mice correlated with more aggressive progression after onset regardless of BSCB status. We conclude that PDGF-CC-induced BSCB dysfunction can contribute to timing of ALS onset, allow insight into disease origins and development of targeted novel therapies. # MTOR-independent, autophagic enhancer trehalose prolongs motor neuron survival and ameliorates the autophagic flux defect in a mouse model of amyotrophic lateral sclerosis. # Project description: Amyotrophic lateral sclerosis (ALS) is a devastating neurodegener During this project I aim to establish a world-class laboratory in structural and cellular biology of emerging viruses. The project greatly benefits from our unique biosafety level 3 laboratory offering advanced bio-imaging techniques. Furthermore it will also pave way for similar projects on other infectious viruses. Finally the novel computational image processing methods developed in this project will be broadly applicable for the analysis of flexible biological structures, which often pose the most challenging yet interesting questions in structural biology. # Project acronym CSUMECH # Project Cholesterol and Sugar Uptake Mechanisms # Researcher (PI) Bjørn Pedersen # Host Institution (H) AARHUS UNIVERSITET # Summary Cardiovascular disease, diabetes and cancer have a dramatic impact on modern society, and in great part are related to uptake of cholesterol and sugar. ... C83 vector # Inverse PCR # Inverse PCR (iPCR) allows to amplify rapidly unknown DNA sequences that at a region of known sequence (Ochman et al., 1988, 1990). The method uses the PCR, but it has to have primers oriented in the reverse direction of the usual orientation. The template for the primers is a restriction fragment that has been ligated up on itself to form a circle (Figure 3.2). Here, the primers Sprobe F and Sprobe R (Table 3.3) were used to amplify desired but unknown AHMMAs anking promoter regions from self-ligated bacterial artificial chromosome (BAC) fragments. # desired flanking sequence known sequence restriction # e.g. BAl # P-rev P-for # Pfo r- cloning, sequencing pool of self-ligated restriction fragments # Figure 3.2: Schematic of the inverse PCR procedure. Filled grey boxes represent the known core sequence. Hatched boxes depict the desired anking regions. Here, BAC plasmid DNA was prepared from overnight cultures of E. coli BAC clones. DNA was digested with suitable restriction enzymes and separated by agarose ge	... es in bud development and some valve asymmetries can be observed, and are shown in more detail in Figures 20-F, J. The valve asymmetries were related to the ones observed in drnl-2 "mature" gynoecia and fruits (in total, in between 40 and 20% of them presenting defects, respectively, Figures 1E, F). As observed in those gynoecia and fruits, the defects observed in drnl-2 developing gynoecia, do not appear to be 100% penetrant, and also vary in severity from pistil to pistil. Examples of altered growth were present from early gynoecium developmental stages. In Figure 2D, a doughnut-shaped, possibly stable 8 young drnl-2 gynoecium can be observed, presenting a roundish central opening. In contrast, stage 8 (according to Smyth et al., 1990) W gynoecia normally have an oval shape, present a bowtie shaped central opening, and the valve region can be clearly identified (Figure 2C). Examples of valve asymmetrical growth in stage 9 and stage 10 drnl-2 are presented in Figures 2E, F. The image in Figure 2F possibly corresponds to the "one valv	... od prognosis. Although it is more aggressive than papillary cancer, it does not spread to the lymph nodes but may metastasize to the lungs and bones. # Medullary cancer (193) develops from the thyroid's C cells and is more aggressive, harder to treat, and may spread to the lymph nodes or other organs. Blood tests typically show an elevated carinoembryonic antigen level. # There are three types of medullary cancer: sporadic, familial, and multiple endocrine neoplasia, type II (MEN II), an inherited form with possible tumors in other endocrine glands, such as adrenal or parathyroid. There are two subtypes, MEN Type IIA (258.02) and MEN Type IIB (258.03). According to coding directives, use additional codes to identify malignancies (such as thyroid cancer, 193) and other conditions associated with MEN Type II, along with a code from subcategory 258.0 (AHA Coding Clinic for ICD-9-CM, 2007, fourth quarter, pages 70-72). # Anaplastic cancer (193) is very aggressive with a poor prognosis. It can spread quickly to the lymph nodes and t	... nd probably result in gangrenous mastitis. So these leukocytes are beneficial by destroying bacteria; however, leukocytes are also detrimental because high numbers of them are associated with decreased milk production and poor milk quality. # To understand this relationship, we need to review the anatomy of the udder and how milk is produced. J ust as nutrients are transported from the bloodstream into mammary tissues to be converted into milk, leukocytes are also transported into milk as a surveillance mechanism to look for bacteria. In the typical uninfected mammary quarter, the leukocyte (or somatic cell) numbers remain less than 200,000 /mL. Now, keep in mind that each mammary quarter is composed of millions of microscopic alveoli. Each alveolus, which is drawn out of proportion in the figure below, is a three-dimensional sphere composed of a layer of milk-producing cells that surround a lumen or collecting space, which drains milk to the gland and teat cisterns before exiting through the teat duct during milking. # In order to

These methods give us remarkable new insights into the dynamics of gene expression, cellular interactions, and heterogeneous processes. In fluorescence imaging, a laser is used to excite the fluorophores at a particular wavelength. Full field epifluorescence can then be used to measure the light as the fluorescent tags emit light while returning to their unexcited molecular state [23]. In confocal imaging, a pinhole in combination with focused laser light is introduced to effectively reduce background fluorescence and allows optical sectioning of the sample by mechanical scanning. Varying the pinhole will effectively vary the thickness of the sample being imaged, the image resolution, and the acquisition time. # For some applications, the use of fluorescent tags is not feasible. By continuously filming embryo material some important information on cell outline, position, shape, and texture can be extracted from the	... and is regarded as a candidate tumor suppressor gene; however, the mechanism by which BLCAP exerts its function remains elusive. This study investigated the functional association between BLCAP and proliferation or apoptosis in cervical cancer cells, to identify the functional motifs of BLCAP. The BLCAP-shRNA expression vector based on pRNA-U6.1/Hygro plasmid was used to specifically inhibit BLCAP activity in HeLa cells. The optimal shRNA plasmid was selected to knock down BLCAP expression and the biological effects were investigated. The effects on cell cycle and apoptosis were detected by flow cytometric or Annexin V-FITC staining analysis. The gene expression profiles of HeLa cells transfected with blcap-wt and BLCAP-shRNA were analyzed using human signal pathway gene Oligochips. The levels of protein expression and interaction of BLCAP with Rb1 proteins were determined by western blotting and Co-IP assays. The site-specific mutagenesis assay was used to identify amino acid residues important for BLCAP. Significantly differential

In: <i>eLife</i> d Tautz [2010] reported. Different measures o f evolutionary constraint such as the strength of selection against protein-changing mutations, the focus of the genes (which is what the original study focused on), or the conservation of their regulatory elements, show different patterns. There are no urlsglasses, there are a couple of funnels, and then there are parameters that just don't exhibit much systematic change at all. « (There's also a couple of points about potentially dodgy statistical approaches in some of these papers, which may make all the difference between an hourglass and a funnel . That's a bit scary.) « I can't say I've properly digested this paper. There's an awful lot in it, and my head was spinning non-stop when I finished reading. It's definitely fascinating stuff, though , and once again, the conclusion is that things are more complicated. (I'm kind of getting used to that at this point.) Before, you could look at a group of creatures, compare their development and as k, funnel or hourglass? Then you could ask why. No

... ls in pakistan have suspended a nationwide anti polio campaign that's after the killing of a health worker and two policemen escorting vaccination teams pakistan is one of three countries in the world where polio is still endemic but threats by armed groups and social attitudes have prevented many parents from vaccinating their children all ahead what got all this for rafael nadal has a bad day at the barcelona open and he is here later with all the details the e.u. and in two thousand and eight al-jazeera documented a groundbreaking scheme preparing some of india's poorest children for entry into its toughest universities ten years on we return to see how the students and the scheme are helping change the face of india super thirsty amount easier. cl « al-jazeera janice burg security forces in afghanistan a free dozens of prisoners from a jail run by the taliban u.s. special forces joined the raid in zabol province the jail was how the housing mainly security officers said he had been tortured during their detention eight t	... en she had willingly poisoned her own husband! [20,21] The well-known historian Abu al-Faraj al-Sfahani has written in this regard: Mu'awiya wished to take the pledge of allegiance from the people for his son Yazid. In spite of this, Imam al-Hasan stood in his way and he would not allow this to take place. Due to this reason, he had the Imam poisoned. « In conclusion, it must be said that when Imam al-Hasan ('a) was martyred and this news reached Mu'awiya, he expressed great happiness and his officials even prostrated in their happiness. News of the martyrdom of the Imam ('a) also reached Ibn 'Abbas, who happened to also be in Syria . Ibn 'Abbas went to see Mu'awiya and when he arrived at the court, Mu'awiya said to him: "Oh Ibn 'Abbas, I have heard that Hasan ibn 'Aliahs passed away." Ibn 'Abbas said to him[22]: "We belong to Allah and to Him we are ever returning." He then repeated this verse several times (in expressing his grief and sorrow). « Ibn 'Abbas then said: I heard that when news of this was given to you, you expire	... ble 1 (Morabak et al. 2016). « Table 1. Conditions for Producing Unbleached Bamboo ASAM Pulp « NaOH, sodium hydroxide; Na2S03, sodium sulfite; AQ , antraquinone; EDTA, ethylene diamine tetraacetic acid; L/W, liquor to wood ratio; Temp, temperature « Disintegrating and beating « The unbleached bamboo ASAM pulp was beaten according to TAPPIT 200 sp-96 (1997). Briefly, 24 g of oven-dried (o.d.) unbleached bamboo ASAM pulp was weighed and soaked in 2 L of distilled water for 4 h. The pulp was then disintegrated with a British disintegrator (DSG -2000, Regmed, Brazil) for 75,000 revolutions. The pulp was then beaten for 10,000 revolutions. The fineness of unbleached bamboo ASAM pulp was determined in accordance with TAPPIT 227 om-99 (1999). « Handsheet formation « Prior to handsheet formation , the unbleached pulps were disintegrated in a British disintegrator for 3,000 revolutions. Handsheets were formed in a sheet machine in accordance with the TAPPIT T 205-sp-95 (1995) to make sheets with a basis weight of 60 g/m ² . These handsheets were	... because the trial was allegedly conducted during times of low pest presence; therefore, on 19 January 2001, it ordered a repetition of the field trials. The GEAC field trials were to be monitored by the Indian Council of Agricultural Research (ICAR) (Cohen and Paarlberg, 2004; Jayaraman 2000; 2001; Raghuram 2002). On 26 March 2002, the GEAC conditionally approved the commercialization of four Monsanto hybrids: MON 531 (bollgard I), MECH 12, MECH 162 and MECH 184 - for a 3 year period from April 2002 - March 2005 (Qaim et al. 2006; Raghuram, 2002; Jayaraman and Bouchie, 2004; Jayaraman, 2002; S tone, 2007; Herring, 2015). Because of the perceived fear of the seeds' susceptibility to leaf curl , the Committee declined permission to commercialize these seeds in North India. Subsequently, the G EAC approved one more hybrid in 2004 and 16 more in 2006 using event MON 531 and event 15985 for MMB (Grüne et al. 2008). « Another facet of the chronology was Monsanto's shrewd business move vis-à-vis accusations of preferential treatment by the reg

<p>... sed her brand, spanking new album based on her fictional alter ego, Roman. The album has evolved into a very successful album - as it has debuted n o! on the Billboard chart. But the quality lacks. Seriously. I have never been so angry in my life. I was surprised, confused and vex when I actually listened to this album. On paper, the album sounds like it could be amazing - Nicki stated that she di dn't want this album to be based around sex or violence; which is fair enough. But, I'm going to be honest. Sex and violence is what made Nicki, Roman and Martha famous in the first place. It's like ta king the Yankee hat away from Jay Z - what's the poi nt? The album almost has two sides. There is a h iphop attempt ("Roman Holiday", "Come on a cone", "I Am Your Leader", "Beep in the Trap", "HOV Lane", "Roman Reloaded", and "Champion") and a pop, all star attempt (the other 11 tracks). Oh, I forgot, there was this one track where she tried to merge her Trinidadian roots with pop, creating "Gunshot" - Yeah, having Beenie Man on a uptempo song really</p>	<p>... m Chats with Prin, and all things creatively c al for musicians, writers, and educators. « New M editation Music by Prin » by Prin Dumas on Novembe r 4, 2020 « Meditation in G96 - S ongwriting Demo » During Covid quarantine, I've ha d to sharpen skills at home to help me be self-suf ficient in my music, songwriting, creative project s, and all that fu stuff. One skill has been a ho bby in the past - production. I've usually arrange d and produced my work, and then paid a professional producer to take an audio to a polished, qualit y level. Well, now that producer has to be me unti l further notice, and I've been exploring soundscape and rough demos. I'm using GarageBand, which i s a great beginner DAW and allows me to work off o f my iPad easily. « I wrote Meditation in G96 with a few "structure" ideas in place to help me do it. As a meditation melody, I chose the key of G to fo cus on the throat chakra. I chose tempo 96, because I wanted to include some spiritual numerology id eas about mirroring and reflection. As far as soun</p>	<p>... ple. For years to come expect bands from all o ver Medway to long for their music to be introduce d as 'The Preservation Society Presents...' « Kids U nique debut single 'Seymour Evil' is out now on di gital download. « Vol 1 of the singles vinyl club is out now featuring Theatre Royal and Kids Unique « Volume 2 features Dartford's Dead Lovers and Mar gate's Pantomime Villains. Both can be bought excl usively through the website: www.thepreservationso cietypresents.com « A Medway Vision 4 - Blues Mi sadventures « You probably think you know what blu es music sounds like. You've probably seen lots of bands in pubs with a blues-based sound. You know t he sort of thing, tribute acts; white men with a l ove of the blues singing about what it's like to b e a poor black man in 1930's America. You're absol utely right. It sounds good but it's not REAL blue s, music of genuine pain, anguish and hardship. Happily, real blues does still exist. And not just w ith that Detroit genius Jack White. It's right here in Medway too. And this being Medway, it's rathe</p>	<p>... er - think raucous recording sessions, armies of female 'companions', lakes of booze and iconic slots at Donington (Download in new money) - may h ave been a whole barrel of chaotic fun, but those times also came with personnel shuffles and manage ment chaos. Even Wonder Days, the band's remarkabl e comeback album in 2015, was no walk in the park, with Matthews conquering a life-threatening illnes s during the recording process. « Through it all, Thunder survived - which leads us to Rip It Up, th eir eleventh studio album. It's a record with big boots to fill, as Wonder Days raised the bar signif cantly for its creators when it came to creating a follow-up. Fortunately, Rip It Up steps up to th e challenge with utter confidence, bringing 11 so ngs that cover a wide range of sounds and emotions to the rock territory of 2017. « 'Rip It Up' is cer tainly not Thunder by numbers: it was a real chal lenge to make," reflects Morley, who composed the s ongs and produced the album during the spring and summer of 2016 at Rockfield Studios in Wales. "Eve</p>

Continue reading I Love You « Olivia Schönfeldt is a young (still only 18 years old) and talent singer and songwriter fro m the northern parts of Sweden. She breath and live s with music nearly 24/7, since she's at music sch ool during daytime and practice and write stuff n early all other time. So please listen to this up-tempo popish song, with a. Continue reading Shot In The Dark « Alla Motgångar & Hillevi, our latest signing, is a five piece act with loads of punk en ergy. That together with some small hints of class ic Swedish progg makes them a good standard bearer of great Swedish music. The band started up as a result of a truly black story. The singer Adam went through a depression with angst.. Continue reading Alla Motgångar & Stjärnorna och Juvelerna « In the middle of everything, just you and me, only when you're happy, just like we said." That is the stor y told by Rickard och Juvelernas in their Daniel Gilbert produced new singel Stjärnorna och Juvelerna</p>	<p>... rock band to play in the Soviet Union, land of Stoli and caviar! The history making concerts at Moscow's Olympic Stadium, where the band played to a total of 180,000 people across ten consecutive nights (following a welcoming reception that Bernie remembers as being "something like Beatlemania"), represented not just an achievement for Uriah Heep but a major breakthrough for western music in general, opening the door for the likes of the Scorpions, Bon Jovi, Status Quo and Motley Crue. « "We're so aware of being ambassadors of the West." Mic k Box told Music Week shortly afterwards. "If we'd have gone there and created rock and roll havoc it could have been (Iron) curtains for other bands wanting to go, excuse the pun. We were definitely te sting the water." « More significantly, however, t he event became the launching pad for the new line -up, the concerts being recorded and subsequently issued in the form of the commemorative Live In Mo scow album (their first release for Legacy Records - incidentally their third live recording of their</p>	<p>... born in the Cambridgeport neighborhood of Camb ridge, Massachusetts, to John H. Hodges and Katie Swanson Hodges, both originally from Virginia. After moving for a short period of time to North Cambrid ge, the family moved to Hammond Street in the Sout h End of Boston, where he grew up with baritone sa xophonist Harry Carney, and saxophonists Charlie H olmes and Howard E. Johnson. His first instruments were drums and piano. While his mother was a skill ed piano player, Hodges was mostly self-taught. Once he became good enough, he played the piano at dances in private homes for eight dollars an evenin g. He had taken up the soprano saxophone by his te ens. It was around this time that Hodges developed the nickname "Rabbit", which some people believe a rose from his ability to win 100-yard dashes and outrun truant officers, while others, including Carney, said he was called by that name because of hi s rabbit-like nibbling on lettuce and tomato sandwiches. « When Hodges was 14 he went with his eldes t sister to see Sidney Bechet play in Jimmy Cooper</p>

She also helped promote the careers of Randy Newman, and Canadians Joni Mitchell and Leonard Cohen. ↗ http://www.judycollins.com/ ↗ http://www.elektra.com/elektra/judycollins/index.htm?sessionid=L0EF2A035JGQ0AMEQSFEY?requestid=546276 ↗ http://www.richardhess.com/judy/ ↗ 1946-Elliott	... prägung von Segesta mit einem Anhang der Hybriden, Teilstücke und Tetradrachmen sowie mit einem Überblick über die Bronzeprägung. As the title indicates, this book is primarily a catalog of the didrachms struck by the city of Segesta. Beginning with the first issue in 475/70 BC, long after its immediate neighbors had already minting this de nomination, this book traces this coining through the following 80 years, when Segesta ceased minting di drachms in favor of tetradrachms. The catalog, divided into four distinct periods, consists of a die study listing each obverse and reverse die pair, accompanied by a record of examples in major collections and auction catalogs. Perhaps most welcome among the appendices are additional die studies of Segesta's silver fractions and tetradrachms, as well as a brief overview of the bronze issues of the fifth and fourth centuries BC. Other appendices cover known examples of local hybrids (dies of Segesta used with coin dies of its immediate neighbors), ancient imitations and fourrées, and modern fakes.

... of time. « I think Alicia Keys will be known widely after she retires. She went to school to specifically study music, and didn't just pop out of the internet. « I'm not a big fan of either (call me crazy, but I like listening to instrumental music generally), but I have listened to « Elvis in t he past on my own. That being said, I prefer Elvis . « Today's music stars are a different question. I'm not sure that many of them will be remembered, due to the fact of so many people being negative a nd positive about them. For example, the Beatles a nd Elvis don't have many haters (at least, that I can think of on the top of my head) but many stars today, like Bieber or Minaj, are disliked and made fun of. They may be remembered negatively, or b e而已 remembered at all. I can picture someone tal king to their grandchildren (which would be one of us kids when older) trying to tell our children wh ich music artists we loved/hated but not being abl e to remember their name. I think many will be los t in the flow of new music. « i have never liked E	... ion arrangements vary in complexity—some emplo y groove-based vamps fixed to a key, or even a single chord. Others can feature odd or shifting time signatures with elaborate chord progressions, typi cally, these arrangements, whether simple or complex, will feature extended improvised sections that can vary in length. As with jazz, fusion often employs brass and woodwind instruments such as trumpet and saxophone as melody and soloing instruments, the rhythm section typically consists of electric bass, electric guitar, electric piano/synthesizer and drums. « As with traditional jazz improvisation, fusion instrumentalists generally require a level of technical proficiency. The term jazz-rock is often used as a synonym for jazz fusion as well as for music performed by late 1960s, experimentation continued in the 1990s and 2000s. Fusion albums, even those that are made by the group or artist. Rather than being a musical style, fusion can be viewed as a musical tradition or approach. Afro-Cuban jazz, one the earliest form of Latin jazz, is a fu	... was here where Carl Perkins tried on his "Blue Suede Shoes" and where Johnny Cash first proved he could "Walk the Line." « In 1950, Sam Phillips opened what he first called The Memphis Recording Service with a mission to record "anything, anywhere, anytime." His passion was to record the rhythm and blues music he heard on nearby Beale Street being performed by black musicians who had little chance of getting their music on record elsewhere. It was on Beale Street, Memphis's entertainment section and the hub of the South's black community, where the sounds of blues and country were blending together to make a new sound. Phillips wanted to capture the excitement of this new music and make it available to those outside of Memphis and to the world. « I knew this music wasn't going to be available in a pure sense, forever," Phillips said. His studio's goal was to capture that pure raw energy on record and share it with the world. And that he did. « Radio stations across the South in the early 1950s played mostly country music and Grand Ole Opry	... by Robert Louis Stevenson. « Jacopo da Bologna's 14th Century madrigal Non al su'amante feature d the story of the Goddess Diana bathing in a mountain stream and being observed by a passing hunter — what beautiful singing and playing lines, here! Especially telling was the blend of lyrical voice and excitable recorder figurations. The story didn't appear to have a happy ending, judging by the melancholia that seemed to grip the piece over its last minute or so's duration! A happier, more energetic outing for all concerned was provided by an anonymous 14th Century French ballade, "Constantia ", a dancing, tintinnabulating expression of joy from voice and instrument that makes one wish one could be a time-traveller! « This was a great concert for home-grown music, as next was Helen Fisher's setting of Lauris Edmond's poem I Name this place, one of the verses from a collection "Scenes from a Small City". As befitting the occasion for which the piece was written (the wedding of friends) the music has a renaissance-like feel, a ritualistic el

... is a woman and the backup dancers are men. « Cost: \$5 Come swing dance on Fridays at the Hender son County Athletic. Starting Friday, September 1st, 2017, repeated every week on Friday @ 7:00 p.m. « Pricing & Schedule. There are no reservations required for SDS weekly workshops and dances. All dances & workshops are held the 2nd, 3rd, & 4th Saturdays. « Swing Time (1936), Never Gonna Dance see ne There are no greater dance musicals than none is more uplifting or enduring th. « Yikes. Not good, but Tebow has actually performed better than anyone could have realistically expected of a guy who hadn't played baseball competitively since his high school days. Tebow is hitting.2. « Registration begins at 4 p.m. on the day of the event. The St. Charles Imperial Dance Club teaches Imperial Swing Dance Lessons from 6:30 to 8 p.m. every Thursday at the St. Peters Cultural Arts Ce. « Houston Swing Dance Society. Dallas Swing Dance Society. Heart of Texas (HOT) Whip Dance Club Austin 9/4/16: Could not reach website. Austin Swing Syndicate Non	... s of geometric shapes in varying configurations. « This show comprises works from two series that developed more or less simultaneously. One group is Concentric Squares, which has been ongoing for several years, and paintings from this set have been shown numerous times in various venues recently. The other group, Horizontal Stripes, is smaller, with just six altogether. They have not previously been shown. Both groups use only a range of grays and metallic hues, what I have been calling an industrial palette, to distinguish the colors from spectrum or natural hues. They all are hard-edged using straight lines and multiple layers of paint to give the surface an opaque effect that keeps the eye of the viewer on the surface instead of penetrating into an illusionist depth. « The squares are classical in their symmetry and are made up of a series of mathematical relationships and proportions that are determined before the painting is begun. The paintings are conceived as a series of concentric forces compressing toward the center, or con	... d to be announced) will be offered as a 7 p.m. Saturday evening event in the Fiester Auditorium at Mariposa County High School, and a Sunday matinee at 2 p.m. at a location in or near Yosemite National Park. But fiscal assistance is needed. « A young audience member learns the art of conducting via observation at a 2019 concert in the Ahwahnee's Great Lounge (photo by Cheryl Kellogg Petretti). « The newly-renamed orchestra sporting the acronym "MYSO" (or My Symphony Orchestra) is now an independent non-profit organization partnered with the 501(C)(3) Collaborative Arts and Culture Foundation. The CACF, an exclusive fine arts fiscal partner, was founded in 2010 in Portland, OR, and relocated to Mariposa a few years ago. « As a publicly-funded entity, MYSO requests support from those who realize the intrinsic and fiscal value to this region made by the 21-year-old orchestra; all donations to the MYSO are tax-deductible. As the orchestra creates new administrative and infrastructural fixed assets, Yosemite Hospitality, Yosemite National Pa	... I felt part of a community. « George Parker, a audience member « The Free Theatre acted, and probably still does, as a laboratory for some of the most creative minds in New Zealand with artistic consequences far beyond the theatre and time of production. The Free Theatre has continued to engage in a dialogue, at an international level, between space, narrative and body that has allowed local students to overcome traditional barriers of intellectual isolation preparing graduates for careers both in New Zealand and on the world stage. This has been made possible by the sacrifice and commitment of its founders and supporters who over the last 25 years have not only delivered an excellent contemporary theatre to Christchurch but have influenced more than one generation of New Zealand artists, filmmakers and thinkers. « - Lawrence Wallen, Design, MediaMaterial; Head of School, School of Design, University of Technology Sydney « Flashback #8 ... But as much as the crossover is natural to him, can Bo in the long term bring about a sustainable marketable marriage between the two genres? If he can succeed in that regard, then it would do miracles for our Lucian music and we can well end up with a genre of music more powerful, more sustainable than any of the existing genres of Caribbean Music. And that is why this year's "paradigm-shift" in the Jazz festival is most welcomed platform. « DRAYTONS TWO WERE THE SPOKE KING « In conclusion, I claim that St. Lucians are not cultural strangers to Jazz. I further claim that Jazz is in our blood and it must be true that same African slaves who brought Jazz to America also brought it (or at least a form of it) to the Caribbean! Only that, we perhaps never had the res	... e trumpet in fifth grade, then « started guitar and percussion in high school in Montgomery County, Pa., where he grew up. He enjoyed the high school band, jazz band, and chorus, and especially enjoyed jamming with friends. "Toward the end of high school, I started to experience music as a powerful force for me as an individual, almost like a healing thing for me," he said. "It gave me power." « After two years at Penn State, officially studying science and engineering but unofficially playing guitar and drums every day and jamming with friends, Mitnick decided to pursue his future in music. « Once the illusion of following an engineering and science career faded, music was what remained, he said. He auditioned for the University of the Arts in Philadelphia, where his father was an architecture professor, and, on his second try, was accepted. « Once I got there, my life changed dramatically," Mitnick recalled. "I cut all my hair off and got very serious. I realized that it's one thing to play music with your friends at a party, but

It reminded me of a George Plimpton story where he participates with the New York Philharmonic Orchestra. He is given the gong because "he can't mess it up" but hits it so enthusiastically that even the conductor notices. I looked it up and the piece Plimpton played gong on was indeed Tchaikovsky's Symphony No. 2. « I need to take advantage of the ~\$40 = \$20 program again within the next three-and-a-half years. « Previously: Tour of Symphony Hall » Patriots' Day 2010 » 2010-04-19 10-19 » Liam « Leave a comment » Here in the Commonwealth of Massachusetts we're celebrating Patriot's Day, or the 235th anniversary of the start of t	... 7 - Ch - As Editor (26) « As Translator (6) « Works edited by: Redlich, Hans Ferdinand « Bärenreiter Taschenpartituren » 12 Concerti Grossi, Op. 6 (Handel, George Frideric) « Concerto Grosso in A major, HWV 329 (Handel, George Frideric) « Concerto Grosso in A minor, HWV 322 (Handel, George Frideric) « Concerto Grosso in B minor, HWV 330 (Handel, George Frideric) « Concerto Grosso in B-flat major, HWV 325 (Handel, George Frideric) « Concerto Grosso in C minor, HWV 326 (Handel, George Frideric) « Concerto Grosso in D major, HWV 323 (Handel, George Frideric) « Concerto Grosso in D minor, HWV 328 (Handel, George Frideric) « Concerto Grosso in E minor, HWV 321 (Handel, George Frideric) « Concerto Grosso in F major, HWV 320 (Handel, George Frideric) « Concerto Grosso in G major, HWV 319 (Handel, George Frideric) « Concerto Grosso in G minor, HWV 324 (Handel, George Frideric) « Hallische Handel-Ausgabe (Handel, George Frideric) « Music for the Royal Fireworks, HWV 351 (Handel, George Frideric) « Symphony No. 4 in E-flat major, WAB 104 (Bruckner)	... achievement. Atlantic Riband evokes the struggle and ultimate victory of ocean-crossing immigrants to America in an orchestral showpiece of power and splendor. American Rhapsody is a lyrical romance for violin and orchestra, and Divinum Mysterium a single-movement viola concerto rich in expressive tapestry. Concerto Grosso shows Fuchs's sheer energy, and Discover the Wild is an orchestral overture of lyricism and color. « Gustav Holst's youthful enthusiasm for Wagner is reflected in his ebulient Wall-Whitman overture written in 1899. Shortly afterwards he composed the Cotswolds Symphony which embraces hints of contemporary British folk music but is dominated by the slow movement, a profound elegy for the utopian socialist William Morris. Though completed at college, A Winter Idyll shows real orchestral assurance. Indra is an accomplished tone poem revealing Holst's interest in the legends of India, whilst the glittering and evocative Japanese Suite was written in response to a request from a Japanese dancer appearing in London.
